Curve

Basic designs are sometimes the best. The Curve Lounge from Workspace Commercial Furniture is a prime example of this. Curve was designed for specific applications such as mental health and detention institutions where the need for safety is paramount. Because of these applications Curve features non-flammable dunlop Australia foam, concealed safety zips and is free from hard or weighted components.

Curve is also flexible! A weighted base option is available to make Curve more suitable for applications such as education and hospitality. Its light weight construction brings an element of portability to the Curve lounge that allows it to be configured for a variety of tasks and environments.

Available in many custom fabric options Curve is a cost effective, comfortable and versatile lounge solution.

SPECIFICATIONS
