## THE ENERGY FOOTWEAR

### Our History

The company that evolved into the Bata Shoe organization was first registered in the town of Zlín Czechoslovakia in 1894. From humble beginnings the small family business expanded rapidly under the vision and guidance of founder Thomas Bata. Thomas was a ninth generation shoemaker determined to become a manufacturer who could provide customers with value for their money. Bata became an international business in the first half of the 20th century and by the second half of the century had established a true global footprint (production in Australia commenced in 1961).

A progressive and market leading pioneer of the modern footwear industry Bata is now an iconic brand, recognized around the world and serving one million customers in over 60 countries every day.

### Bata Industrials

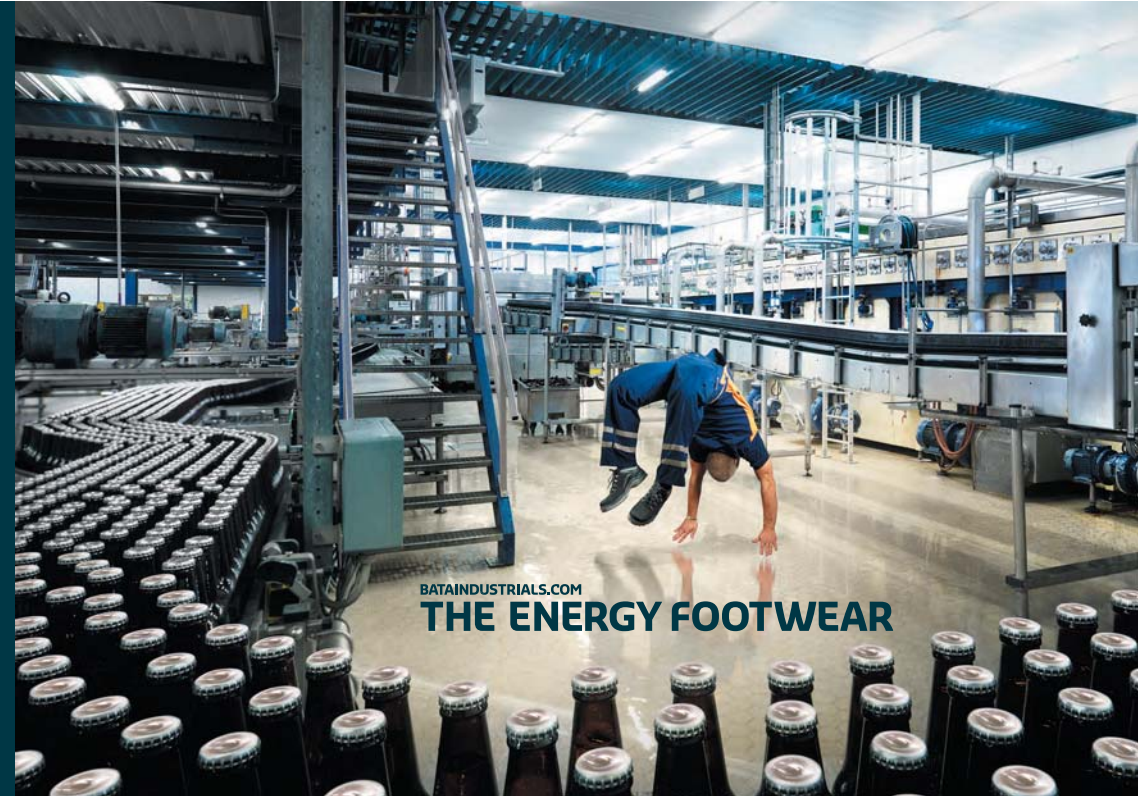

Bata Industrials is a specialized global division of the Bata Shoe Organization and has similarly evolved from a dedication to excellence, innovation and customer service. Our latest collections are presented herein. Technically developed using premium materials and components Bata Industrials footwear importantly remains true to the ethos of our founder by continuing to represent excellent value for money.

### The energy footwear

Safety footwear is not just about protection and safety. Above all it is about health and wellbeing. Safety footwear that combines functionality with comfort and kinetic value will always provide the best long term benefits.

For this reason Bata Industrials continually invests in research and development which means that Bata Industrial footwear is constantly enhanced through new solutions, innovative materials and latest technologies. With this in mind, and after extensive studies of biomechanics within the human musculoskeletal system, Bata Industrials are pleased to present **The Energy Footwear**.

