THE WYNSTAN WAY

Wynstan has proudly been supplying Aussie homes with Blinds, Doors, Shutters and Awnings for over 50 years. We pride ourselves on our large range, quality craftsmanship, friendly service and expert advice. Our process is easy, with just 4 simple steps to your custom-made products.

1

FREE Measure, Quote and Design Consultation

Book your free in-home consultation by calling your local Wynstan showroom on **1300 667 679**, or by visiting **wynstan.com.au**. If you need more inspiration (and expert advice), visit your local showroom to see our products in real life.

2

Friendly Service

A Wynstan sales consultant will visit you for a free measure and quote. Your consultant will show you product samples and swatches to select from, all within the comfort of your own home.

3

Quality Custom-Made Manufacture

Our products are custom-made to your specifications in our leading-edge manufacturing facility in Yennora NSW, using quality materials and workmanship. Wynstan products are built to last, backed by our 3 year warranty, providing peace of mind and ensuring that you will enjoy them for years to come.

4

FREE Expert Installation

At a time that is convenient for you, an expert member of our Installation Team will install your chosen product. Then all you need to do is enjoy your fabulous new Wynstan purchase.

YOUR GATEWAY TO THE WYNSTAN FAMILY

Wynstan has 30 showrooms throughout NSW and Victoria, so be sure to drop in and meet our friendly consultants!

THE WYNSTAN HISTORY

Charles Turner

Charles & Bruce create the first security door ever made, it was a huge success!

The first pink Wynstan Showroom opens in Smithfield.

Bruce's children are working within the business. Wynstan launches its famous 'Wynstan with a Y' radio ad.

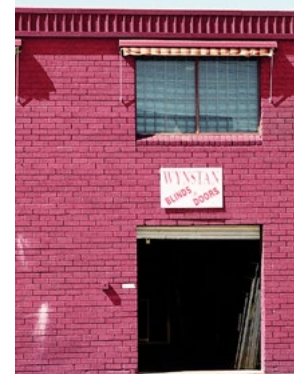

1968 — 1986 — 1990 — 1991 — 1998 — 2006

Charles & Bruce Turner start a business producing burglar and alarm systems

Charles & Bruce purchase a company called Wynstan. Bruce likes the slightly posh sound of the name and 'Wyn' also happens to be the nickname of his beloved paternal grandma Wynafryd which he takes as a good omen! So much so, they decide in a historic move to rename themselves Wynstan.

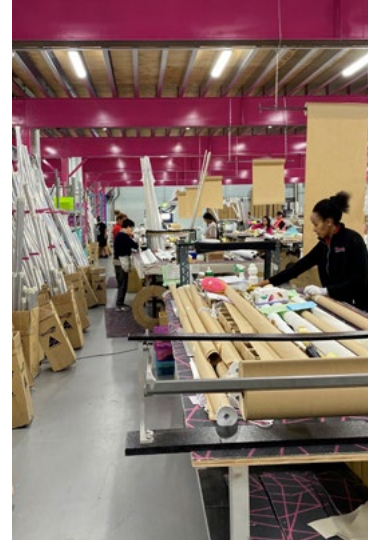

Andrew Turner Rebecca Burns
Bruce Turner

Mr Wynstan the mascot is born! Decked out in a morning suit and pink tie, with red hair - which Bruce insisted on, in reference to the hair colour sported by himself and his kids.

As Australia gets fit & fabulous, Mr Wynstan gets a makeover and a more slimline appearance. Bruce now says Mr Wynstan represents “a more fabulous version of himself”.

Wynstan goes international and hits the USA, with 3 showrooms opening across California.

53 Years Young

Wynstan now employs over 450 staff and contractors throughout NSW and Victoria and is one of Australia's most successful family owned and operated businesses. Wynstan's traditions, values and sense of fun have created a special culture - a blend of passion, creativity, celebrating achievements and taking pride in a job well done.

2009

2012

2015

2017

TODAY

Wynstan expands into Victoria - first Victoria showroom in Airport West. Now with 7 showrooms.

Wynstan has grown so much, a move to a new factory is needed to ensure Wynstan stays an Australian Manufacturer and supports Australian Made.

SPONSORSHIP AND COMMUNITY

**OVARIAN
CANCER
AUSTRALIA**

This cause is one close to the heart of our family run business. Wynstan matriarch Margaret Turner, wife to CEO & Founder Bruce, passed away from ovarian cancer in 1994, leaving her husband and children devastated.

We have partnered with OCA to increase awareness of this illness and to support a charity that offers financial assistance to women suffering with ovarian cancer, as well as continue research for the disease. We are proud to say that we have managed to raise over \$800,000 since our partnership began.

Unfortunately, there are no early detection tests for ovarian cancer, so all women need to be aware of the symptoms. These include

unexplained fatigue, unexplained weight gain or loss, changes in bowel habits, bloating, abdominal pain and persistent feeling of fullness.

If you experience any of the above symptoms for longer than three weeks, please contact the OCA hotline on **1300 660 334**. Our sole aim is to help change, so that others don't have to share the same fate as the Wynstan family.

Bruce and Margaret Turner

Crime Stoppers is Australia's most trusted information receiving service for people wanting to share what they know about unsolved crimes and/or suspicious activity. As home security is of paramount importance to Wynstan, we're thrilled to be partnering with such an esteemed community policing resource.

For more than 50 years, Wynstan has been dedicated to providing households with high-quality Security Door and Window Grille solutions as well as Blinds, Shutters and Awnings. Wynstan started off in 1968 supplying Security Doors and safes, so it's really been the cornerstone of our business.

Through Crime Stoppers, people can provide information anonymously and in complete confidence, about unsolved crimes, people wanted by Police, crimes being planned or suspicious or unusual activity.

