

Not all steel is created equal

Look for the BlueScope Steel brand on the steel to ensure the steel in your shed meets Australian Standards

Made by **BlueScope Steel**

What's different about steel made by BlueScope Steel?

Look for our brand. As required by the relevant Australian Standards, genuine ZINCALUME[®], COLORBOND[®] and GALVASPAN[®] steels are branded for easy identification. Look for our brand name on the back of your steel.

ZINCALUME[®] steel, COLORBOND[®] steel and GALVASPAN[®] steel are guaranteed to meet or exceed Australian Standards AS1397 and AS2728, ensuring compliance to the Building Code of Australia.

BlueScope Steel offers its customers nationwide, on-the-ground technical support and information to assist the selection, installation and maintenance of BlueScope Steel products used in sheds.

ZINCALUME[®] steel and COLORBOND[®] steel are backed by warranties* from BlueScope Steel. A local warranty from Australia's leading steel manufacturer.

ZINCALUME[®] steel and COLORBOND[®] steel have undergone testing for over 30 years in outdoor testing sites across Australia, facing a diverse range of our harshest climates.

BlueScope Steel products meet the requirements of the Australian Steel Institute 'Shedsafe[™]' initiative. For more information visit shedsafe.com.au

Steel that's made for Australian sheds

Tried and tested in Australia's harsh climate for over 30 years

1 Roofing, walling, roller doors and guttering made from COLORBOND® steel and ZINCALUME® steel

- For more than 30 years, ZINCALUME® steel and COLORBOND® steel have been tested and continually developed in Australia to withstand our harsh conditions.
- ZINCALUME® steel is protected by an alloy coating of zinc and aluminium to ensure outstanding corrosion resistance.
- Starting with a ZINCALUME® steel base, COLORBOND® steel has the added protection of an oven baked finish that resists cracking, flaking and peeling.
- COLORBOND® steel is available in a wide range of colours, allowing you to match your shed with other products around your home that are made from genuine COLORBOND® steel.
- To ensure you receive genuine ZINCALUME® steel and COLORBOND® steel, look for the BlueScope Steel brand – mark printed on the steel.

2 Framing components made from GALVSPAN® steel and ZINCALUME® steel

- GALVSPAN® steel is a special grade of high strength steel specifically developed by BlueScope Steel for purlins, which are typically used for the important structural components of your shed. High strength ZINCALUME® steel is also used for these components in certain shed designs.
- The zinc coating and quality controlled galvanising processes used by BlueScope Steel to make GALVSPAN® steel ensures a high standard of corrosion protection.
- To ensure you receive genuine GALVSPAN® steel and/or ZINCALUME® steel, look for the BlueScope Steel brand – mark printed on the steel.
