Education360

The Challenges Facing Australian Schools

Australian K-12 schools face a myriad of challenges that affect the quality of education and overall student outcomes. These challenges range from funding disparities and teacher shortages to evolving educational needs and increasing mental health issues among students. Below, we outline some of the most significant challenges currently confronting Australian K-12 schools:

Teacher Shortages and Retention

Australia faces a growing teacher shortage, particularly in rural and remote areas. The Australian Institute for Teaching and School Leadership (AITSL) reported that around 40% of teachers leave the profession within their first five years . Contributing factors include high workloads, insufficient support, and comparatively low salaries. This shortage is exacerbated by an increasing student population and the need for specialized teachers in subjects like STEM (Science, Technology, Engineering, and Mathematics).

Mental Health and Well-being

Student mental health is an escalating concern within Australian schools. A study by the Australian Government Department of Health found that one in seven young Australians aged 4 to 17 experiences a mental health disorder in any given year . Schools often lack adequate resources and trained personnel to effectively address these issues, which can impede students' academic performance and overall well-being.

Educational Inequality

Educational inequality remains a significant challenge, particularly for students from low socioeconomic backgrounds, Indigenous students, and those living in remote areas. The Australian Council for Educational Research (ACER) highlights that these students are less likely to achieve educational milestones compared to their peers from more affluent backgrounds . Factors contributing to this inequality include limited access to quality early childhood education, fewer extracurricular opportunities, and less experienced teachers.

Curriculum and Assessment Changes

The evolving nature of the workforce and societal needs require continuous updates to the curriculum, which can be a challenge for schools. The introduction of new subjects, such as digital literacy and critical thinking, requires additional training for teachers and new teaching resources. Furthermore, the transition to new assessment methods, such as the NAPLAN, has been met with mixed reactions regarding its effectiveness and student impact.

Budgets and Class Sizes

Ask any teacher in Australia and it is clear that there is a serious situation regarding funding and class sizes. Teachers are being expected to do more than ever within the classroom, which adds stresses to both teaching and non-teaching hours.

Cultural Diversity and Inclusion

Australia's increasing cultural diversity requires schools to foster inclusive environments that respect and celebrate differences. This involves addressing language barriers, promoting multicultural education, and combating racism and discrimination. Schools need adequate support and resources to effectively implement inclusive policies and practices, ensuring all students feel valued and supported.

The challenges facing Australian K-12 schools are multifaceted and complex, and require interventions from Government, School Boards and the Community. At a practical level schools need to stretch their budgets further, automate repetitive tasks and leverage data to make better decisions for students. This is where Education360 comes in.

Issues at a glance

- 44%** Of K-12 teachers in the US say they “always” or “very often” feel burned out at work.
- 47%** Of Australian teachers are considering leaving the profession within the next 12 months, according to a national survey.
- 24** Students per class in Australian primary schools compared to the OECD average of 21.
- 70%** Of Australian teachers surveyed report having unmanageable workloads.
- 40%** Of Australian disadvantaged students skipped at least a month of school in 2023.

Introducing Education360

Education360 is built on a modern business intelligence platform, giving you a fully integrated cloud solution, providing all of the capability your school needs to establish powerful and scalable analytics.

Take control of your structured and unstructured data

Education360 is designed to empower your school to progressively, yet rapidly establish a 360-degree view of each of your individual business units, ultimately rolling up to a centralised dashboard view of your entire school. Built on top of Domo, a market leading cloud-based platform designed to provide direct, simplified, near real-time access to business data for decision makers across your organisation with minimal IT involvement.

Besides your structured and unstructured data, dark data also lies within your organisation. Dark data is continuously being collected and stored, but is not organised via categorisation, labels, or any other effective organisation tool. It is currently in the “dark”. This treasure trove of data could hold valuable insights if it were to be organised and analysed. Potentially highly influential in the decision-making processes of a school, dark data is often waiting to be evaluated and analysed via data analytics.

We work with your school to understand your business needs and create a data strategy that allows you to explore, store and structure your data to help derive real business value. Once your data is structured, our consultants can help supply visualisations, dashboards and analytics that make big data easier to understand and manage, enabling you to make decisions based on having access to the right data at the right time.

CLOUD BASED

Always available to staff, without requiring expertise or additional hardware or infrastructure.

SECURE

Meets all Australian data security standards ensuring student data remains private.

COLLABORATIVE

In-built data annotations, messaging and task management builds a data-led decision culture.

