## DIY or professional install

We'll deliver your Aussie made shutters direct to you. You install your shutters using our easy online guides, or we can professionally install them for you.

“ We custom make your PolyLux® shutters in 7 days. ”

## How many fits are available for PolyLux® shutters?

Learn about our fabulous PolyLux® shutter fit options, and get help picking your perfect fit.

### Recess fit shutters

Recess fit shutters are the gold standard of shutter fits. They are perfect if you have a 65 mm deep window recess and minimal obstructions, so your louvers can rotate to maximise your privacy, views and natural light. Our PolyLux® shutters fit seamlessly inside your window frame or recess, and look utterly timeless. In period homes choose a recess fit to celebrate your beautiful architraves, and let their ornate details shine.

### Face fit shutters

Face fit shutters are a fantastic option for achieving the classic look of shutters, if you don't have 65 mm of depth inside your window reveal or if you have obstructions. Our PolyLux® shutter frames are made to the exact measurements of your existing window frame, and sit neatly over the top of it. They project up to 65 mm into your room. Face fit shutters are extremely versatile, and can be attached to wall studs, brick, stone, tiles and concrete with the appropriate plugs, anchors or screws.

Recess fit

Face fit

### Direct mount shutters

Direct mount shutters are ideal for small and narrow windows to maximise natural light. When mounted directly our PolyLux® shutters have no shutter frame. Your shutter panels attach onto the inside of your window frame or recess. Enjoy the light blocking benefits of direct mount shutters by installing made-to-measure light blocks behind your panels, to darken and thermally insulate your home when required.

“ Get a quick price online. Our PolyLux® shutters are great value and premium quality. ”

“ Our PolyLux® shutters are made in Australia within 7 days. We offer a 20 year warranty for every order. ”

## What is the best PolyLux® shutter frame for my windows?

Our PolyLux® shutter frame range is incredibly versatile. We're confident we have a frame option that is perfect for your windows. Read on to learn about each frame.

### Small L frame

Recommended for recess fit shutters. Our small L frame has slimline designer appeal, and sits discreetly inside your window recess. Despite its small profile it can hold the weight of large shutter panels, and its clean lines complement both modern and period homes. The small L frame can also be used in some instances for a face fit, to minimise how far your shutters project into your room. For a face fit you need 20 mm of clearance inside your recess and minimal obstructions.

### Medium L frame

Recommended for face fit shutters. Our medium L frame is a face fit's best friend. It sits neatly over your existing window frame or walls. It has a deeper profile, meaning your smooth-operating louvers don't need any clearance inside your window recess. Due to its slim width, your magnificent PolyLux® shutter panels and louvers can take centre stage as the aesthetic heroes.

### Z frame

Recommended for recess fit shutters in out-of-square windows. Our Z frame is designed especially to hide any imperfections in out-of-square windows. It looks incredible juxtaposed with exposed brick and stone walls. It blocks any gaps of light around the frame, thanks to the subtle curved lip that overlaps onto your window frame or walls. The Z frame hides gaps of up to 10 mm between your PolyLux® shutter frame and your uneven window. For window sills, choose our Z frame with sill option.

### Full frame versus 3-sided frame

Full frames are super versatile and can be combined with any PolyLux® shutter frame and fit. Our 3-sided shutter frames work wonders for recess fit shutters, if you have a window sill or minor obstruction right at the bottom of your window.

## Do you make PolyLux® shutters for corner, box and bay windows?

Yes, and they look fabulous! Our PolyLux® shutters add elegance to corner, box and bay windows. Call us to order PolyLux® shutters for windows with 45 and 90 degree angles, or to chat about our bespoke solutions.

### Corner windows

Channel designer vibes with premium PolyLux® shutters that are custom made to fit beautifully into corner windows. The louvers are the aesthetic hero of your shutters and create an arresting linear pattern in your corner windows, while giving you total light control and connection to the outdoors. Customise every aspect of your corner window shutters. We'll supply made-to-measure 90 degree corner posts that form part of your sleek shutter frame.