If you need to make a report, contact Crime Stoppers on **1800 333 000** or **nsw.crimestoppers.com.au**

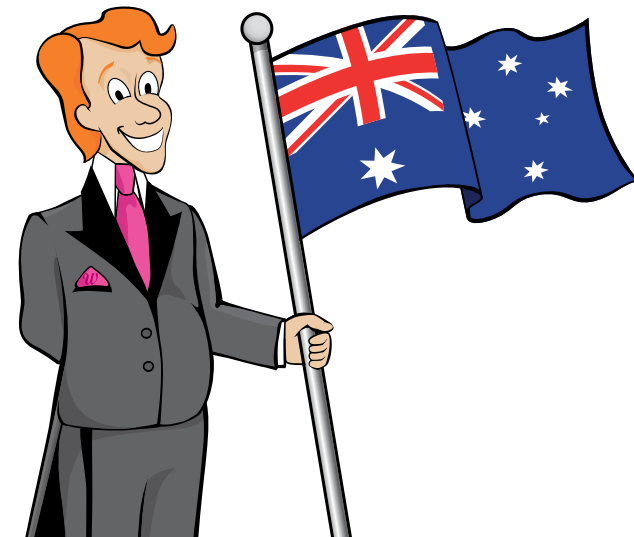

AUSTRALIAN MADE

For **over 50 years** we have been manufacturing in **Australia**, creating Aussie jobs. Our products are proudly Australian made.

Today, Wynstan employs over 450 staff and contractors, including core members of the Turner family who founded the company, and still own it today!

We manufacture our products under one roof in Yennora NSW. The Wynstan factory is over 22,000sqm's which supports our 34 Showrooms across New South Wales, Victoria and California USA.

BLINDS & CURTAINS

Beautifully streamlined and super stylish, Wynstan's range of blinds covers all tastes, styles and budgets – and all are made with the same care and attention.

- Roller Blinds
- Roman Blinds
- Vision Blinds
- Curtains
- Vertical Blinds
- Veri Shades®
- Panel Glides
- Venetian Blinds
- Whisper Sheer Shades
- Whisper Cellular Shades

OPACITY

Light Control

The most important factor for many people when selecting blinds, is light control. A good blind will block or filter the light perfectly according to the style and purpose of the room. At Wynstan we have three opacity options when it comes to selecting blind fabrics. Here's a guide so you choose the one for you:

Blockout

Blockout fabrics are perfect for privacy and complete light control. This type of fabric allows you to entirely blockout the outside light, as well as providing total privacy. They are best suited to rooms where complete light screening is top priority, such as a bedroom or media room.

Translucent

This type of fabric softens harsh light, while providing daytime privacy. Translucent fabric allows natural illumination, creating a beautiful ambience. This fabric is perfect for kitchens and family rooms.

Sheer/Sunscreen

Sheer fabrics allow light to be diffused, while allowing you to enjoy the view. This is designed to stop glare but allow light in, where visibility is important.

Blockout

FABRIC SAMPLES

Looking for new blinds? Plan it, touch it, do it! Take advantage of our free sample offer, and explore our fabric range from the comfort of your own home. Simply order online and we will deliver 5 swatches to you for FREE!

This allows you to observe your swatches in different lights, match with the colour theme or style of your room, at a time that suits you. Our fabric samples cover sheer, translucent, blackout, prints and patterned fabrics. These can be used for all Roller Blinds, Roman Blinds, Panel Glides and Vertical Blinds.

'Y' not order your FREE samples today, it's easy!

- 1** Go to wynstan.com.au/product-category/fabric-samples
- 2** Select up to 5 free samples (additional samples can be purchased for \$1 per sample)
- 3** Enter your details, and your samples will be delivered to your door free of charge

ROLLER BLINDS

Create a sleek, modern look with a fashionable Roller Blind. Roller Blinds are neat and discreet when pulled up, and stylish when down.

Wynstan offers an extensive range of quality fabrics in a number of colours, patterns and textures to suit Roller Blinds. Blockout fabrics are great for bedrooms while sheer and translucent fabrics are ideally suited to living areas.

We offer a variety of bottom rails and trims to top off your look. For a sleeker finish, we offer a stylish fascia, cassette or fabric wrapped pelmet.

Roller Blind operation is by chain control, and if you have large windows where multiple blinds are needed, we can link them together to enable operation by a single control. Roller Blinds can also be motorised for ultimate luxury and convenience.

Teresa

I have used Wynstan four times over the last 6 months, replacing existing blinds. Customer service is excellent, quality of blinds exceeded my expectations. Steve the installer for our area is excellent, professional and polite. Wouldn't hesitate to use them again.

**SPACE
INVADERS**

DOUBLE ROLLER BLINDS

The perfect solution if you want a dark room while you sleep, and let light in during the day, while still providing privacy.

The system involves positioning a blackout fabric on one roller in front of a sheer or translucent fabric on another roller, allowing you to adjust the blinds independent of each other.

This system allows versatility in controlling both light and privacy. You can also mix and match fabrics to create a unique look. Multiple Double Roller Blinds can also be linked together to allow operation by a single chain or be motorised for luxury and convenience.

Twice the control
over your
light & views

Blockout

Translucent

ROMAN BLINDS

These classic window coverings offer streamlined simplicity and understated style.

A sophisticated window covering – the tailored fabric folds of Roman Blinds provide discreet style, along with simple functionality. Favoured by interior designers, they offer privacy and sun protection without fussy detailing. We carry a variety of quality blackout, sheer and translucent fabrics in a wide range of colours, patterns and textures to suit all decors and styles.

We also manufacture Batten Blinds, which are Roman Blinds fitted with slim wooden strips along the horizontal joins of the fabric. These give character and texture and come in a range of colours to match any style.

Roman Blinds can be manually operated by cord or chain, or motorised for luxury and convenience.

Hayley

We were very lucky today to have Kris as our blind installer. He was not only very friendly but extremely knowledgeable in his field. We are extremely happy with his work and the blinds look GREAT!

VISION BLINDS

Vision Blinds add an elegant light diffusion of sheer fabric with the stylish practicality of a roller.

The front layer moves independently of the back layer, allowing the stripes to glide between each other and giving you more control over light and privacy. We offer a range of contemporary colours and fabric palettes of statement stripes, including dramatic metallic finishes, pretty sheers and natural woven effects.

Clean lines
and elegant
textures

CURTAINS

Elegant, on-trend and oh-so-beautiful, our range of custom Curtains will add a finishing touch to your home, no matter what your style.