CONNECTED

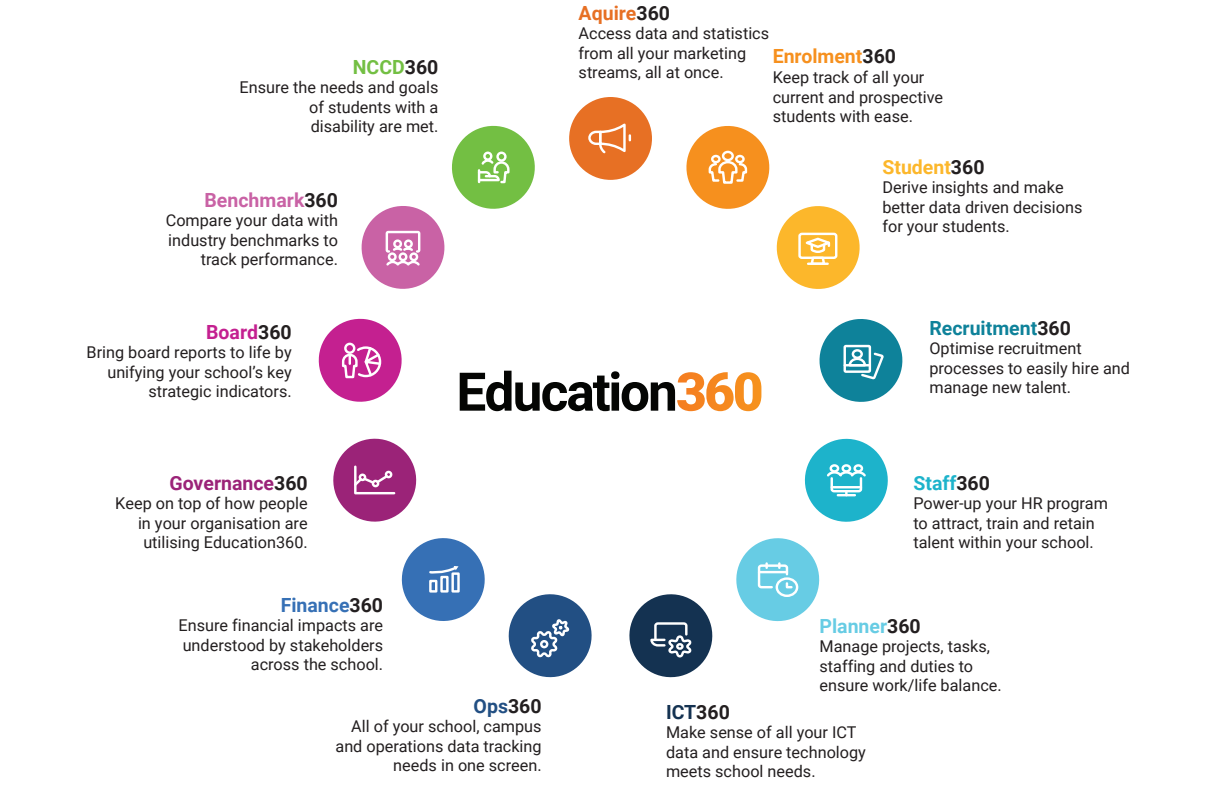

With over 1000 connectors, get systems integrated and providing business intelligence faster.

1000+ - Data Connectors

Quickly connect all your cloud, on-premises, and proprietary systems using a variety of connector options.

Bringing data sources together allows for better decision making and more timely interventions to improve student outcomes.

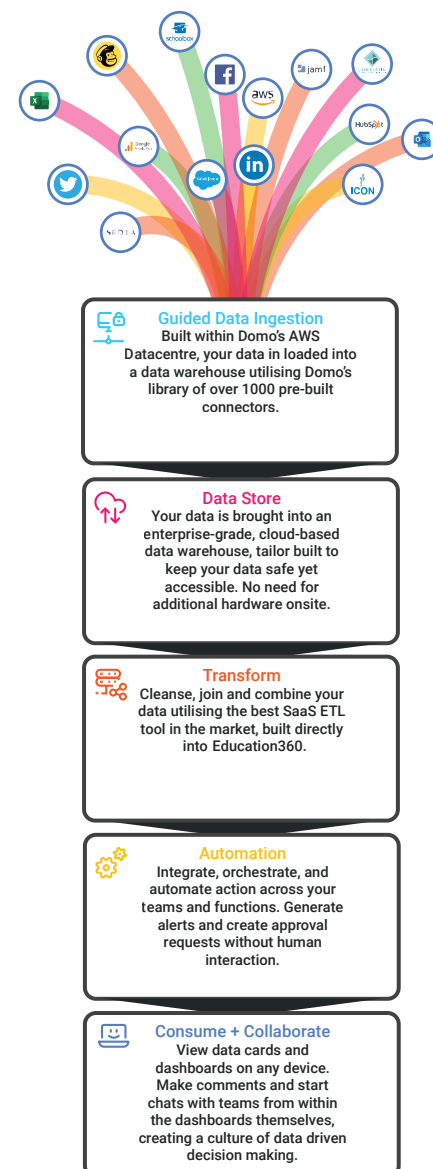

You can implement a whole-of-school solution utilising all 13 Education pillars or take a pillar by pillar approach. The choice is yours!

How Education360 works

Education360 is designed to empower your school to progressively, yet rapidly establish a 360-degree view of your individual business units, ultimately rolling up to a centralised dashboard view of your entire operations.

There are many data sources throughout the education system that teachers, principals and business administrators interact with on a daily, weekly and monthly basis.

The engine room of Education360 consists of a proven data insights platform used by multi-million dollar businesses around the world. Education360 brings that very same enterprise level solution to schools around the world without the price tag.

Implementing Education360

Join other schools in taking the first step to data transformation. We invite you to join a partnership where we help you view your school as a business, implementing the same efficiencies and targeted strategies to operate a high-functioning and financially strong organisation.

Education360 is grouped into 13 pillars, each focused on a functional or business area of your school. Schools can opt to implement one, many or all of the pillars, depending on the needs and budget of the school.

Stage 1 Onboarding starts

Your journey to data-driven insights commences.

We work with you to identify data sources and your specific requirements.

Stage 2 Getting Data

Data is ingested into the system using prebuilt connectors, custom APIs or a workbench plugin for on-premise data.

Data Warehouse and Model configured.

Stage 3 Configure Pillars

Education360's pillars can be configured should you require specific reports or insights.

In addition custom rules and alerts can be set up.

Stage 4 Using Education360

Your pillars are ready to start providing valuable insights.

Your Data Captains are trained and supporting your school.

Education360 commences with a three-year commitment whereby our ask is for your assistance in outlining all of your available data sources to ensure a seamless transition to the datafication of your school. The more data sources we link to Education360, the more reports, analysis and insights your staff will have access to. Included in this program is 15 days of an Education360 Specialist Developer to work with your Data Captains in the implementation of this program.

