# NEW OUTDOOR OVENS, NOW AVAILABLE!

After taking into account all the years we have been cooking with an "Outdoor Wood Fired Oven", on the road sharing our delicious "JAGR D Wood Fired Pizza", and seeing what was being offered to you, for use at home, we now bring to the market a stylish, strong, and practical "Out-door Oven", one that will be passed down from generation, to generation..!

Our first priority was to create plenty of cooking area in our Oven, in doing so we have accommodated for lots of entertaining, providing Two Cooking Levels, enabling 4 Large baking trays to be working for you at one time...

Placing Your Meat, or Fish, on the top shelf, will allow you to slow smoke your foods, with the Oven taking as little as 30mins to reach a temperature of 250 - 300 degrees, and one milk crate of wood giving you a cooking time of approximately 4hrs...

Coming with its own mobile trolley, (detachable if you wish to build it into an existing outdoor kitchen), makes relocating the Oven at any time a breeze, and the perfect opportunity to have it nice and close on those cold winter nights, taking full advantage of your "Open Fire", as a Patio Heater..!

Your "JAGR D Outdoor Oven" is so versatile; it can be used for baking your breads, cakes, roasting, pizzas, fish and so much more, the Only Limitation, will be Your Imagination!!

Wanting to keep things at Home, our materials are sourced here throughout Australia, making sure all materials are strong and trustworthy... This allowing us to Design an "Outdoor Oven" that suits couples, right through to entertaining a growing circle of family and friends, and you could be ready to feed the hungry hordes within the hour of receiving your Oven..!