Sheer
Curtain

Blockout
Roller Blind

Premium Track
in Champagne,
S-Wave

Soft, luxurious and layered, with over 100 fabric options, from blockouts to luminous sheers, and sumptuous textures, to suit all interior styles and budgets.

For private spaces, such as bedrooms, you can choose a blockout fabric for your Curtains, or pair a sheer Curtain with a blockout Roller Blind, for the ultimate combination of style and functionality.

VERTICAL BLINDS

A classic choice of window covering, Vertical Blinds are popular because they are practical and versatile.

Suitable for both windows and doors, they allow you to create consistency throughout your home. Vertical Blinds are available in three slat widths, and fabrics range from blackout to translucent. Wynstan's three-weight program allows you to choose between weights and chain, special weights or sewn in weights.

Tracks can be colour coordinated to match your chosen fabric and blinds can also be further customised with a fabric insert or fabric pelmet. Vertical Blinds can be operated by wand control or cord and chain control.

Art

5 stars for professionalism and customer service. Liz was so helpful and a blast to talk too. Shaun the installer gets two thumbs up for being an absolute professional, in and out in just a few hours. We love the new blinds. Thanks guys.

sliding doors

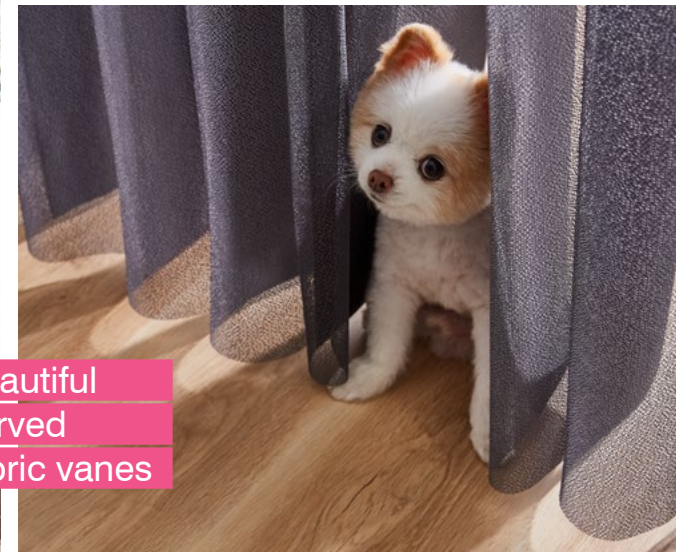

VERI SHADES®

These beautiful curved fabric vanes contain a unique patented design that has the elegance and functionality of a blind and the privacy of a curtain.

With the turn of a wand you can easily adjust the Veri Shades® to control and adjust light levels, depending on the position of the sun, or privacy required. Ideal for modern indoor-outdoor living spaces, you can walk through the individual fabric vanes whether they are opened or closed.

Beautiful
curved
fabric vanes

PANEL GLIDES

Inspired by Asian designs, with large panels and simplistic functions, Panel Glides give any space a sleek and contemporary look.

This is a system of panels attached to a carrier running along a discreet track, which allows for the optional addition of a fashionable pelmet. Panel Glides can also be used as stylish room dividers, making them a beautiful alternative to traditional partitioning systems. They can also cover large openings and come in our convenient wand control system.

Melanie

Nick's consultation was incredibly helpful, he was able to be flexible and brainstorm exactly what we were after. We are very happy in our choices, mostly because of his advice!

Real Living Magazine

VENETIAN BLINDS

Wynstan offers 4 options in our range:

- Timber
- Timber-look
- Aluminium
- Cedar

Venetian Blinds are designed to welcome in light, provide a high level of privacy and effectively moderate air flow. They are classically tasteful and provide freedom and functionality.

Timber Venetian Blinds are a popular option as they are easy to operate and maintain. The slats can be positioned in such a way that the light is let in and prying eyes are kept out. Options include lacquered cedar or painted basswood.

Timber-look provides the same look and feel as Timber Venetians, but are more tolerant to moisture, making them ideal for wet areas such as bathrooms, kitchens and laundries.

Aluminium Venetian Blinds are easy to use and with great light and privacy control, and are available in three different slat widths. Wynstan aluminium slats are made thicker than market standards to ensure extra durability and strength. Our extensive colour range includes pastels and vibrant metallic shades, suiting any decor or style.

All our Venetian blinds are operated by cord and wand, or can be motorised for added luxury and convenience.

WHISPER SHEER SHADES

These stylish Sheer Shades combine the best elements of blinds and curtains in one highly intelligent window covering.

Constructed with a series of tilting fabric vanes suspended between two layers of sheer fabric, Whisper Sheer Shades allow for control over the degree of light and privacy. When the vanes are open, they beautifully filter the light and almost disappear, allowing a clear view to the outside. When closed, the blind provides privacy, without completely darkening the space.

The sheer polyester fabric is luxurious and delicate in appearance, yet durable enough for everyday use. Its anti-static nature helps repel dirt and dust. The headrail can be colour coordinated to discreetly conceal the blind when fully raised.

Close-ups
of Whisper
Sheer Shades

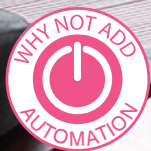

WHISPER CELLULAR SHADES

These advanced Cellular Shades feature a unique cellular structure resembling honeycomb.

A unique honeycomb structure saves energy by trapping air, making it easier to heat and cool your home

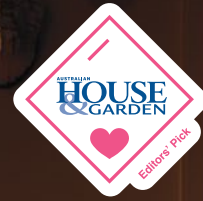

Air passing through the blinds gets trapped in the structure, which assists in noise reduction and energy efficiency. Whisper Cellular Shades can be customised for unique window shapes, including skylights. Their highly versatile bottom-up and top-down functions allow you to enjoy views while maintaining privacy. Whisper Shades are manufactured from a durable fabric, ideal for everyday use, yet fine enough to diffuse light into an ambient glow. The shades are operated manually by cord, or can be motorised.

CHILD SAFETY

Wynstan takes its child care safety responsibilities very seriously. We are a family business, we have children of our own, and child safety is paramount to us in the design of our products.