Whether implementing one pillar or all thirteen, the implementation process remains clear. Our data consultants work with you to integrate all your data sources, customise the pillar pages to your needs and ensure your staff are ready to use Education360's insights.

Acquire360

Acquire360 centralises and unifies data from across your marketing and admissions systems to form a 360-degree view of your marketing spend, reach, and the conversion of leads into enrolments. Get your leadership team or agency on the same page to gain deeper insights into which activities are resonating most with your target audience to drive greater return on your acquisition investment.

With Acquire360, social, web, CRM and event data is available, up to date, and ready to go on a single page. No more logging in to ten different websites just to find statistics for a single campaign. Monitor your success across all platforms and channels from inside Acquire360 and determine the value of your marketing and sales investments.

Enrolment360

For all schools, the ability to enrol and retain students is critical to the financial success of your school.

The school budget, the programs offered and the teachers on staff all stem from the number of students that enrol at your school. Increasing enrolment requires a fully coordinated effort and often new approaches to programs offered at the school. Administrators and teachers need to work together on the best strategies for your school.

Fortunately, accurate data helps schools with enrolment and retention of students. Using enrolment data, determine which students would be the best fit for your school, track your social media updates, and get geocode location data on both current and prospective students.

Marketing data is crucial for modern educational institutions, here's why:

- 67%** Of people use search engines first when researching independent high schools, colleges and universities.
- 75%** Of people will judge a school's credibility based on the quality of the online experience.
- 50%** Of younger applicants will use more than 5 social media sites to conduct research on a college or university.

Understanding whether your effort and expense are yielding positive benefits to your school's brand, reputation and enrolment numbers is hard. Acquire360 ensures you stay across your initiatives and ensure campaign investments yield real benefit.

Features

- Get Campaign Result Insights**
Make campaign decisions quickly and timely by gaining the most up to date data whenever you need it.
- Lifetime Value and ROI**
Easily see the value and ROI of marketing activities, as well as trends over time.
- Know your Audience Demographics**
Gain deeper insights into where your audience comes from, and how they interact with your content.
- Get Social Media Insights**
See all your followers, engagements, and impressions from all channels on a single page.
- Track Campaign Cost Management**
Gather insights on your cost versus conversion rate to change future campaigns for the better.

Easily keep track of your current and prospective students and enrolment rates, ensuring that activities aimed at increasing enrolments are effective.

Features

- Understand Demographics**
By understanding the demographics of enrolled students, you can focus your activities towards likely student applicants.
- Feeder Schools**
Find out where your students are coming from to shape your relationship building and student on-boarding activities.
- Optimise Enrolment Activity**
Link to data from Acquire360 to ensure that marketing campaigns are having the desired effect on enrolments.

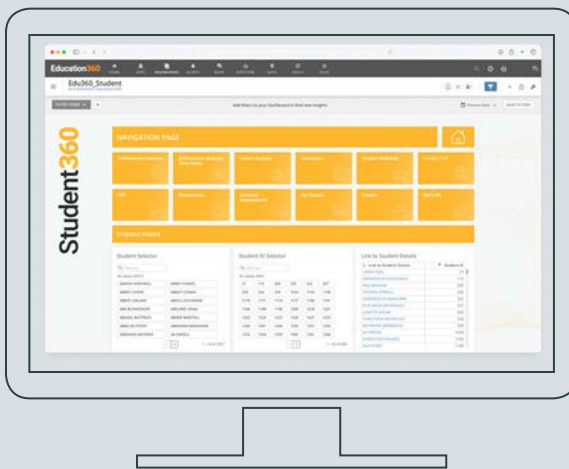

Enrolment data is crucial for your school's growth and continued success.

- 1.4%** Growth per annum of enrolments in independent schools in Australia since 2019.
- 2%** Enrolment growth in the independent sector according to ISA projections to 2030.
- 34%** Of all student enrolments are independent and catholic institutions.

Student360

Today's educators have increasing responsibility of wrangling data to generate insights and inform their teaching. Your student's data footprint is growing by the day with the proliferation of personal devices, online learning tools, remote and digitised classrooms, collaboration tools and more. Whilst this data contains value, teachers struggle to find the time to extract its value and bring it's insights to bear.

Student360 is the workhorse bringing together historic and current academic performance, attendance, engagement and well-being data. External assessments such as PAT and Essential Assessments are easily managed through the dashboards giving teachers ability to assess, plan and inform practice in near real-time.

Why should you be managing all your student data?

- 91%** Of teachers report administration as a hindrance to their core job of teaching.
- 54hrs** Is the average teachers are working per week, increasing burnout and stress levels.
- 86%** Of teachers say data is important to their effectiveness and foster positive student outcomes.

Unlock hidden insights into your student's performance with Student360. Measure an individual student, class, year level, or the entire school in one platform.

Spend more time focused on students with a complete view of their performance and understanding of their needs.

Features

- Student on a Page**
Plan and deliver content tailored to a student's individual needs by viewing student performance across all learning areas.
- Cohort Analysis**
Make efficient decisions by comparing academic performance to variables such as attendance or class codes.
- Manage External Assessment Data**
Merge all your external testing in one place with Student360. Access assessment platforms such as PAT, Essential Assessments, and Renaissance.
- Student Well-being**
Manage the well-being of your students blending attendance and feedback data like surveys and participation data.
- Set Specific Alerts for Early Intervention**
Easily setup alerts on existing data and be notified when students fall outside the norms so you can correct behaviours before they become an issue.

