

AQUATIC BARLEY STRAW EXTRACT

TARGET: **PONDS & DAMS**

AQUATIC TECHNOLOGIES

The
Algae Treatment
Experts

The safe & natural algae¹ treatment in ponds, fish ponds and dams.

AQUATIC BARLEY STRAW EXTRACT

- Environmentally acceptable and sustainable method of algae control²
- Quick Acting
- Harmless to pets, plants & people
- Natural and Eco-friendly
- Australian Made & Owned

Barley Straw Extracts have shown to reduce algae growth by up to 90%³

SUITABLE FOR

Fish Pond	Small Pond	Large Pond	Small Dam
0 - 15,000L 0 - 20m ²		15,000L - 50,000L 0 - 50m ²	50,000L - 1ML 50m ² - 2,000m ²

How Does Barley Straw Work?

Aquatic Barley Straw Extract is a super-concentrated liquid made from whole barley straw designed for easy-to-use application. This is a no mess application product.

This powerful formula is the natural solution for maintaining healthy, clear and clean pond water all year round. Aquatic Barley Straw Extract quickly gives results letting you enjoy the benefits of natural barley straw. No need to wait when you are using Aquatic Barley Straw Extract, it will naturally improve water purity.

Decomposing barley straw in well aerated water releases compounds that inhibit algal growth. It has been shown that barley straw is active against a range of algae including unicellular and filamentous forms¹.

The high carbon-to-nitrogen ratio of barley straw means that when it breaks down it uses available nitrogen and phosphorus in the water. This reduces conditions favourable to algae growth⁴.

Perfectly safe to use around fish, plants and people.

SAFE FOR

Fish, Aquatic Plants, Pets, Wildlife, The Environment & is a Natural product.

HOW TO USE: AQUATIC BARLEY STRAW EXTRACT

APPLICATION RATES:

The Algae Treatment Experts

Aquatic Barley Straw Extract

Enclosed Water Tanks

0 - 20,000L
0 - 20m²

RECOMMENDED QUANTITY	We recommend purchasing 1 Litre.
APPLICATION RATE	10mL of product for every 100L of water.
HOW MUCH TO APPLY	Gently shake container to mix. Measure the required amount of product & pour directly into the water.
HOW OFTEN TO APPLY	Apply once a month

Small Outdoor Ponds, Fountains or Water Features

0 - 15,000L
0 - 20m²

Fish Ponds

Small Ponds

RECOMMENDED QUANTITY	We recommend purchasing between 1L-5 Litres.
APPLICATION RATE	15mL of product for every 100L of water.
HOW MUCH TO APPLY	Gently shake container to mix. Measure the required amount of product & pour directly into the water.
HOW OFTEN TO APPLY	Apply twice in the first week then weekly thereafter.

Large Ponds and Dams

15,000L- 50,000L
0 - 50m²

Large Ponds

Small Dams

RECOMMENDED QUANTITY	We recommend purchasing between 5L-20 Litres.
APPLICATION RATE	Large Ponds: 30mL of product for every 2000L of water. Large Dams: 10L of product for every 1ML of water.
HOW MUCH TO APPLY	Gently shake container to mix. Measure required amount & pour directly into the water.
HOW OFTEN TO APPLY	Apply twice in the first week then, monthly thereafter.

**Always read the product label for directions.*

For Best Results:

For water with high turbidity, or poor water clarity, apply an additional 20% more product until clarity improves.