When blind cords are too long or end in a loop, children can quickly become entangled in the cord, potentially strangling the child. This is why we always fit a child safety device on every cord operated product. Alternatively you can motorise your blinds, and eliminate the cords all together. You may just need to hide the remote!

Stars glow
in the dark

KIDS COLLECTION

We have created a fun and unique fabric collection all for Kids. 'Y' not transform your kids' room to a wonderful escape where their imaginations can run wild!

Whether you're creating a dinosaur or woodland oasis, want something unisex for a new baby on the way, or a glow-in-the dark feature, we've got you covered. Our Kids Collection also includes various blackout fabrics to keep the daylight out when your little one needs to sleep.

AWNINGS

Essential for Australia's love of outdoor entertaining, awnings make alfresco spaces more comfortable and stylish by providing protection from the sun as well as added personality to exterior facades.

- Folding Arm Awnings
- Straight Drop Awnings
- Pivot Arm Awnings
- Automatic Awnings
- Eureka Conservatory Awnings
- Fixed Steel Awnings
- Canopy Awnings

FOLDING ARM AWNINGS

Extend your living space to the outdoors with one of our stunning Folding Arm Awnings.

A Folding Arm Awning can be manufactured up to 7.1m in width, which can cover large entertaining spaces. Streamlined and neat, Folding Arm Awnings mean that even when extended, people can walk beneath the awning without any obstructing posts. When retracted, the awning sits neatly against the wall.

A Folding Arm Awning can be manufactured in two different styles:

- **Semi Cassette:** ideal for placement under eaves and fitted with a factory adjusted pitch to provide maximum amount of shade. Can be operated by crank handle mechanism, or can be motorised.
- **Full Cassette:** which means that when retracted, the fabric and mechanism are fully encased in the cassette, protecting the awning from wind, sun and rain damage when closed. Motorised operation.

Semi Cassette - Closed

Full Cassette - Closed

Full Cassette - Opened

STRAIGHT DROP AWNINGS

A simple and stylish addition to the outside of your home, Straight Drop Awnings operate more like blinds, running perpendicular to the ground.

They can be created in a range of styles, each with different technical properties. For instance, the awning can utilise a hidden zip system, be guided along cables, or be loose at the sides and fasten at the base.

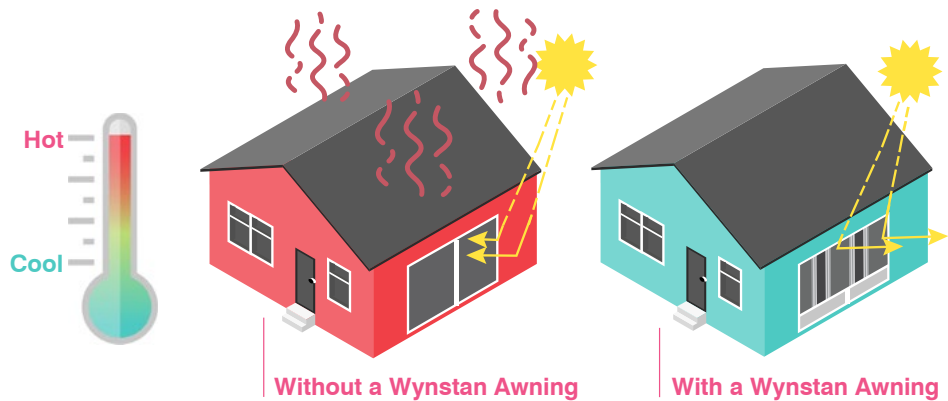

With many styles and a wide range available, Straight Drop Awnings are highly adaptable to your needs. Because they do not protrude, they are an ideal solution for the outside of windows that are next to fences or walkways. They are also an excellent solution for the sides of roofed decks, verandahs or patios.

A range of fabrics are available for Straight Drop Awnings, from colourful acrylic designs to canvas and clear PVC plastic.

Straight Drop Awnings
are a simple and stylish
addition to any home

Wynstan Straight Drop Awnings are proven to reduce cooling energy costs by up to 44%. Our Awnings have been independently tested & proven to significantly reduce cooling energy costs by keeping a standard* home at a consistent & comfortable temperature throughout the summer months.

*Results based on a single storey, brick veneer home on a concrete slab using ducted air-conditioning and equally distributed windows with Wynstan Awnings installed with Canvas fabric. Based on independent modelling conducted by White Box Technologies in conjunction with Peter Lyons & Associates June 2013.

PIVOT ARM AWNINGS

Classical in style, but modern in functionality, Pivot Arm Awnings operate on a pivoting arm, which moves in an arc as it extends and retracts.

This style of awning provides a larger space between the awning and the window, allowing for greater air circulation inside your home.

Pivot Arm Awnings are operated by crank control or via a rope or tape, which can be fed into your home, offering internal control, which is especially important on second storey or higher-level installations. They can also be motorised.

AUTOMATIC AWNINGS

Ideal for ground floor locations, Automatic Awnings can be installed close to the window in order to provide a high level of privacy and sun protection.

This style of installation is energy-efficient, reducing heat loss in winter and keeping your home cool in summer. It is perfect for exposed locations as it responds to strong winds by retracting to protect the fabric from weather damage. The awning can be manufactured up to 4m wide, allowing one blind to cover multiple windows.

Choose hoods from a wide range of colours, which add a sleek quality and protect the fabric from weather damage when not in use. The self-locking arms, which slide along guide rails, are simple to operate by hand or a pull stick.

EUREKA CONSERVATORY AWNINGS

These sleek and modern awnings are designed to be fitted on the outside of homes and commercial buildings, conservatory roofs, glass facades or windows.

This elegant roof shading system can be used as a retractable roof to cover outdoor entertaining areas.

Practicality wins here because the Eureka Conservatory Awning is motorised so you can adjust the amount of sun protection with the touch of a button.

David

Great Job by the Wynstan team. Peter the installer was amazing and really friendly. Even cleaned up after completing the job. Great Job and would highly recommend them.