Finding and attracting the right talent is crucial for the success of any school. Recruitment360 allows Hiring Managers to manage the recruitment process whilst ensuring hiring costs are kept to acceptable standards.

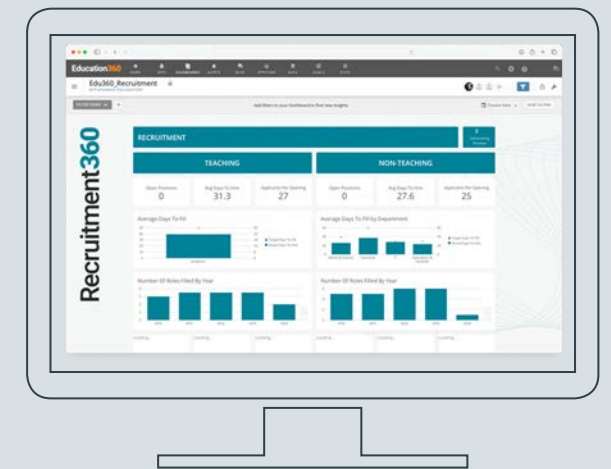

Features

- Visualise Time to Hire**
Receive insights ahead of time into the time it takes your school to make new hires so you are ahead of the curve.
- Determine Quality of Hires**
Calculate and analyse the quality of your new hires to determine the effectiveness of recruitment methods and processes.
- Compare Channel Efficiency**
Optimise your hiring channels by seeing where your best hires are coming from.
- Open Role Summary**
See and share all of the open roles that your school has in one place, as well as where each role is up to in the hiring process.
- Determine Hiring Impact**
Determine whether your recruitment screening processes are inclusive of all classes and take action to avoid adverse impact.

Recruitment360

It's hard to keep track of all the data involved in acquiring new talent. Rather than trying to keep tabs on information, a hiring dashboard centralises data, allowing you to make better, more informed hiring decisions.

Recruitment360 helps HR managers visualise candidates currently in the recruiting pipeline as well as vacancies within the company that must be filled. By compiling all the information relating to an organisation's recruitment in one place, HR recruitment dashboards streamline the recruiting and hiring process and help HR managers to achieve their goals.

Recruiters need to know more than the baseline when it comes to their workforce:

- 15%** Of schools reported vacancies in May 2023, many of which are in key strategic positions.
- 50k** Teachers to permanently leave the profession between 2020-25, making the employment market competitive.
- 44%** Of teachers feel dissatisfied in their current role.

Staff360

Staff360 is the revolutionary HR analytics dashboard designed exclusively for schools. Streamline your staffing operations, gain valuable insights, and make data-driven decisions with ease.

Staff360 empowers school administrators and HR staff with comprehensive analytics on recruitment, retention, performance, and more, all in one intuitive platform. Elevate your school's HR management with Staff360 – because the future of education begins with the right team.

Staff360 pulls together employment data, HR documents, and contract data from systems such as Bamboo, Docusign and Workday to ensure that decision makers have a single page view of staffing, demographics and recruitment.

Features

View Staff Demographics

Get all your staff data on age, gender, tenure, and location on one page for easy and effective analysis.

Age Band Reporting

Band reporting helps you connect the dots between staffing trends and better understand the needs of your staff.

Manage Contracts

Keep track of your staff contracts and be automatically notified when contracts are due to end or be renewed.

Compliance Checks

Ensure compliance with staff checks such as working with children and be able to schedule renewals ahead of time.

Leave Management

Easily review leave snapshots to understand how much accrued leave staff members have, and the total leave days across your workforce.

Planner360

Workforce management has a variety of problems within any school. Absenteeism, over or under-staffing, correctly tracking time and ensuring compliance with labour regulations are all issues that stem from the inability to collect, visualise and analyse employee data.

By measuring these KPIs, a school can reduce labour costs and the costs of compliance or non-compliance. Administrators have better visibility into data and trends, and employees have the technology and best possible environment in which to do their jobs.

Increase your school's resilience with an investment into Planner360. Leverage advanced analytics and forecasting tools to predict future staffing needs and plan using historical data.

Features

Ensure appropriate skills coverage

Ensure that events have staff attending with the right skills (such as first aid training).

Visualise staff workloads

Ensure that key staff are not overburdened by visualising workloads and offloading appropriate tasks to other staff.

Rosters and Scheduling

Easily see a visual representation of staff rosters, and easily avoid staff or resource clashes.

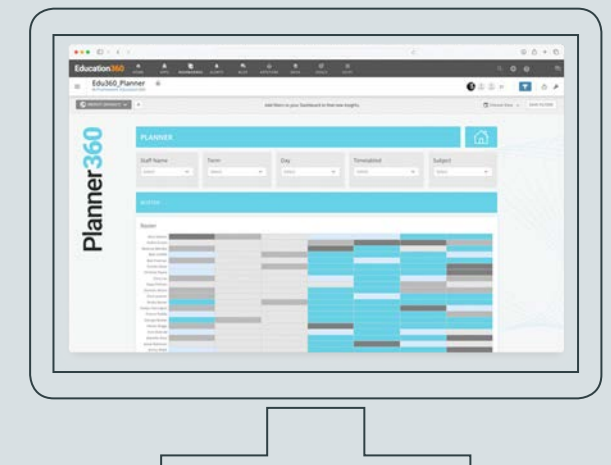

Physical Proximity

Visual maps show where staff activities are occurring on campus allowing you to reduce time in transit.

Manage substitute programs

Understand when and where staff gaps occur, and build a substitute program where teachers have the right skill sets.

