

# OUR LEGACY

A  
HEALTHY  
HAPPY *Life*

**killapilla**

THE HEALTHIEST PILLOW ON THE  
**PLANET**

WE WANT TO MAKE THE

A HEALTHIER PLACE

*Chiropractic.*

It is our life. It is how we do life. Everyday we walk into our practice with the intention of growing the health of our planet, one adjustment at a time. This is our daily contribution to our community and our family.

*The Killapilla.*

As chiropractors, people trust us to give them safe and healthy recommendations to build and grow their health. Diet, exercise, and even asking about pillows. But the reality is that we didn't feel comfortable selling the

therapeutic pillows that we carried in our practice. They were synthetic and placed the head in forward head posture during sleep.

We looked for alternatives, but there were none.

So we decided to design and develop a spinally correct pillow made from all natural and organic materials.

A pillow that would be safe for us to use in our own family and to confidently recommend within our practice.

# ALL NATURAL AND ORGANIC MATERIALS

COVER: GOTS Certified Organic  
Cotton Fabric

FILL: Certified Oeko-Tex 100  
Australian Wool

*What does this mean for  
you?*

Our cotton comes from small family farms in India. The farmers are happy and healthy because they aren't forced to use deadly chemicals to grow their crops. Their land and water sources are not contaminated with pesticides. They use natural chemical free methods. They are treated with dignity and respect and they are paid fairly.

That means that you can get that warm and fuzzy feeling knowing that the Killapilla is a healthy option for you, your practice, and the planet.

# ORGANIC COTTON

## DID YOU KNOW...

\*Conventionally grown cotton uses 11-12% of global pesticides.

\*30 million farmers grow cotton.

\*Approx 210,000 people DIE every year from agrochemical poisoning (according to W.H.O.)

\*Organic cotton makes up less than 1% of global cotton.

\*Most of the hazardous chemicals used in conventionally grown cotton have been banned in 1st world countries.

\*43% of global cotton is GMO...meaning it is genetically modified.

# OUR PILLOWS ARE FILLED WITH ALL NATURAL AUSTRALIAN WOOL

Most other pillows are filled with or made from synthetic man-made materials that cause serious health problems and contribute to polluting the planet.

They are made from petrochemicals that out-gas VOC's. Volatile Organic Compounds. Exposure to VOCs is harmful. They are neurotoxic, endocrine disruptors, and carcinogens. There was NO WAY were we going to use that in our pillow!

Our choice had to be natural.

Well, since we live in Australia, the natural choice was to use Australian wool.

Our wool is Certified Oeko-Tex 100, Product Class 1.

What does this mean?

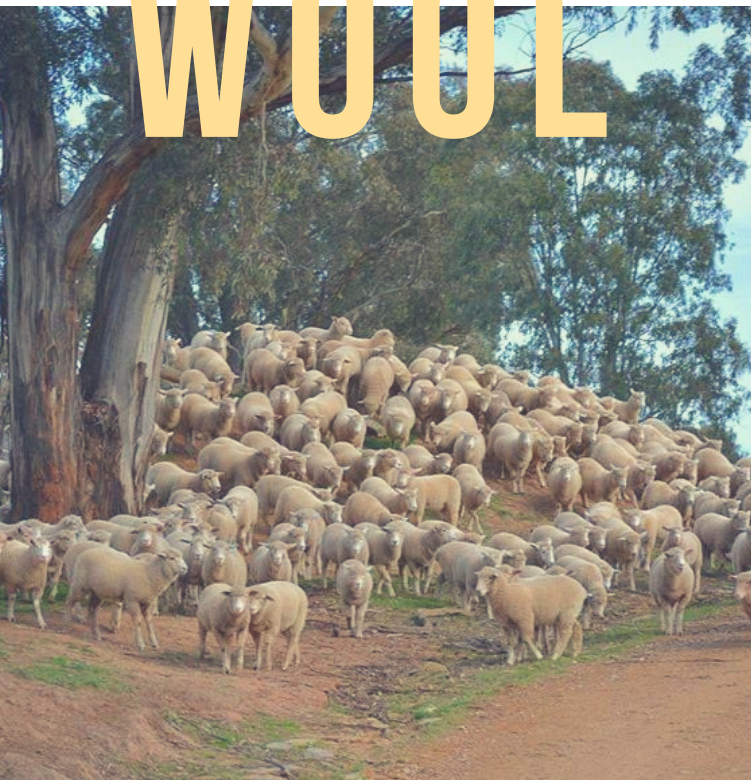

That no harmful chemicals have been used in the processing of our wool. It is graded baby safe.

## DID YOU KNOW...

### Amazing NATURAL properties of Wool

- \* Natural
- \* Biodegradable
- \* Sustainable
- \* Renewable
- \* Soft
- \* Anti-Bacterial
- \* Warm in Winter
- \* Cool in the hottest Summer
- \* Static Resistant
- \* Odour Resistant
- \* Fire Resistant
- \* Water Repellant
- \* Non-Allergenic
- \* Resistant to Dust Mites
- \* Resistant to Mould and Mildew
- \* Excellent for Allergy Sufferers
- \* Proven to Steady Heart Rate
- \* Allows for a Deeper Sleep

# WOOL

## MADE IN AUSTRALIA

Supporting local business and industry is a priority for us.

When looking at manufacturing options, we knew that we had to have our pillows made right here in Australia.

We are proud that our Killapilla factory is located right here in our hometown of Gympie, Queensland.

Each Killapilla is skillfully sewn and gently hand stuffed by local craftsmen and women who earn REAL wages.

They are happy because they are doing what they enjoy...creating.

### PLASTIC FREE PACKAGING

Our retail packaging is plastic free.

We don't use plastic bags or plastic coating on our boxes.

All of our packaging can be recycled, reused, or repurposed.

Because we care.