FIXED STEEL AWNINGS

Tough, durable and economical, Fixed Steel Awnings are manufactured from tough COLORBOND® steel, providing your home with excellent protection from the rain and damaging UV rays.

These classic awnings can add great style and dimension to your home and are available in a combination of colours. Steel Awnings are fixed to the wall, but the degree of slope can be anywhere from 15 to 45 degrees. If you require a large awning, we recommend the use of support posts to further enhance stability.

CANOPY AWNINGS

Full of traditional charm, Canopy Awnings provide valuable cover and protection over windows and doorways, while adding character to your home.

Our designs are incredibly versatile and Wynstan can manufacture your Canopy Awning in styles that include curved or triangular shapes, and with the bottom covered or uncovered. We also offer a great selection of fabrics to choose from, ensuring the awning matches your home's aesthetic.

MOTORISATION

Enhance your Wynstan Blinds and Awnings by choosing Wynmotion, our unique motorisation system. Eliminate the need for cords or cranks and experience ultimate convenience and luxury, all with a touch of a button!

MOTORISE WITH WYNMOTION

There's no time like now to invest in the future.

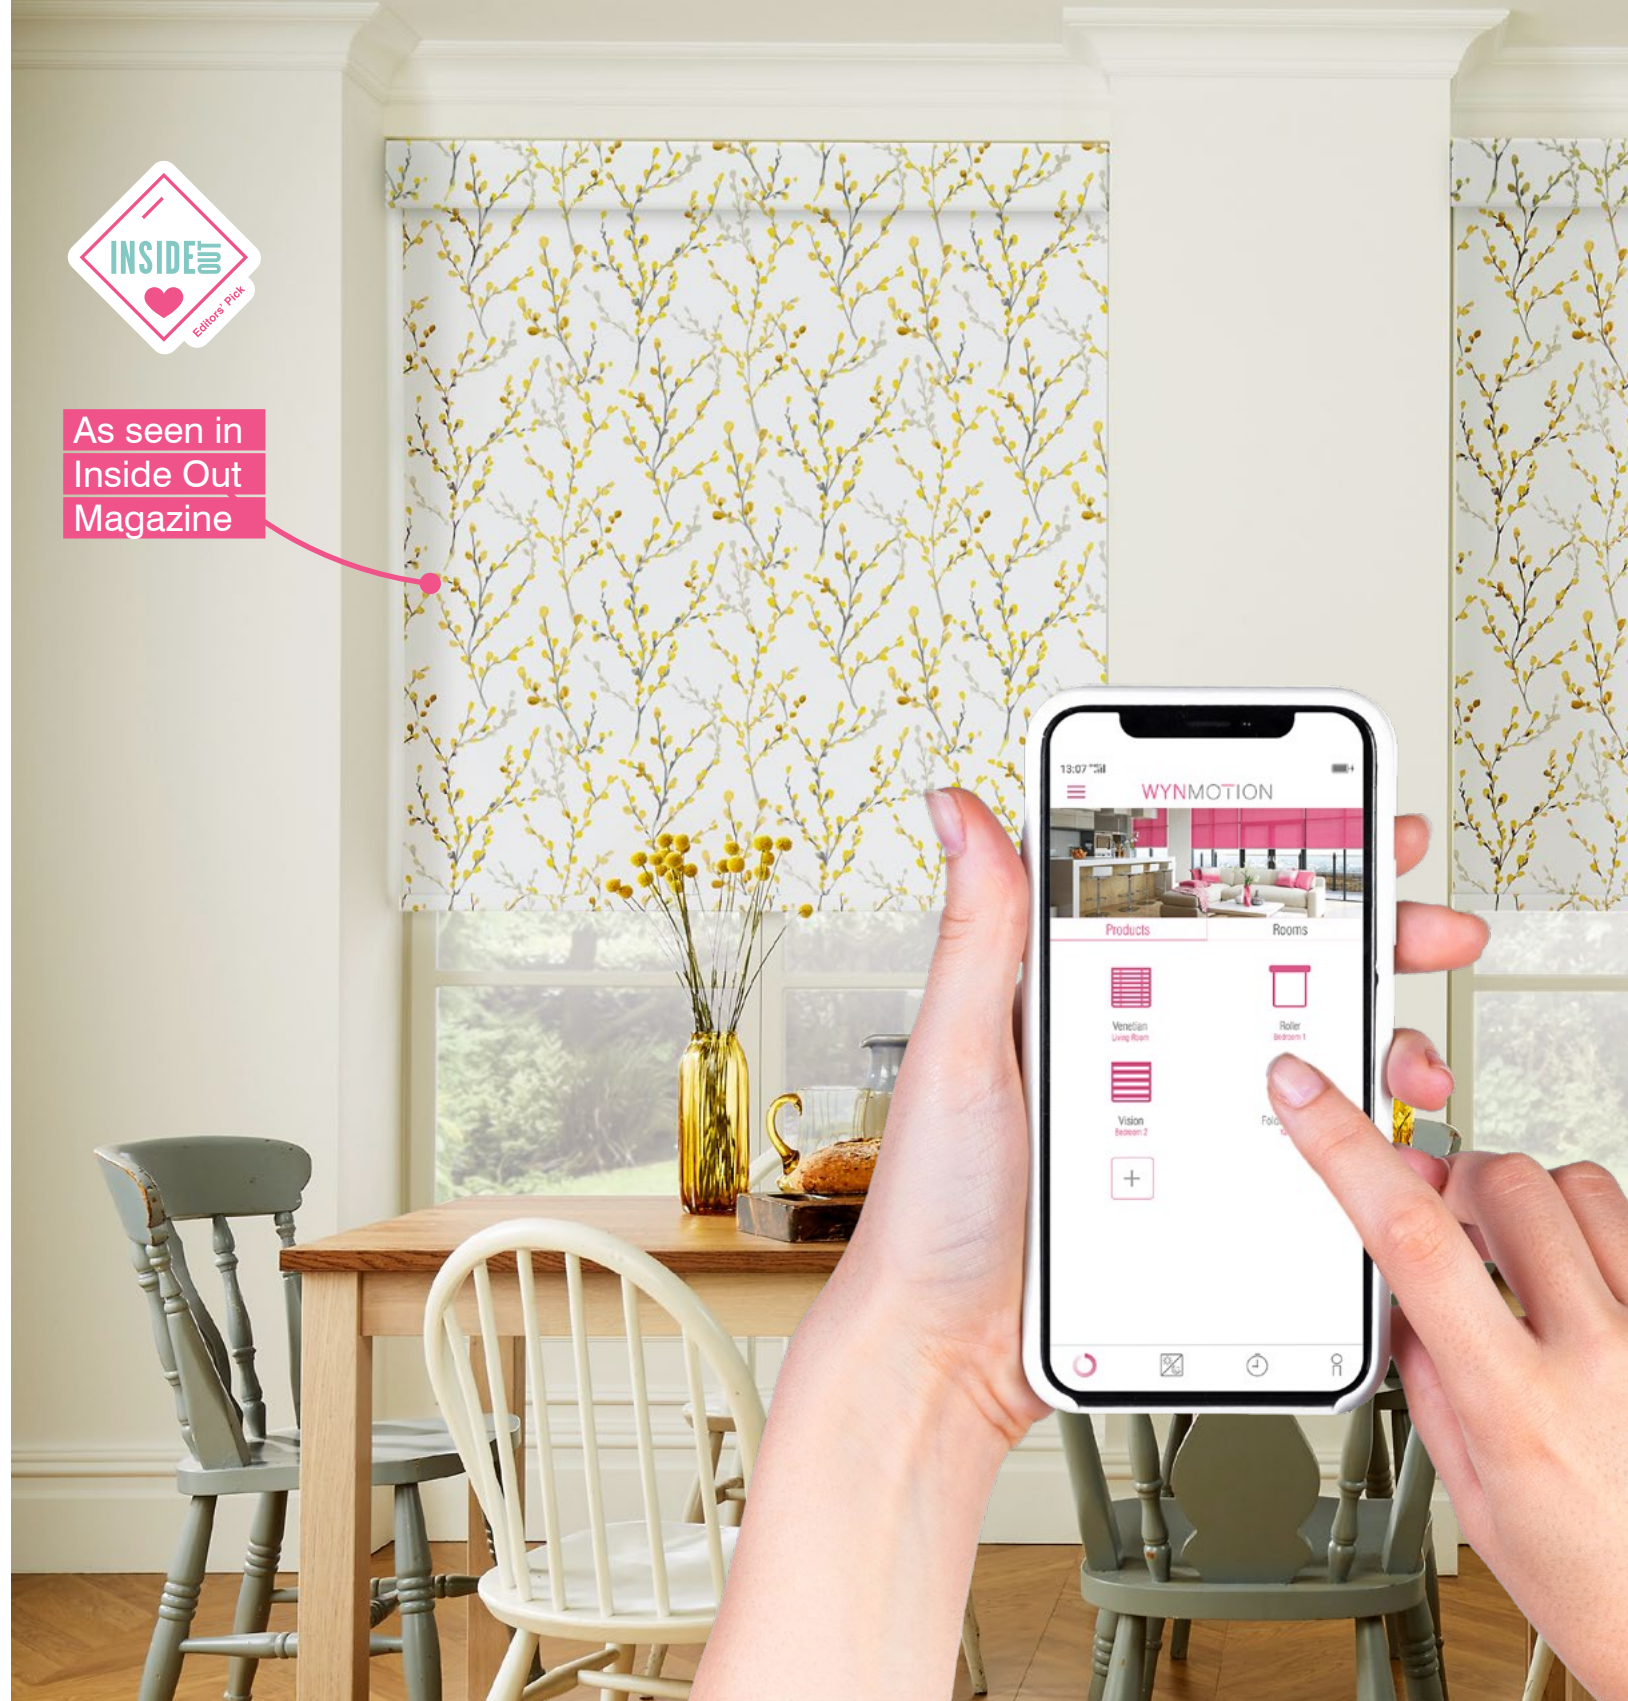

Especially designed for a relaxed Australian lifestyle, Wynmotion motorised solutions mean eliminating cords – and controlling your Blinds and Awnings at the touch of a button. It's a hands-off approach that means the kids will no longer be tempted to get in a tangle, there's no back-wrenching cranking for you to do, and your windows will enjoy a sleek, stylish motorised makeover.

Thomas

Had my motorised roller blinds installed yesterday, Louie was great. The advice he offered was fantastic, so happy with the result. Would recommend Wynstan without any hesitation whatsoever.