Packed with energy enhancing features and benefits and with a keen focus on detail and design our collections are always developed with the wearer in mind. For health, wellbeing, and of course, safety.

## BATA INDUSTRIALS SPORTMATES COLLECTION

With sports styling and lightness under foot SportMates are ideal for workers on the go. A soft cushioned midsole generates outstanding comfort and flexibility whilst also providing high level impact absorption. Suede leather and mesh uppers are padded at the collar and tongue. Coupled with breathable linings this creates optimum climate control inside the shoe for day long comfort. Whilst light and flexible to wear SportMates make no concessions to safety. Approved to Australian Standards AS/NZS 2210.3 SportMates feature the reassuring strength of steel toe caps and durable heat, oil and acid resistant rubber outsoles.

## FLEXIBLE, STEEL TOE, LIGHTWEIGHT CUSHIONED SOLES.

SportMates continue to represent the very latest in sports styled safety footwear. Light on the foot thanks to soft cushioned midsoles, SportMates still provide the reassuring protection of steel toe caps and durable rubber outsoles. High energy absorption and flexibility means that SportMates are perfect for workers on the go. Put a spring into your step.....run into your nearest stockist before they run out!

### SPORTMATES FEATURES & BENEFITS

1. Channeling for liquid dispersal.
2. Added grip at toe off.
3. Protective lip at toe.
4. Multi directional slip resistant.
5. Abrasion resistant rubber outsole.
6. Oil and acid resistant.
7. Cushioned phylon midsole for impact absorption.
8. Protective wrap at the heel.
9. Added grip at the heel strike.
10. Breathable suede leather/mesh uppers.
11. Padded tongue.
12. Padded collar.

## CLASSIC DESIGNS FOR AUSTRALIAN INDUSTRY

Bata Industrials Natural collection has evolved from years of experience in servicing Australian industry. Now in an expanded range that includes exciting new designs Naturals offer premium styling and features to improve your well being, health and safety. The new 'Natural' sole design provides a wide stable footbed that enhances slip resistance and reduces the risk of ankle roll.

## THE NATURAL COLLECTION.

The robust characteristics of the Natural collection now feature in an extended product range that is suitable for most working conditions. Integral to the collection, the 'Natural' sole design has been developed to be a natural extension of the body with a broad stable footbed and comfortable toe shape. Retaining Bata Industrials unique Tunnel System® in the heel the 'Natural' sole design also features cushioned dual density polyurethane soles on the outside and PU cushioned insoles on the inside. Surety and comfort under foot are fully optimized in the new Natural collection from Bata Industrials.

### MICROBAN TECHNOLOGY

Microban utilizes multiple organic and inorganic antimicrobial technologies to custom engineer an antimicrobial solution that meets the unique needs of your product application. Our technology agnostic approach enables us to provide you an antimicrobial solution that meets your specific needs.

### C.T.S - COMFORT TECHNOLOGY SYSTEM

Inspired by nature's own, this simple yet unique idea is taking comfort in safety footwear to the ultimate level. The Deep Comfort mushroom inserts are based on shapes provided to us by nature and act as nature intends them. The lamella absorption impact zones are the most effective means of increasing the ratio of surface area to surface mass, supplying ultimate impact distribution. The unique lamella construction, combined with the new Absorbaloy® rubber compound material offers the wearer complete impact distribution. This unique idea delivers the wearer ultimate in comfort technology and protection. With such a simple design concept Deep Comfort is now pioneering these techniques and offering them in the form of our latest range of safety boots.

## DEEP COMFORT COMFORTABLE, DURABLE, AFFORDABLE.

Deep Comfort's mushroom lamella sole design is the most effective means of increasing the ratio of surface area to mass, increasing your overall comfort due to increased impact dispersal.

In addition to the Comfort Technology System, the Deep Comfort range uses the latest technology in raw materials, design and production processes. All Deep Comfort styles use premium full grain or nubuck leather uppers, with Microban anti-bacterial linings to keep your feet fresh and minimise odour. The upper designs are such to maximise both comfort and durability.

### INSPIRED BY ONE OF NATURE'S OWN.

The lamella's radiating gills are the most effective means of increasing the ratio of surface area to mass. This natural structure increases the dispersal of weight, meaning that the wearer benefits with ultimate comfort and protection. The Absorbaloy® replicates the true synthetic nature of the mushrooms lamella and assists in dispersing impact which reduces significantly pressure prone injuries in all major joints.