Workforce planning is becoming a critical activity for schools, here's why:

- 34%** Of schools acknowledge they lack the analytical skills to effectively conduct workforce planning.
- 15%** Of schools have senior staff unable to fill selected classes due to lack of skills.
- 64%** Of schools have systems in place to know what their staff's certifications are and when they need to be renewed.

Retention and advancement of teachers is critical to the performance of schools, here's why:

- 35%** Of teachers in Australia no longer intend to stay teaching until retirement age making the market competitive.
- 9%** Of new teachers (since 2020) leave the profession in the first 5 years.
- 37%** Of teachers feel ill equipped to deal with behavioural issues they face in the classroom.

ICT360

With continual pressure on school technology budgets, it is imperative that you understand the effectiveness of your ICT investments.

From utilisation of help desk data, infrastructure loads, power usage and asset tracking, ICT360 helps you make informed decisions and better align your technology goals to the school.

ICT360 reduces your workload and helps you make sense of your data. ICT360 gives the ability to set custom alerts and be notified when KPI's are falling, growing or need attention. ICT360 gives users the ability to set their own conditions, and alerts only go out to those who need them.

Ops360

Schools collate a mountain of data relating to campus operations, so using this data to show value or information on campus operations is no easy feat. Many will be left wondering, where do I even begin?

Recognising the need to be proactive, more schools are taking the time to review maintenance needs regularly, rather than waiting until an outage to occur.

To measure success in this area, look at the total cost of repairing equipment, the cost of service and the labour hours compared to parts and strive for improvement in each of these areas. Ops360 helps make this information readily available.

Enterprises that use analytics for IT witnessed:

35%

Reduction in IT operational costs.

30%

Decrease in IT backlogs.

30%

Increase in the productivity of help desk staff.

Effective utilisation of ICT data is vital for every school. Gain insight into the workings of your help desk, core infrastructure, end user devices.

Features

Optimise IT Infrastructure Usage

Track cloud and on-premises infrastructure usage; eliminate unused backups, right size IT infrastructure and reduce costs.

Monitor Application Performance

Visualise system health, availability and outages in addition to analysing incidents and events to identify root causes faster.

Improve Threat Resilience

Prioritise unprotected devices by prevalent risks and exposure, and close gaps in your cybersecurity mesh.

Automate Service Operations

Track tickets from start to finish, remove bottlenecks, and automate processes to deliver faster resolutions.

Improve Project Outcomes

Optimise performance, increase output, and orchestrate new projects with minimal or no disruption to existing operations.

Ops360 brings together all of your campus and operations data to ensure your facility managers make the right decisions at speed.

Features

Monitor Energy Usage

By making sure your school is energy efficient, you're doing your part in becoming more sustainable for the future.

Building Utilisation

Understand current building utilisation to ensure future developments meet future requirements.

Monitor Water Use

Monitoring your water use helps you understand your usage patterns and improve inefficiencies.

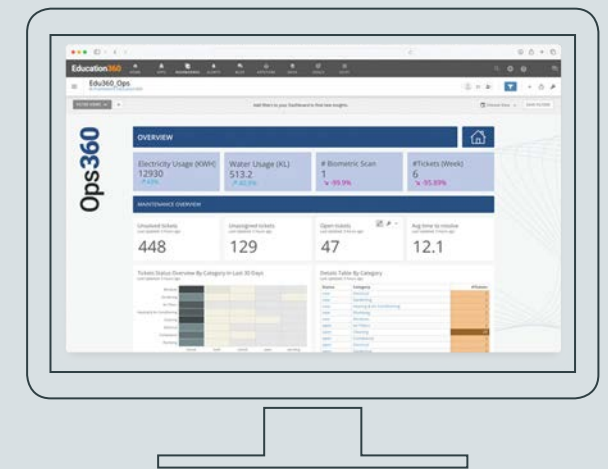

Monitor Solar Panels

Understand how much electricity your solar panels are producing to forward plan for future investment.

Maintenance Overview

Be aware of the number of open maintenance tickets as well as where these tickets are located within your campus.

Get on top of your school's operating costs, know the facts & trends:

20%

Of schools energy costs are wasted through the use of inefficient equipment.

1200

Of Queensland's 1240 state schools already use solar panels to improve their carbon footprint.

60%

Of school energy usage can be attributed to heating.

Finance360

Save valuable time with Finance360 and see all your data sources on a single page. Finance360 automates manual processes for various financial reporting needs. This includes board or monthly reporting, flash and KPI reporting, income statements, statements of cash flows, and balance sheets. It also handles budgets and forecasts, departmental reports, and tailored finance slide decks—all within a single system.

The time you used to spend putting a report together can now be spent adding value to strategic decisions for your school.

Finance360 allows schools to transform their figures into insightful reporting, that tells a story of what is really going on inside your school.

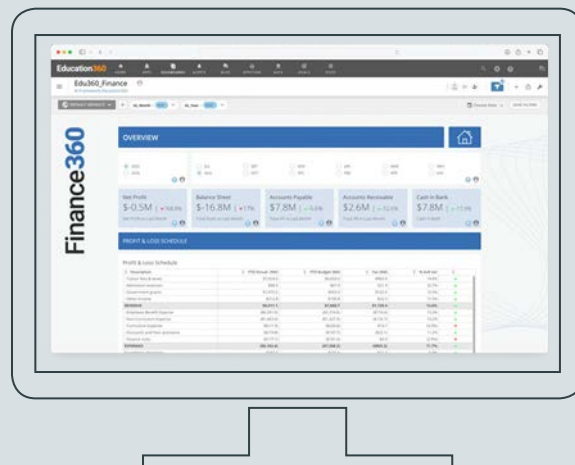

Establishing challenging, yet achievable targets for student performance is a critical component of adopting a data-led decision making culture.