SHUTTERS

Always on trend and with quality in mind, Wynstan offers beautifully elegant custom-made Plantation Shutters, perfectly crafted to fit your home, as well as Aluminium Shutters especially designed for exterior spaces.

- Plantation Shutters
- Aluminium Shutters

PLANTATION SHUTTERS

Our elegant Plantation Shutters are a timeless addition to your home.

They provide the ultimate light control – each panel can be independently adjusted to temper the light. The panel louvres can be controlled, allowing natural light in while still maintaining privacy.

Suits all
window
shapes

Adjustable
louvres allow
full light control

With excellent thermal resistance, Plantation Shutters not only keep you cool during the summer, but help retain heat during the winter. Wynstan's Plantation Shutters are easy to clean and virtually maintenance-free – excellent for dust allergy sufferers.

Wynstan offers a complete range of Plantation Shutter solutions:

- Fauxwood
- Australis
- Basswood
- Cedar
- Hardwood

ALUMINIUM SHUTTERS

The perfect outdoor solution, Aluminium Shutters provide understated style and sophistication as well as practicality.

Aluminium Shutters can also be used indoors, but are particularly effective outdoors as they are incredibly durable and feature a high UV powder-coated finish. Aluminium Shutters can be hinged, fixed, bi-fold or sliding.

Wendy

I was very happy with the service I received from Wynstan. From the first contact to arrange a consultation, to the Sales Consultant who was friendly and informative, and then the Carpenter who did a wonderful job of installing my aluminium outdoor shutters which look fabulous, I'm so happy with how good they look, plus the privacy is great.