The Deep Comfort's new sole design reflects the lamella and the CTS absorption zones. The benefits can be seen with the expansion of the mushroom shaped interior button, through to the spread of the lamella zones on the distinct sole. These impact zones provide you with a more comfortable work boot that will aid and protect your feet, legs and lower back.

### LET YOUR WORK BOOT WORK FOR YOU.

### FEATURES AND BENEFITS

1. Full grain leather uppers.
2. Microban anti bacterial lining and sock.
3. PU comfort footbed.
4. Cushion PU midsole.
5. 300° heat resistant rubber outsole.
6. Impact Zone sole design.
7. Lamella impact absorption inserts.
8. Flex point tongue.
9. Heavy duty nylon pull tabs.
10. Easy removal lugs.
11. High density padded collar and tongue.
12. Heavy duty fastening system.
13. Grip zones.
14. Ladder breaks.
15. Liquid dispersal system.
16. Latex toe cap liner.
17. Rubber toe cap strip.
18. 200 joule steel cap.
19. Bumper toe protector.

**Bickz**<sup>®</sup>  
BY BATA

## METAL FREE SAFETY

The Bickz range includes a flexible Wellmax composite midsole. Just like a steel midsole this composite midsole protects the entire base of the foot against sharp objects penetrating through the sole. The range incorporates composite safety toe caps.

- Protection in accordance with AS/NZS 2210.3.
- Broad and flexible; full protection and comfort for the foot.
- Anti static qualities of the midsole remain intact.

### TPU Stabilizer

Innovative external TPU torsion stabilizing shank and multi directional slip resistant tread design.

### BICKZ FOOTWEAR TECHNOLOGY

1. Composite (non metal) safety toe cap approved to Australian Standards AS/NZS 2210.3.
2. Penetration resistant midsole.
3. Comfort PU footbed insole.
4. Breathable moisture absorbing linings.
5. Premium leather uppers.
6. Padded collar.
7. Padded tongue.
8. Cushioned phylon midsole.
9. Durable heat, abrasion, oil and acid resistant rubber outsole.
10. External TPU torsion stabilizing shank.
11. Anti-static.

### Bickz 901

**HEROES**

HEROES provide outstanding comfort for the longest of working days. Dual density soles, tri-density PU insoles, and thick poron inserts provide incredible cushioning under foot, even in the harshest terrain. Add to this padded collars and tongues, breathable linings, spacious steel toe caps and a generous comfort fitting and you have a great all round environment for your feet to work in. Functionality is enhanced in every step through well designed flex grooves in the sole and pre-formed curving at the toe.

Secondly, and as importantly, HEROES are built to deal with tough working environments. The rubber nitrile outsoles are heat, oil and acid resistant and every pair of HEROES features an external TPU bump cap to further protect and also further extend the life span and durability of your boots. The unique torsion stabilizer provides excellent surety under foot and helps reduce the risk of ankle roll.

**FEATURES & BENEFITS BOOT**

1. Poron® high impact heel insert.
2. Torsion tech stabilizer.
3. Type 1 steel toe.
4. TRI density PU/Foam comfort insole.
5. TPU external scuff cap.
6. Full grain leather uppers.
7. Reinforced eyelets.
8. Multi directional slip resistant sole.
9. Breathable lining.
10. Latex toe cap liner.
11. Rubber outsole – oil acid & heat resistant to 300c.
12. Padded Collar.

**FEATURES & BENEFITS SOLE**

1. Larger profile blocks for enhanced slip resistance.
2. Flex grooves in forefoot increase flexibility and minimize fatigue.
3. External torsion tech for stability.
4. Flex grooves / tunnel in heel design to absorb shock.
5. Grip at the heel on and grip at the toe off.
6. Durable rubber outsole - oil, acid and heat resistance 300c.
7. Multi directional slip resistant sole.

# CHAMPIONS

## CHAMPIONS COLLECTION

Have there ever been boots more suited to the mining industry than Champions? Packed with features and benefits Champions are the ultimate in protective footwear for mining and associated industries. The latest technologies and materials have been incorporated to ensure maximum protection and comfort.

Fire Champion is similarly designed to provide the ultimate in foot protection for fire and emergency service professionals.

Champions feature revolutionary impact absorbing D30® material for advanced metatarsal protection. Steel toe caps, composite penetration resistant midsoles, and technically developed Helcor® material complete the protective barrier around your feet. Under foot surety is endorsed through durable heat oil and acid resistant Vibram® soles that are exclusive to Bata Industrials.