Benchmark360

Take your school's measurement and planning to the next level by blending your school's internal data with major sources of state and national benchmark data to give you valuable insight into your school's current performance.

Whether it is benchmarking students, staff or the school, the value of measuring performance against local, regional and national standards provides valuable insight for directing tactical and strategic planning as you continue along the path to educational excellence.

This combined with current and historical school data builds a story of continual improvement and focus areas to target.

Schools that use analytics for finance witnessed:

- 42% More time for data insights.
- 50% Quicker availability of monthly executive reporting.
- 67% Of school leaders feel able to make better informed decisions.

Features

- Profit & Loss at your fingertips**
It's never been so easy to have a profit and loss statement at your fingertips that has accounts grouped the way you want.
- Revenue Projection**
Track the impact that changing student numbers has on school revenue in future years.
- Track payments**
Optimise the recovery of school fees from families by understanding where the problem areas are.
- Department Budgets**
Easily track how each campus or school department are spending their budget.
- Cash Balance Forecasting**
Visualise what your school's cash balance will be for the remainder of the financial year.

Features

- Existing data sets**
Benchmark360 brings in ACARA, NAPLAN, ABS and Census data, giving your own data greater context.
- BYO Data**
For multi-campus schools or members of associations, bring in aggregate data sets to compare campuses, schools or regions.
- Publish Data**
Share aggregate data via web, online and PDF.

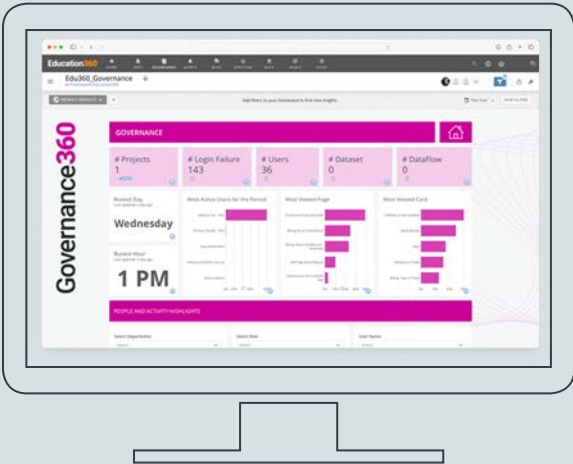

Benchmark data ensures that activities and investments are positively impacting student outcomes.

- 1.4% Growth per annum of enrolments in independent schools in Australia since 2019.
- 2% Enrolment growth in the independent sector according to ISA projections to 2030.
- 34% Of all student enrolments are Independent and Catholic institutions.

Governance360

Governance360 gives you the freedom to explore how your team is using Education360. As Governance360 is powered by live datasets with no configuration, your team can easily build cards, alerts and workflows around the metrics you want to see as well as use the pre-built dashboards.

Governance360 gives administrators a list of all their users so they can see who is in Education360 and their level of activity all in one place. Watch adoption levels and act quickly to help people get on-board by knowing login trends and seeing who still needs to log in. Keep your instance secure and make sure everyone is working at the best level.

Why track the usage of your new applications or platforms?

- 84% Of digital transformation initiatives in schools fail.
- 65% Of contact data from online web forms is invalid.
- 83% Of schools see data as an integral part of their business strategy.

Track application usage inside Governance360 to ensure you are not over paying for licences and ensure applications are being used correctly.

Features

- See Number of Users**
Use usage number to determine who needs to be on-boarded, or to track general acceptance rate of Education360.
- Understand your Datasets**
See how many different sets of data are being used within Education360 and where the data is coming from.
- See Active Users**
Determine which department or faculties are most active on Education360 and who might need additional support.
- View Most Used Reports and Cards**
Determine the value of pages or cards and gain insight to how your staff use the platform.
- Track Failed Logins**
Determine whether or not your staff are struggling to use Education360, and find a solution ahead of time by assessing the number of failed logins.

With Board360 you can aggregate and leverage your school's data to efficiently and effectively bring all of your key metrics together in one place, so your Board and ELT all remain on the same page.

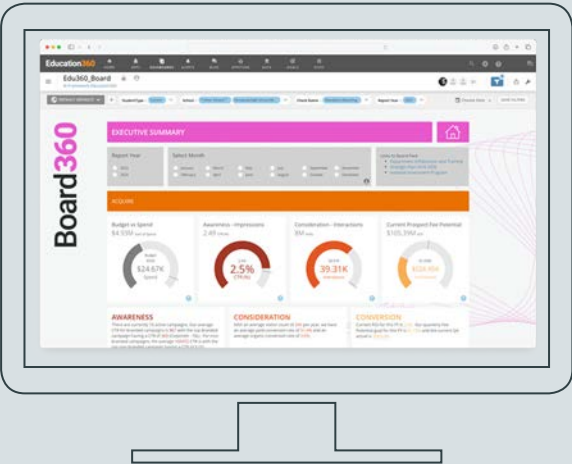

Features

- Review Board Packs anytime, from anywhere**
Your board can view the board pack using real time data from any device with an internet connection.
- Make Annotations**
Board members can add annotations to data points, for review and discussion at a later date.
- Provide Context and Meaning**
Guide people through analysis with customised, interactive data stories that combine data, content and insights.
- Right Person, Right Data**
Ensure teams have access to the right data so they can self-serve, while governing access to data that should be secured.
- Save Administration Time**
Board360 automatically updates all information in near real-time so admin staff aren't having to assemble reports.

Board360

Board360 brings you the technology, specialist services and solutions required to centralise the control of the metrics that drive an improvement in your key measures of success.