SECURITY DOORS, GRILLES & FLYSCREENS

- Crimsafe® Security Doors
- Crimsafe® Ultimate
- Crimsafe® Classic
- Crimsafe® Security Grilles
- Crimsafe® Safe-S-Cape®
- Flyscreens
- Retractable Flyscreens
- Roll-up Flyscreens
- Safety Doors and Grilles

PEACE OF MIND

Keep your home secure with Crimsafe®, manufactured and installed by Wynstan.

Unlike traditional Security Doors and Grilles fitted with bars, Crimsafe® is a stylish product that will complement your decor. Most importantly, Crimsafe® cannot be effectively cut, pried open or kicked down, ensuring your home is secure.

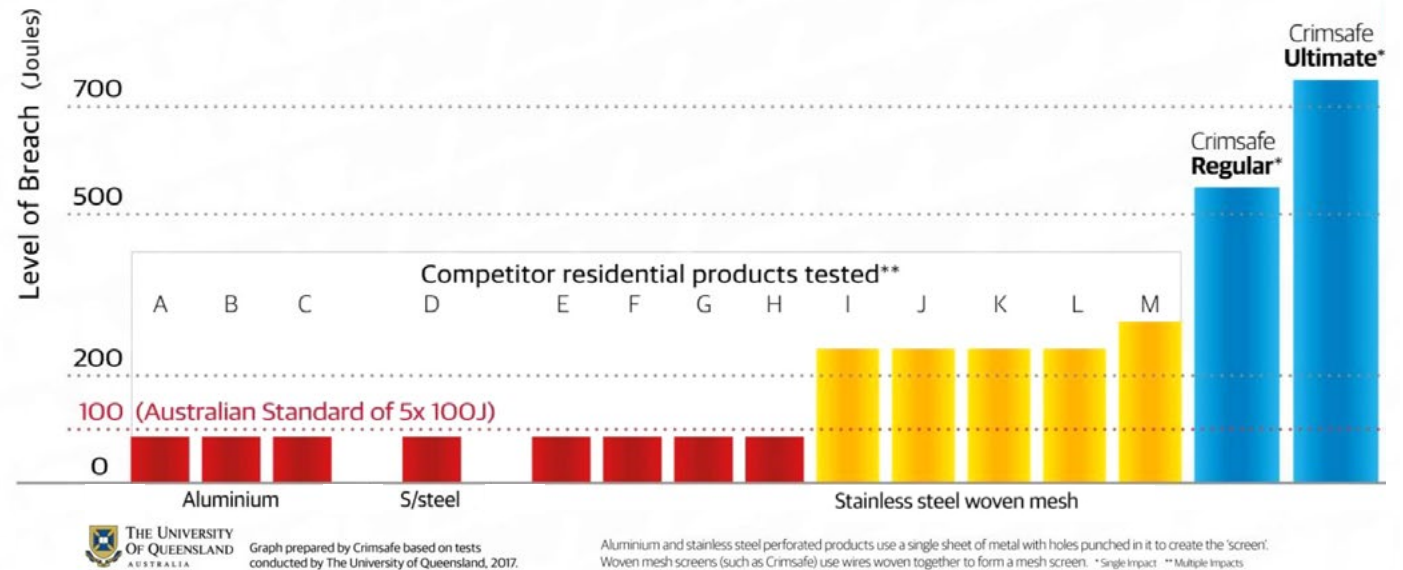

Crimsafe® features a patented Security Mesh Clamp System. While inferior products glue or wedge mesh into a frame, Crimsafe® sandwiches Tensile-Tuff® Security mesh between two serrated pieces of aluminium, and then screws this mesh into place. This results in a vice-like grip that has a much stronger tolerance to force than many competing products.

Crimsafe® is constructed from 304 Grade Stainless Steel, which is much stronger than other security mesh products made with only 316 Marine Steel. Crimsafe® Tensile-Tuff® Security mesh is also 26.5% thicker than other products.

In the event of a fire, Crimsafe® can help reduce the level of radiant heat entering your home. Crimsafe® Screens achieved a 45% rating for attenuation of radiant heat flux. This means that almost half the heat from a fire source on the other side of a screen does not transfer through the Crimsafe® Tensile Tuff® Security mesh.

Crimsafe outperforms the rest

When tested by The University of Queensland, our screens stood up not just against an Australian Standard of 5 x 100 Joule (J) impact, but also against singular impact levels up to 550J (Crimsafe Regular), 750J (Crimsafe Ultimate) and 1200J (Crimsafe Commercial Applications).

Close-up of Crimsafe mesh and frame

Security never
looked
so good!

CRIMS SAFE® SECURITY DOORS

Crimsafe® Doors can be hinged, sliding or bi-fold, meaning there is a Crimsafe® solution for almost every doorway.

Crimsafe® Doors feature Crimsafe's® unique Security Mesh Clamp System and 304 Grade Stainless Steel mesh. Crimsafe® Doors also work as Flyscreens, while allowing airflow, ensuring that breezes are allowed in, while bugs are kept out!

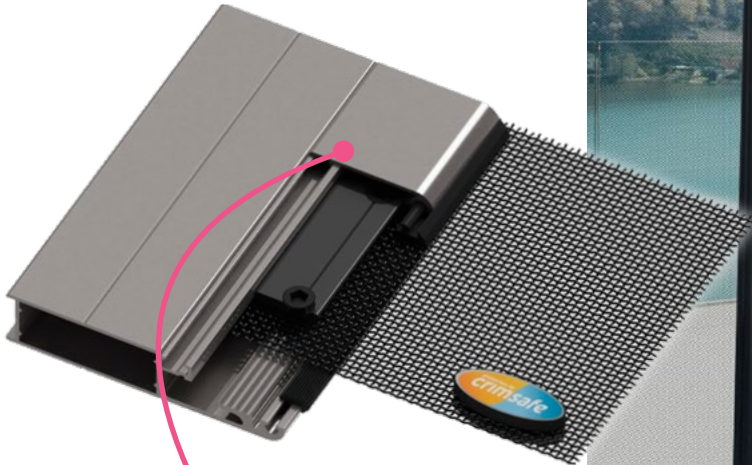

Crimsafe® Door frames can be made in a variety of different colours, as well as various wood-grain styles, giving the look of real timber. All Crimsafe® Doors come fitted with a triple lock, which is crafted from stainless steel for superior strength and exceeds all Australian quality standards. For extra security, mid-rails can come standard with your Crimsafe® Doors. Mid-rails help strengthen your door's lock and protect the hinges by reducing an intruder's ability to lever it from the wall.