Importantly Gore-Tex® waterproof linings provide climate control and keep your feet dry whilst tri-density PU/foam insoles ensure cushioning under foot, maximizing comfort levels day in, day out.

### CHAMPIONS FEATURES & BENEFITS

1. D30 impact absorbing metatarsal protection.
2. Gore Tex® breathable & fully waterproof lining.
3. Composite penetration resistant midsole.
4. Durable Vibram® rubber outsole with cushioned PU core.
5. Multi directional slip resistant sole – oil acid and heat resistant to 300c.
6. Helcor® highly protective mudguard toe and heel.
7. Tupte 1 steel toe.
8. Reinforced eyelets.
9. Full grain leather uppers. (Shield - Caustic resistant)
10. Tri density PU/Foam comfort insole.
11. Latex toe cap liner.
12. High visibility reflective inserts.
13. Caustic resistant stitching.

### Fire Champion 724 66938

- COLOUR Black full grain leather.
- FEATURES Fire retardant leather, stitching & laces. Gore-Tex® waterproof lining. Steel toe cap. Vibram® rubber sole (fire resistant 300°) Flexguard® penetration resistant midsole. AS/NZS 4821:2006 Fire standards compliant.
- SIZING Sizes 6-13. Half sizes 6½ - 10½.
- FEATURES Selection Guide: BDEFGHLM

### Minemaster 704 66301

- COLOUR Black full grain leather.
- FEATURES Gore-Tex® waterproof lining. Helcor protective mud guard. D30® metatarsal protection. Steel toe cap.
- SIZING Sizes 6-13. Half size 9½.
- FEATURES Selection Guide: BDEFGHLM

### Shield 704 66302

- COLOUR Black full grain leather. (Caustic resistant)
- FEATURES Gore-Tex® waterproof lining. Helcor protective mud guard. D30® metatarsal protection. Steel toe cap.
- SIZING Sizes 6-13. Half sizes 6½ - 10½.
- FEATURES Selection Guide: BDEFGHJLM

### ONE SPARK IS ENOUGH...

The abbreviation ESD stands for ElectroStatic Discharge. Bata Industrials ESD shoes prevent or at least limit electrostatic charging, and ensure that any charges generated are diverted in a controlled manner.

## BATA UTILITY GUMBOOTS

Bata Utility gumboots are synonymous with Australian industry and are widely used across a variety of applications.

The Utility design is a favourite in the workplace. It is reinforced at the heel, ankle and shin and is both durable and flexible. Channeling in the sole allows for improved liquid dispersal and slip resistance.

Utility gumboots are fully lined and have kick off lugs at the heel, making them easy to slip in and out of. Utility gumboots are available in non safety, safety toe, and safety toe and midsole specifications.

## JOBMASTER 2 GUMBOOTS

Our Jobmaster II gumboots are used widely throughout food processing and associated industries. With a specification well suited to fisheries, meat and poultry processing, Jobmaster II gumboots are made from PVC that has been specifically formulated for the correct work application. Fully lined and with reinforced uppers and a slip resistant sole design Jobmaster II gumboots provide great comfort for the longest of shifts.

Size 15 options that are manufactured by our sister company in New Zealand are also stocked in our Mornington Victoria warehouse and meet Australian standards and the same specification requirements required by food processing industries.

## NEW IMPROVED JOBMASTER III

Synonymous with Australian industry Jobmaster gumboots have been relied upon for decades. From farmer to miner, from construction crew to fire crew, Jobmasters have built a solid, performance based reputation in the toughest environments.

Proudly Australian made Jobmaster III takes that performance to a new level. Along with a new refreshing aesthetic, new levels of comfort are provided through enhanced fitting in the foot, toe and calf, and under foot through cushioned dual density Polyou insoles.

With a revolutionary new sole design that is durable and oil & acid resistant Jobmaster III provides surety under foot and excellent multi directional slip resistance. Comfortable for the longest shifts, Jobmaster III is destined to become a firm favourite across Australian industry, just like its hard working and hard wearing predecessors.

### JOBMASTER III FEATURES & BENEFITS

1. Wide comfortable fitting.
2. Broad "Natural" toe design.
3. Wide soft leg for comfort.
4. Cushioned Polyou comfort insole.
5. Reinforced protective density at the shin and metatarsal.
