**Authorised
Food Data**
S y s t e m ®

The Australian Food and Grocery Council's (AFGC) Product Information Form (PIF™) is a food industry tool used by companies across Australia and New Zealand to provide a wide variety of information about food products and ingredients, in a single document that meets the information needs for legal and regulatory compliance.

The move to an electronic PIF streamlines the process of recording, reporting and sharing product information, making it much easier to use. The Bizcaps PIF Manager™ streamlines the process of sending and receiving PIFs, searching for data held in PIFs, updating PIFs and keeping track of current, draft and archived PIFs and the associated approval processes.

Imagine being able to manage, find and search all of your PIFs in a single place – anywhere – anytime.

Bizcaps PIF Manager™ is a secure web-based portal where you can easily manage the setup, storage, search, receipt and sharing of ePIFs directly with your customers and suppliers.

"The AFGC is delighted to welcome Bizcaps as its first partner to deliver solutions to the food industry that incorporate the AFGC's Electronic Food Data System, and I look forward to a productive relationship as we continue to develop new and innovative ways of making food data more transparent and accessible."

Chris Preston
Director of Legal and Regulatory
Australian Food & Grocery Council

Bizcaps
SOFTWARE

As the first PIF v6.0 portal solution incorporating the AFGC's Electronic Food Data System, PIF Manager™ supports food suppliers and their customers across Australia and New Zealand.

PIF Manager™ is built on our FlowScribe master data management platform and ships with pre-built integration using AFGC PIF XML messaging standards.

No matter how many PIFs you deal with, PIF Manager™ can be used for finished products as well as ingredients.

PIF MANAGER™ ALLOWS YOU TO:

- control the creation, collection, maintenance and exchange of PIFs in one place
- easily convert existing PIF v5 format into new online PIF v6
- save time by not having to manually retype default information
- find your PIFs faster with powerful online searching
- search on every field held in your PIFs
- keep a record of all changes made to each PIF
- manage the archiving of old PIFs and keep an audit trail of changes
- comply with the revised ANZ Food Standards code
- establish traceability of goods and their components across the supply chain
- improve product specification information accuracy and enhanced customer experience
- approve, accept and reject PIFs
- record where each PIF has been sent.

PIF MANAGER™ FEATURES:

- single portal for AFGC Authorised Food Data System i.e. PIFs, FIFs and PaSS
- plug-in for FoodWorks nutrient analysis software
- ability to send and receive PIFs
- multi-language capability
- store relevant forms e.g. HACCP with your PIF
- control who has access to search your PIF Manager database and who is authorised to make changes
- secure cloud based solution requiring no IT infrastructure or resourcing.

WHY CHOOSE BIZCAPS?

Bizcaps Software provides tools and services to help organisations collect, maintain and exchange the product data that underpins their business.

Our software products are designed, deployed and fully supported as standards based, configurable cloud solutions across various sectors including Grocery, Foodservice, Food, Beverage, Healthcare, Pharmacy, Government and Office Products.

We work with many of the world's leading organisations using information technology to maintain and synchronise product data between trading partners, helping to streamline business process management and the efficient automation of complex business processes.

Our customer community includes suppliers (data publishers of product & components, manufacturers, distributors, wholesalers) as well as their customers (data recipients, buyers) and government agencies.

Our solutions are built on global standards and regulations. Bizcaps solutions are certified by the Australian Food and Grocery Council, GS1 Australia, GS1 New Zealand and GS1 UK for correctly and consistently implementing the GS1 data synchronisation standards and associated best practices.

In June 2017 the AFGC announced Bizcaps as the first PIF™ v6.0 solution provider, with PIF Manager™ developed – and ready for use – by the food industry.