“ Your shutter louvers can be rotated 180° in either direction for privacy, views and complete light control. ”

### Box and bay windows

Words can't do justice to the breathtaking look of box and bay window plantation shutters. They scream sophistication, and look timeless in any home. Our 45 and 90 degree corner posts can be installed in combination with recess or face fit shutters. Celebrate your beautiful windows and customise every last detail of your PolyLux® shutters for a bespoke designer look. Choose from our range of incredible panel layouts to match your box or bay window frames and mullions, so that your shutters are as functional as they are jaw-dropping.

### Need help measuring?

Call us and our professional team can come out to measure up for you.

“ To maximise your connection to the outdoors and enjoy unobstructed views, design your shutters to line up with your window frames and mullions. Choose fewer panels to gain more natural light. ”

## Can I install PolyLux® shutters in wet areas?

Absolutely! PolyLux® shutters are Aussie made using premium, water-resistant and highly durable materials. They are ideal for wet areas such as kitchens, bathrooms and laundries.

### PolyLux® shutters are incredibly durable

Our PolyLux® shutters can withstand humidity, heat and sunlight, making them the perfect choice for bathrooms, laundries and kitchens. If exposed to water, your shutters won't lose their classic beauty. All PolyLux® shutters have a 20 year warranty, so you can be sure you're buying a high quality product. Install shutters in bathrooms and powder rooms to enjoy complete privacy by angling your shutter louvers to let light in, while ensuring no one can see into your home.

“ PolyLux® shutters are washable and totally water-resistant. They can be installed right next to a shower. ”

Choose your free PolyLux® shutter samples and have them express posted to your doorstep.

### PolyLux® shutters are easy to maintain

PolyLux® shutters are incredibly popular and practical for kitchens. There's no need to worry about damaging your window furnishings with cooking odours or the occasional spillage. Our PolyLux® shutters are super easy to clean. Use a damp cloth to gently wipe your louvers, and open your shutter panels to easily clean behind your shutters.

“ PolyLux® shutters are guaranteed to never fade, bleach, peel, or blister. They are made to withstand the harsh Aussie sun. ”

Check out our Instagram for incredible projects featuring curtains and shutters.

“ Our PolyLux® shutters are certified VOC free, meaning no nasty chemicals in your home. ”

## What are the benefits of combining PolyLux® shutters with designer curtains?

Layer designer curtains over your plantation shutters to add luxe texture, drama and softness in your home.

### Layer sheers over shutters for luxe texture

Sheer curtains diffuse sunlight, add texture and provide fantastic daytime privacy. Floor-to-ceiling sheers make your space appear larger and grander. Leave your sheers closed during the day to create a luxe designer look and bathe your room in filtered light. The classic horizontal lines of shutters juxtaposed with the soft vertical folds of your sheers is captivating.

### Layer blockouts over shutters for total light control and thermal insulation

Blockouts and lined curtains completely darken your room, reduce outside noise and provide excellent thermal insulation in addition to your shutters. Lined curtains combine a designer sheer with a blackout lining, and are loved by interior designers for their cosy, luxe feel and incredible functionality. In winter block draughts and stop heat escaping from your home, and in summer prevent the sun's rays from entering your home. Make an impact by combining designer curtains with timeless PolyLux® shutters.

“ We don't skimp on fabric. Our curtains have 2.2 metres of fabric for every metre of track, which makes them look so plush. ”

## 2/7 Kingsley by She Builds Interiors

She Builds Interiors founder Lisa loves to make a big impact in clients' homes through carefully considered interior design, build and styling. Her recent unit renovation is soothing with designer elements, and features custom PolyLux® shutters in every room. Plantation shutters add value to this designer home and help it appeal to a broad spectrum of buyers. DIY Blinds design consultants helped measure up and install the shutters, to help Lisa bring her incredible vision to life.