Whether you are rolling out a long-term excellence program, driving incremental strategic change, or navigating state, national or global imposing forces, timely insight to critical information on the short, medium and long term impacts of this change is vital to your board's ability to have a coherent and consistent view of your key school metrics. Information flow to the executive team and board is often bottlenecked, limiting the timely access to this critical information and insight.

School Boards play an important part in aligning the goals and strategies of the school. Examples include:

Ensuring diversity in enrolments, hiring and appointments brings stronger student results and a vibrant community.

School Boards with ready access to data and key metrics are shown to have better governance.

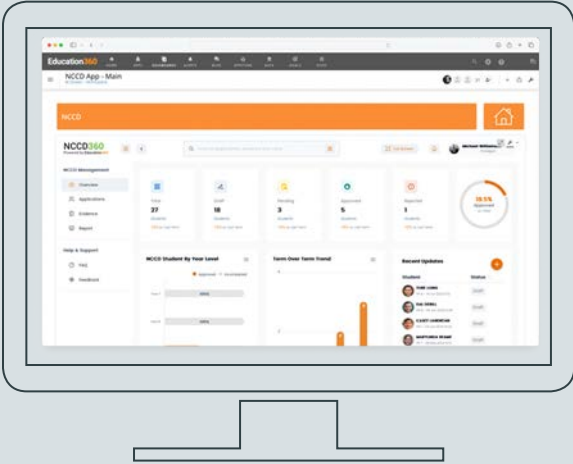

Schools without strong governance have much higher rates of project delivery failures and delays.

NCCD360

NCCD360 is your comprehensive solution for simplifying NCCD data collection and reporting.

NCCD360 streamlines your processes, maximises funding opportunities, and ensures regulatory compliance with NCCD, educators upload a variety of documents directly to student applications, including meeting minutes, learning plans, and medical reports. Everything you need is neatly organised in one record, saving time and ensuring that vital information is readily accessible.

If audited, the school can easily export data in various formats, including PDF, CSV, or Excel Spreadsheet.

- Collecting accurate NCCD data is an imperative for schools to achieve student outcomes:
- 24% Of all enroled students have a cognitive, physical, sensory or socio-emotional disability.
 - 2.2% Of all students require extensive adjustments to enable them to participate in regular education activities.
 - 10 Weeks data is required for each student's reporting in the NCCD funding program.

NCCD360 allows schools to maximise individual funding allocations while ensuring smooth compliance with reporting regulations, promoting transparency and accountability within educational settings.

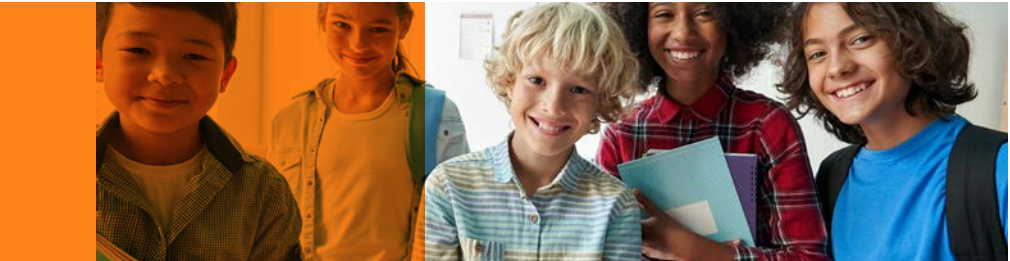

Features

-  **Easily understand your NCCD status**
From the overview screen, easily visualise NCCD application statuses, latest updates, trend data and other key metrics.
-  **Upload documents to an application**
Upload meeting minutes, learning plans, and medical reports so that you have everything you need in the one record.
-  **Easy Application Management**
NCCD360 gives you all your application data, broken down per-student, on a single, easy-to-read page for quick export and edit.
-  **Simple Data Export**
All data can be exported as PDF, CSV or Spreadsheet so that your school can effortlessly meet reporting and auditing requirements.
-  **Standalone or as part of Education360**
NCCD360 can either be installed as a point solution or is included in the Education360 Suite of pillars.

Education360 Features

In addition to the features of each pillar, Education360 provides the following benefits across the entire platform.

 Inbuilt Messaging Built-in collaboration and messaging allows your team to converse about data in one place.	 Dashboard Builder Easy to use drag and drop dashboard builder makes it easy to bring data together.	 Data Science Integrate data science models and machine learning into your decision making processes.	 Internet of Things Stream, analyse and report massive volumes of data from your school's IoT devices.
 Project Management Manage your school's data projects and tasks of your initiatives in one place.	 Role Based Security Education360's platform wide security will ensure only the right people have access to the right data.	 Data Write Back Cleanse and send data back to your school's applications and reduce error-prone double-handling of data.	 Data Warehouse Education360 organically scales and expands to be your school's centralise data-warehouse.
 Notifications & Alerts Education360's configurable alerts will automatically send you notifications when key metrics fall outside thresholds.	 Transformation Tools Education360's data transformation tools let you cleanse, blend and transform data to meet your needs.	 App Store & Development With our developer tool kit, you can also build and deploy your own apps or purchase solutions from the App Store.	 Display Anywhere Embed individual data visualisations or entire dashboards into Intranet or internet sites.
 Broadcast Enabled Display your most important metrics on monitors in your staff room, office, or any other location in your school.	 Single Sign On Integrate with your existing single sign-on solution to simplify your security policies and group management.	 Certified Content Content Certification ensures confidence that everyone is making decisions on validated data and processes.	

Case study

Penola Catholic College

Challenge

Educators at Penola Catholic College struggled to access student data spread across ten different systems, forcing them to spend time wrangling data instead of teaching.

