

SANI HANDS LS1107

Sanitising Liquid Gel

Contains 700ml/l Ethanol

SANI HANDS LS1107 is a sanitising liquid gel for hands. It is faster and more convenient to use than hand washing. Because the application time of 5 – 10 seconds compared to 1 – 2 minutes for hand washing, staff are more likely to use it often.

SANI HANDS LS1107 is self drying does not require rinsing it eliminates the process of drying hands. This gel incorporates humectants to counteract the skin drying effect of alcohol and skin conditioning agents to give a smooth feel to the skin.

SANI HANDS LS1107 is effective against a wide range of micro organisms. It leaves no harmful residues and is suitable for use within the food and allied industries. Its disinfecting action reduces the possibility of cross infection and provides protection of cuts and abrasions.

SANI HANDS LS1107 is near neutral pH is friendly to skin. This factor is of particular importance when rigorous and frequent sanitising is demanded by stringent hygiene and quality control programs.

SANI HANDS LS1107 has been DESIGNED:

1. To clean and sanitise hands in one action.
2. It is skin friendly and does not dry the skin.
3. To be economical in use – **SANI HANDS LS1107** is a viscous liquid which means controlled delivery from dispensers.
4. To be readily biodegradable, non-hazardous and non-toxic.
5. To be effective against a wide range of pathogenic micro-organisms.
