

## WHY APTO PPE?

*Our engineering mindset* means we've implemented & tested design elements and materials to ensure the problem is solved: For women to be safe, comfortable and professional onsite. This includes princess seams, extra curved darts, ventilation seams, well positioned pockets, pull tabs and elastic. All garments comply to AS 4602 for hi vis safety.

*We are a licensee* with the Australian Made and Owned Campaign.

*We can tailor designs* with our local suppliers, designers and manufacturing. This includes small manufacturing runs in specific colours, material types, and personalisation for your organisation.

From the outset, Apto PPE's mission was to *deliver on values rather than marketing spin*. We work with ethically aligned local businesses who care about fair work practises, quality and sustainability.

“

*Women deserve to be valued and to work in garments that are designed to fit our shapes so we are safe and comfortable. I want women to stand out as the trailblazers they are, rather than being "one of the boys".*

”