Crimsafe® Bi-fold Doors are a popular option with contemporary homes and are perfectly suited to the indoor-outdoor nature of Australian living, neatly folding to the side when not in use.

CRIMSAFE® ULTIMATE

With Crimsafe® Ultimate, an even greater level of strength and security is achieved.

Crimsafe® Ultimate is seven times stronger than the impact level required by Australian standards and 40% stronger than Crimsafe® Regular.

Extra security
cover for clean
aesthetic

Maintain your view
& keep mozzies out!

Crimsafe® Ultimate features tamper-resistant screws which bind the screw-clamp, mesh and frame together, making a tightly integrated system which ensures greater security.

Peter

This is Crimsafe door number 4 which I have had fitted to my residence. As usual, the workmanship is excellent but most importantly the Customer Service by your technician is above reproach. Very pleasant to deal with and was on time. No mess left and the quality of the installation process is fantastic. Many thanks once again.

CRIMSAFE® CLASSIC

Keep your home safe and secure with Crimsafe – manufactured and installed by Wynstan.

The Crimsafe Classic Door features a newly-engineered frame and screw clamp technology, purposely built to withstand impact five times stronger than the Australian Standard. The classic door fits effortlessly into your home and lifestyle while enhancing the security and street appeal of your home.

Crimsafe Classic, like other Crimsafe products, features the Crimsafe Tensile Tuff Security Mesh. This mesh is made up of strands which are 0.9mm thick. This has a significant impact on strength, making Crimsafe mesh much stronger than other meshes.

Maureen

We recently had a Crimsafe security door fitted and we were so pleased with the door and service from Wynstan that we have ordered another security door for the back of the house. Excellent product and service.

Safely maintaining
your views while
keeping a fresh
breeze!

Crimsafe Classic also features a clip-on cover which creates a sealed chamber, concealing the fasteners and protecting the system from the elements, as well as adding an extra layer of security.

CRIMSAFE® SECURITY GRILLES

Ensure your home is protected
with Crimsafe® Grilles.

These fixed Window Grilles can be face-fitted, reveal-fitted using an angled frame, or fixed in a Flyscreen track. Crimsafe® Grilles work with windows of various types including louvres, double hung and sliding windows. Crimsafe® Grilles feature Crimsafe® Tensile-Tuff® Security Mesh, which is made of 304 Grade Stainless Steel, offering premium strength. Crimsafe® Grilles also feature Crimsafe®'s Mesh Camp System. This contributes to the product's incredible strength and eliminates the need for unsightly bars.

Crimsafe® Grilles also offer superior heat control. When applied over the whole area of a single glazed window, a Crimsafe® Grille will improve the window's 'Solar Heat Gain Coefficient' by up to 53%. Crimsafe® Grilles are custom manufactured to perfectly fit your window, ensuring a clean finish and excellent protection.

CRIMSAFE® SAFE-S-CAPE®

In an emergency, you need to evacuate your home in a matter of seconds and trying to get through a standard Crimsafe® Window Grille is difficult.

The Safe-S-Scape® range features a keyless emergency exit function, specifically developed for evacuations. Crimsafe® Safe-S-Capes® can be hinged at the top or sides and be made to swing outward or inward, making them suitable for a wide range of spaces.

FLYSCREENS

We may have enviable warm summers and a relaxed lifestyle, but Australia is also home to a number of unwanted insects.

Flyscreens are an affordable, environmentally friendly and effective solution to preventing insects entering your home. Wynstan Flyscreen frames can be 9mm or 11mm thick and can be powder coated to match your window frames. Choose between fibreglass mesh or, for a greater level of fire resistance, stainless steel mesh. Wynstan Flyscreens can also be designed to meet the bushfire regulations of your local area.

RETRACTABLE FLYSCREENS

Retractable Flyscreens offer all the benefits of a regular Flyscreen, with the added benefit of being able to retract.

Our Retractable Screens can be made with a rollaway (retract to the side) system, giving you the option to completely open up a space when desired. Extra stopping points can be added to the track, to allow for the screen to be secured at various points.

Wynstan offers Retractable Flyscreen solutions for all types of windows and doors including sliding, double hung, louvre, casement, awning windows or bi-fold doors. Choose between plain or striped mesh, and even pleated mesh for rollaway Retractable Flyscreens.

Let the breeze in while keeping the bugs out

ROLL-UP FLYSCREENS

Let the breeze in while keeping the bugs out with our Roll-Up Flyscreens! Not only do they look good, but with frames that are powder-coated for durability and strength, you can trust these screens to stand the test of time!

As you can see our Roll-Up Flyscreens make a perfect combo with Bi-fold windows! But just like our Retractable Flyscreens, Wynstan offers Roll-Up Flyscreen solutions for a range of windows and doors including double sliding, double hung, louvre, casement and awning windows with plain or striped mesh options.

SAFETY DOORS AND GRILLES

Wynstan Safety Doors and Grilles create extra safety while also keeping insects outside.

Available in a hinged or sliding design and, for extra peace of mind, Safety Doors can be fitted with a triple lock system. We can match your door to an existing doorframe and have a wide colour range to choose from. Mesh options include fibreglass, aluminium or for a greater level of fire resistance, stainless steel. The vision mesh is ideal for maintaining your views while keeping your privacy, and our paw-proof mesh with an optional doggy door will ensure that every member of the family is happy. There is also the option of matching sidelights for your doors. By fitting your windows and doors with our matching safety range, you can create a sleek, uniformed look.

Colin

Installer was on time, pleasant and professional. Very cheerful, polite and conscientious with his work. He was organised, knew what he was doing, cleaned up all mess (even vacuumed) and explained and demonstrated operation of product. Well done.
