WHERE TO START... PREPARATION

Preparation is one of the most important jobs undertaken when preserving or enhancing timber. A poorly prepared or unclean surface will compromise the performance of any top coat you may apply, so it's important to follow all the relevant product preparation and application guidelines to get the best outcome for your timber project.

RAPID PREP

For new, unweathered exterior timber

Haymes Woodcare Rapid Prep is a simple to use, one step preparation product for new bare exterior timber. Rapid Prep fast forwards the weathering period to allow for immediate coating of your timber. No more waiting 4-6 weeks until the timber has been weathered naturally.

FEATURES:

- It removes surface tannins and extractives to optimise the performance of the finish coat
- Allows immediate coating onto new timber
- Simple one step preparation

USE ON:

New bare timber

CLEANS UP TO:

30m²/300gm once mixed

WOOD CLEANER

For weathered timber

Haymes Woodcare Wood Cleaner is a powerful, easy-to-use solution that cleans, revives and prepares exterior timber for coating. Preparation with Woodcare Wood Cleaner helps timber absorb the coating and ensures maximum adhesion and performance. It is a vital first step in keeping your timber looking great for longer.

FEATURES:

- Restores grey and weathered timber
- Removes dirt, grease and tannin stains
- Revitalises water-stained or mould affected timber

USE ON:

New, old or weathered exterior timber

CLEANS UP TO:

15m²/L once mixed

WOOD PUTTY

Interior + Exterior

Haymes Woodcare Wood Putty is a water based interior/exterior timber filler, suitable for use with water based or oil based coatings. It can also be used as a grain filler.

FEATURES:

- Easy-to-sand
- Quick-drying

IDEAL FOR:

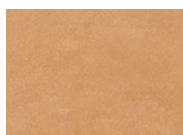

Decking, cladding, flooring and panelling

SUITABLE SUBSTRATES:

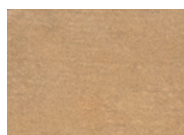

Interior and exterior timber

COLOUR RANGE

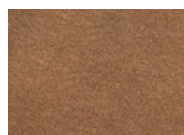

Cedar

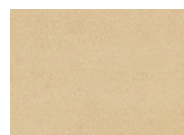

Hardwood

Jarrah

Merbau

Pine

Walnut

EXTERIOR CHECKLIST

-  **1. CLEAN** to remove surface tannins, dirt and extractives.
-  **2. CONDUCT WATER PENETRATION TEST** to identify if the timber is ready for coating.
-  **3. CALCULATE** to ensure you have the required amount of product for your project.
-  **4. APPLY** when weather conditions are favorable.

EXTERIOR TIMBER FINISHES

WATER BASED EXTERIOR TIMBER FINISHES

UVEX TIMBER FINISH SYSTEM: PRIMER + FINISH

Haymes **UVEX** is the premium finish system in our range and delivers a high end result every time.

STEP 1: HAYMES WOODCARE UVEX PRIMER

Haymes Woodcare UVEX Primer plays a vital role in the UVEX Timber Finish System. It provides adhesion, water repellence, mould and fungal protection while stabilising the timber surface to provide a sound foundation for the UVEX Finish top coats.

UVEX Primer can be used as a joinery pre-treatment for temporary protection against cupping and deterioration on timber prior to the application of any other Haymes water based topcoats.

FEATURES:

- Stabilising pre-treatment
- Primes and penetrates

USE ON:

Bare exterior timber

COVERAGE RATE:

Up to 10m²/L

COATS:

1

STEP 2: HAYMES WOODCARE UVEX FINISH

Haymes Woodcare UVEX Finish is a premium exterior timber finish that is UV and mould resistant. This long-lasting finish protects against cracking, moisture and abrasion. It is an easy-to-use coating that maintains the timber's natural appearance and requires minimal maintenance.

FEATURES:

- Outstanding durability
- Formulated for Australian conditions
- Highlights timber's natural appearance

FINISH:

Satin

COVERAGE RATE:

Up to 12m²/L

COATS:

2

DURABILITY SCALE:

IDEAL ON:

Cladding, decking, doors, windows, outdoor furniture

SUITABLE SUBSTRATES:

Exterior timbers e.g. Merbau, Spotted Gum & Blackbutt

NOTE: The UVEX Finish can be used with or without the UVEX Primer when coating bare timber. For high exposure areas and for longer-lasting performance the UVEX Primer is recommended.

