CUSTOMISED COMPRESSION GARMENTS & SPLINTS

## Excellence in compression garments

Second Skin specialises in custom-made compression garments for clients with burns, trauma, lymphoedema, hernias and a broad range of other medical conditions.

Our team can incorporate many different design features to help solve common client concerns and ensure excellent fit. We can prescribe:

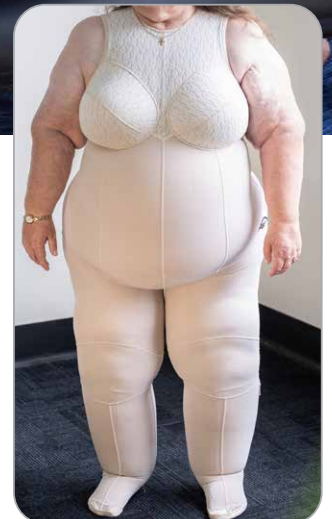

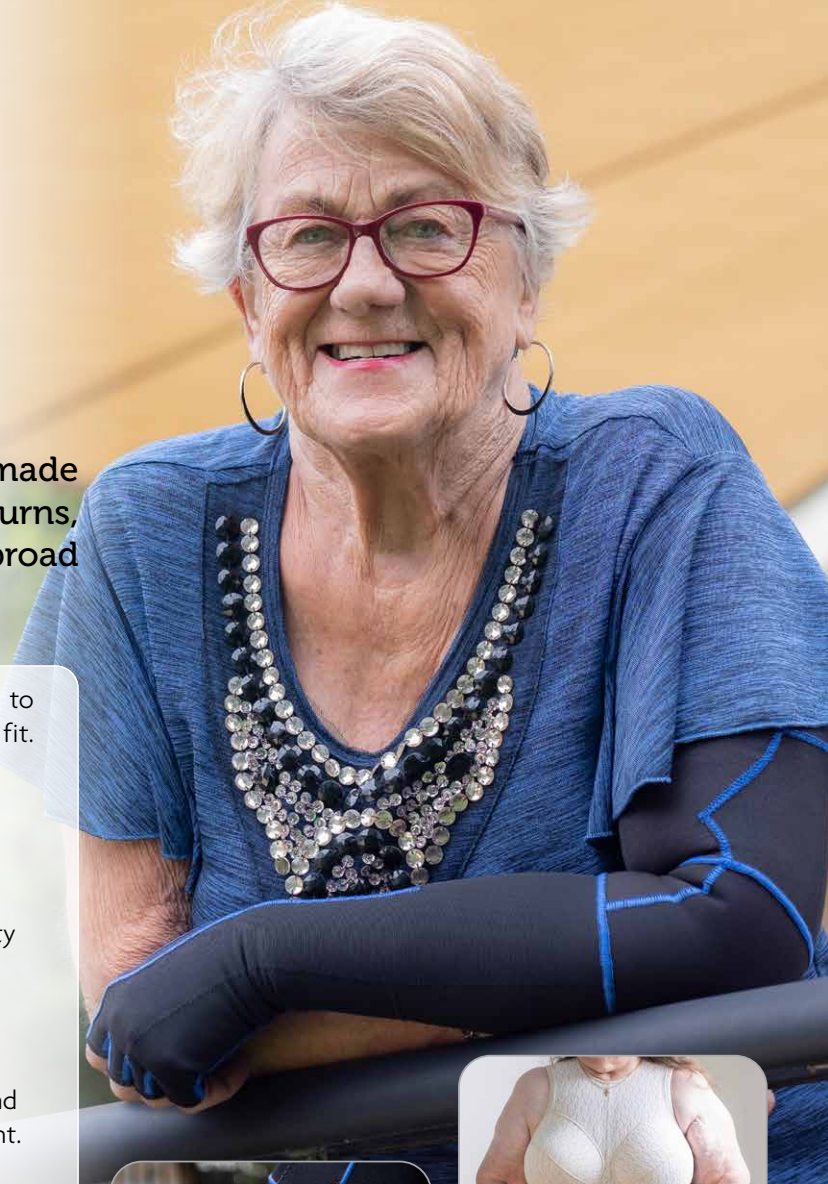

- zippers, assist tabs and loopers for ease of application
- shaping to ensure good contact with the limb
- reinforcing for areas of persistent oedema
- hydrophobic fabric lining for management of skin fragility
- leather soles or palms for anti-slip
- re-tensioning in response to changes in limb or body shape and/or size

Our range of fabrics can provide low to high compression and moisture wicking properties to assist with heat management. Garments come in a range of colours and stitching options to make them attractive to wear.

Second Skin will collaborate with you to find innovative solutions to the medical or clinical challenges presented.

## Whole Body Garment

Second Skin manufactures All-In-One compression garments for burns and traumatic injuries and for chronic oedema management where required. A Vest and Tights, or Vest and Panty Girdle combination, can be designed in an All-In-One style. We offer a full range of design options with short and/or long sleeve and leg lengths as required.

All-In-One garments ensure wearer comfort and clinical effectiveness by anchoring the garments in place throughout the client's full daily routine.

## Hand & Upper Limb Garments

Second Skin manufacture custom made upper limb compression garments for burns and traumatic injuries, lymphoedema, chronic pain, amputation, flap and oedema management.

Design options for Armsleeves and Tailored Armsleeves garments include with or without shoulder cap, male and female strap designs, and attached or detached hand components.

Design options for hand garments include full Gloves, MCP Gauntlet and Gauntlet styles and can be detached or attached to the armsleeve components.

## Lower Limb Garments

Second Skin manufacture custom-made tights, knee high or ankle high compression garments for burns and traumatic injuries, lymphoedema, venous insufficiency, toe or partial foot amputations, and oedema of the calf and foot.

Second Skin offers a full range of design options for these garments including toe options, leather sole, zippered access.