**Lisa chose:**

- Recess fit PolyLux® shutters

“ I like that all DIY Blinds products are made in Australia. I support local and Australian businesses whenever I can. ”

**Renovating or building?**  
Share your house plans with us! We'd love to help you design your window furnishings.

“ I've had a love affair with plantation shutters for a long time! PolyLux® shutters were the best choice space-wise and for ease of maintenance. Plus potential buyers absolutely adore them. ”

## Alma Road by Hunting for George

Lucy of Hunting for George excels at honouring period features while transforming spaces for smart modern living. PolyLux® shutters create a timeless and sophisticated vibe in her recently renovated home, while designer curtains add drama in the master bedroom. The combination of shutters and blockout curtains gives Lucy complete light control, excellent thermal insulation and total privacy, without obstructing her views during the day. Sit back, relax and let her beautiful home with its neutral tones, gorgeous pops of colour and sophisticated design details wash over you.

### Lucy chose:

- Bay window PolyLux® shutters combined with designer blockout curtains for the master bedroom
- Face fit PolyLux® shutters for the kitchen

“ Designer curtains + plantation shutters equals sophisticated bedroom bliss. ”

“ Updating your window furnishings can instantly change the look and feel of your space. ”

## Art deco apartment by Hunting for George

Lucy of Hunting for George updated this delightful art deco apartment in Melbourne. The Armadale apartment block is a favourite with locals. It was designed in the 1940s by Stuart Hall, and features Palm Springs-style landscaping and beautiful, curved architectural details. Inside the apartment Lucy chose PolyLux® shutters to complement the relaxed, modern-coastal vibe. In the bedrooms PolyLux® shutters provide complete light control. In the kitchen PolyLux® shutters are a durable and washable option, and can withstand splashes of water.

### Lucy chose:

- Face fit PolyLux® shutters in the master bedroom
- Recess fit PolyLux® shutters in bedroom two
- Direct mount PolyLux® shutters in the kitchen

PolyLux® shutters can be installed next to sinks, showers and baths. They are completely water-resistant.

“ PolyLux® shutters are my favourite thing about the kitchen. They completely elevate this space and add instant sophistication. ”

“ PolyLux® shutters go perfectly with our signature style: classic meets contemporary with a luxe vibe. ”

## Little Willow by Julia and Sasha

Little Willow is a revitalised gardener's cottage on Melbourne's historic Ripponlea estate. Talented design duo Julia and Sasha of the Abbey Collective create classic interiors with touches of glam. They chose designer window furnishings to suit the aesthetic and functional needs of each space. PolyLux® shutters celebrate the cottage's architectural heritage. They provide light control and privacy in the bedrooms and bathroom, and create a breathtaking focal point in the box window along with the plush bench seat.

### Julia and Sasha chose:

- Box window PolyLux® shutters for the living room
- Recess fit PolyLux® shutters for the living room, bedrooms and bathroom

## Canning Cottage 1 by Josh and Jenna

Jenna is a founder of Design School and a home style guru, whilst Josh is a highly skilled plumber by trade. Together this powerhouse couple has built two exquisite homes on the site of a quaint worker's cottage in North Melbourne. Canning Cottage 1 is the original and smaller of the two homes, and is now guest accommodation for lucky visitors. PolyLux® shutters transform this compact yet spacious-feeling home, let in plenty of natural light and offer excellent daytime and nighttime privacy for the street-facing rooms.

- Josh and Jenna chose:**
- Face fit PolyLux® shutters

“ Good communication is vital during a build and the DIY Blinds team is fantastic to deal with. ”

“ Talk to the DIY Blinds team early in your project. They visited us on-site to work out the best design solution for our shutters. ”

## Upper Hastings by Hong Henwood Design

This laidback designer home in Noosa is the holiday rental of our dreams, and was recently renovated by Hong Henwood Design. The modern coastal home takes inspiration from the Hamptons and tropical Singapore styles. PolyLux® shutters are the perfect choice of window furnishing and feature throughout. The shutter louvers can be angled to drench the space in natural light, or to block the intensity of the midday sun when needed. The shutters provide breathtaking views to the entertainer's deck, 12 metre pool and basketball half court.

### Hong chose:

- Face fit PolyLux® shutters

“ Our PolyLux® shutters withstand Noosa’s intense heat and UV rays without bleaching or blistering. ”

“ Custom window treatments, flooring and hand-selected furniture absolutely transform the spaces in this beautiful holiday home. ”