WATER BASED EXTERIOR TIMBER FINISHES

DEXPRESS DECK & TIMBER STAIN

Haymes Woodcare Dexpress is an easy-to-use timber finish that lasts 3X longer than traditional decking oils. This UV and mould resistant coating is perfect for preserving hardwood and softwood timbers including Merbau, Spotted Gum and Treated Pine. Dexpress is quick-drying and washes up easily in water.

FEATURES:

- Hard-wearing
- Quick-drying
- Long-lasting cutting-edge formula

IDEAL ON:

Decking, cladding, fences, gates and screens

SUITABLE SUBSTRATES:

Exterior timbers e.g. Merbau, Spotted Gum, Treated Pine

FINISH:

Low sheen

COVERAGE RATE:

Up to 12m²/L

COATS:

2-3

DURABILITY SCALE:

SLIP RESIST NON-SLIP ADDITIVE

Haymes Woodcare Slip Resist is a specifically designed additive for use in selected interior and exterior Haymes Woodcare products to achieve a slip resistant finish.

IDEAL FOR USE IN: UVEX Finish, Dexpress, Aqualac Floor Satin and Easy Floor Satin only.

IDEAL FOR USE ON: Interior and exterior timbers where a slip-resistant finish is required ie; **Exterior:** Timber decking, ramps, walkways.

Interior: Stairs and landings.

MIXING RATIO: 150gm's/4 litres

Slip Resist complies with AS 4586: P4 rating

DID YOU KNOW? You can increase performance by using a colour that matches the type of timber. For example, using **Dexpress Merbau** on Merbau timber.

EXTERIOR TIMBER FINISHES

OIL BASED EXTERIOR TIMBER FINISHES

DECKING OIL

Haymes Woodcare Decking Oil is an oil based timber finish that penetrates surfaces to preserve exterior timber. It creates a protective barrier to repel water and protect timber from mould, algae and UV damage. Tintable to a wide range of colours, Decking Oil is ideal for use as an exterior timber stain.

FEATURES:

- Will not crack or peel
- Penetrates and preserves
- Mould and algae resistant

IDEAL ON:

Decking, walkways, steps and fencing

SUITABLE SUBSTRATES:

Exterior timbers e.g. Merbau, Spotted Gum, Blackbutt

FINISH:

Matt/Natural look

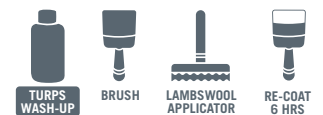

COVERAGE RATE:

Up to 10m²/L

COATS:

2-3

DURABILITY SCALE:

EXTERIOR VARNISH

Haymes Woodcare Exterior Varnish is a high-gloss finish that incorporates advance UV protection for enhanced, long-lasting performance. This durable, clear coating preserves the natural appearance of timber. **Note:** On bare timber, if staining is required, use Haymes Woodcare Decking Oil prior to top coating with Haymes Woodcare Exterior Varnish.

FEATURES:

- Hard-wearing gloss finish
- UV Protection
- Oil-enriched

IDEAL ON:

Exterior timber; windows, doors, panelling, furniture and trim. *Not suitable for walk on surfaces.*

SUITABLE SUBSTRATES:

Exterior timbers

FINISH:

High gloss

COVERAGE RATE:

Up to 12m²/L

COATS:

3

DURABILITY SCALE:

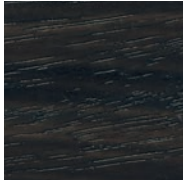

TIP: Conduct regular inspections and recoat at the first signs of deterioration to maintain protection from harmful UV damage.

★★★

AQUALAC FLOOR NON-SLIP

COMPLIES WITH AS 4586: P4 Rating

Haymes Woodcare Aqualac Floor Non-Slip Finish is a premixed slip resistant product ideal for use on stairs, walkways, landings and interior timber where a slip resistant finish is required. Apply only as a final coat in conjunction with Aqualac Floor Satin. Please refer to product data sheet for further information at www.haymespaint.com.au/woodcare

FEATURES:

- Pre-mixed
- Final coat application

USE ON:

Stairs, walkways and landings

COVERAGE RATE:

Up to 14m²/L

DID YOU KNOW? A gloss finish will give a shiny appearance and provide depth and clarity, highlighting the timber's natural features. A satin finish is perfect for hiding marks and dust.

INTERIOR TIMBER FINISHES

OIL BASED INTERIOR FLOOR FINISHES

EASY FLOOR

Haymes Woodcare Easy Floor is an easy-to-apply interior coating designed to protect timber floors from wear and tear. This durable finish creates a barrier against abrasion, cracks and chips, and requires minimal ongoing maintenance. It is a tough timber coating that enhances and safeguards the natural beauty of your timber.

FEATURES:

- Hard-wearing
- Enhances and protects
- Easy to clean

IDEAL FOR:

Floors, stairs, skirting boards and bench tops

INTERIOR CLEAR FINISHES - on Vic Ash

Water based

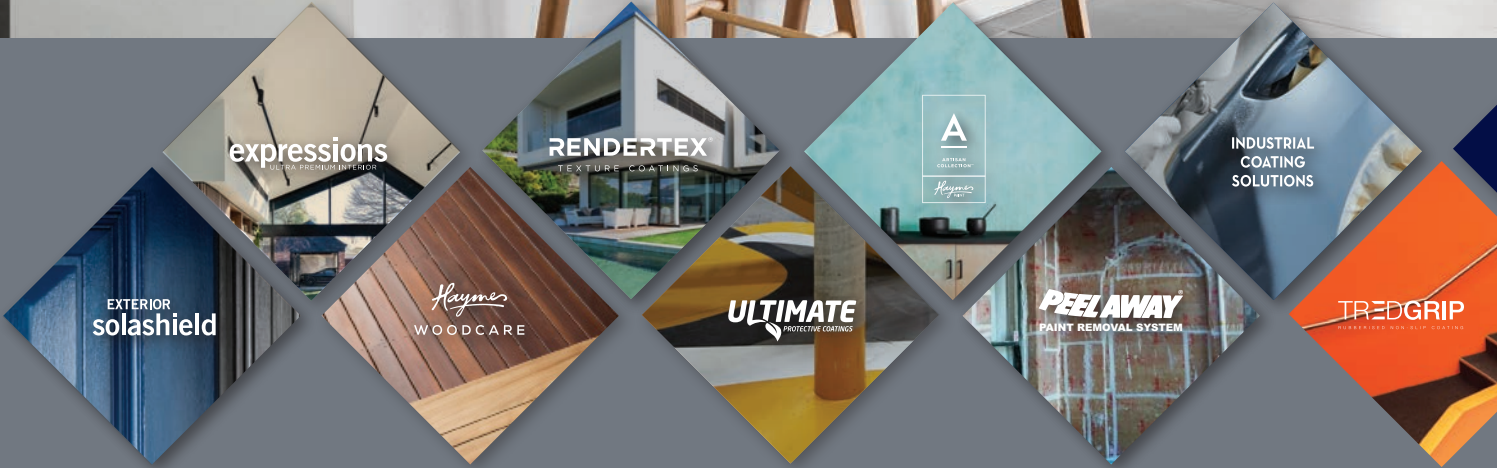

Solvent-based

DID YOU KNOW? Water based clears are great for retaining the original appearance making them perfect for light coloured timber. Solvent-based are great for enhancing the timber colour as they impart a wet look.

TIP: When staining, ensure you test your colour on an off-cut or inconspicuous area before applying to the project.

Variation in electronic display screens and the printing process can result in a different colour appearance, the colours and images displayed are a guide only. Confirm your colour choice with a sample pot from a Haymes Paint Stockist. The images in this brochure are for illustration purposes only. For up to date product information including surface preparation, application and substrate specifications refer to the applicable Haymes Paint Product Data Sheet prior to selecting and applying products. For any other additional questions regarding product suitability, contact a Haymes Paint Representative on 1800 033 431.