Solution

Penola Catholic College implemented Education360, which is powered by Domo, to bring all its student data together in one dashboard.

Impact

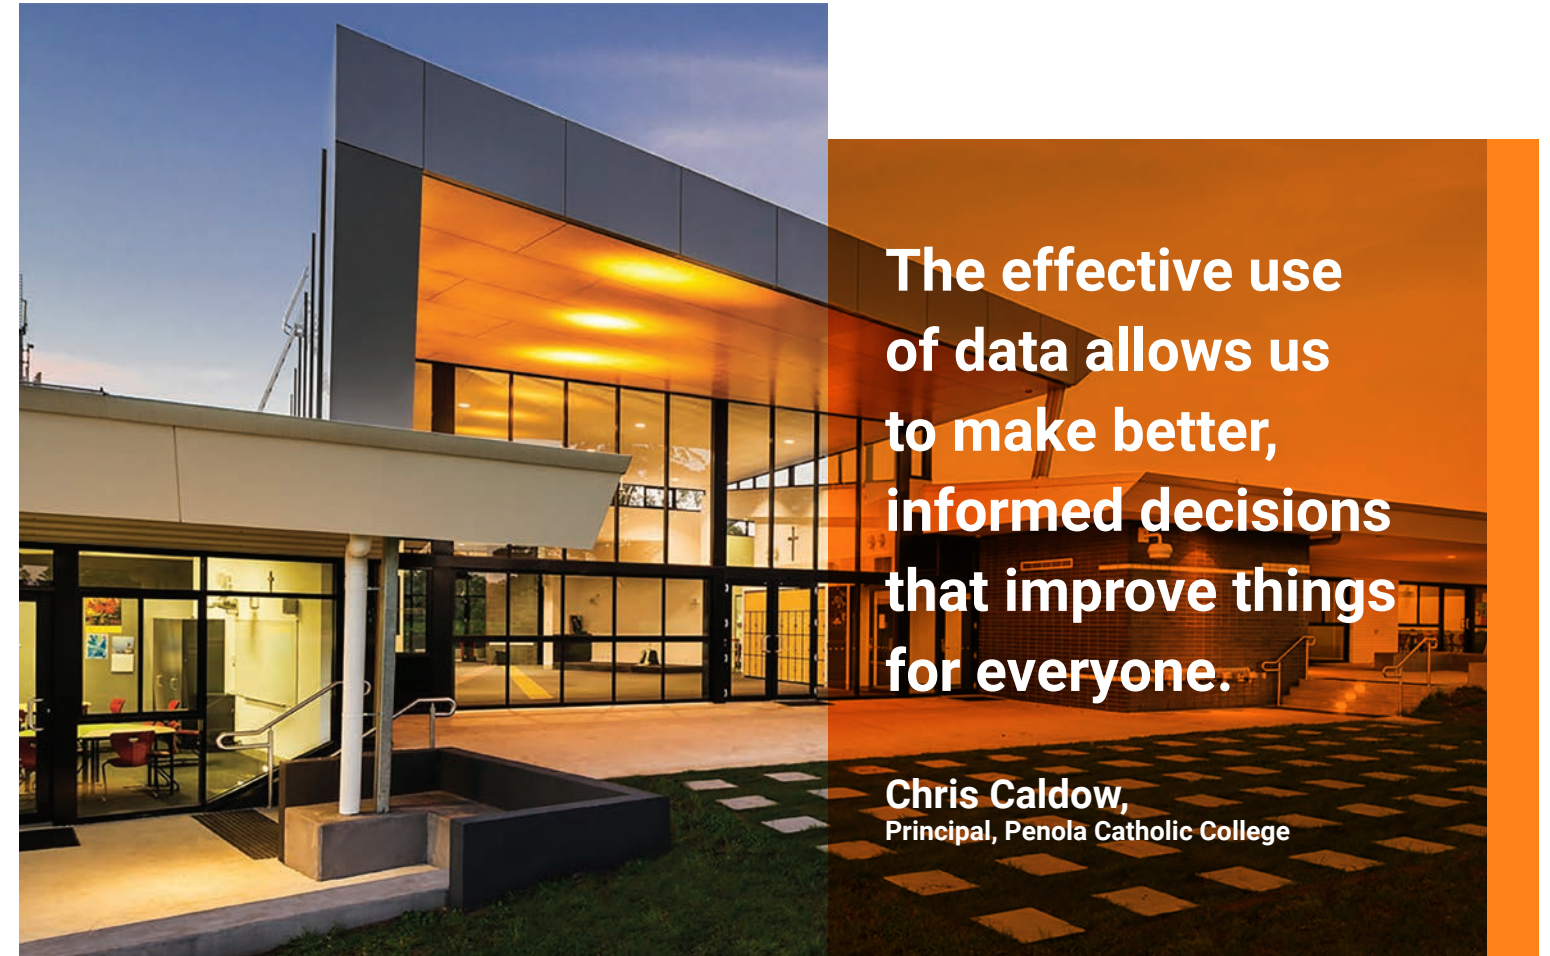

Educators can now analyse student performance at the cohort level or by individual students, allowing them to tailor their instruction.

Learn how Penola Catholic College uses Education360 to improve their insights into student performance.

Penola Catholic College is a co-educational secondary school that serves approximately 1,500 students in Years 7-12 across two campuses in the northern suburbs of Melbourne, Australia. The school attracts students from diverse socioeconomic and educational backgrounds throughout the city, while almost half come from families that speak another language than English.

With such a wide-ranging student population, Penola Catholic College's administrators and teachers know that a one-size-fits-all approach would result in students falling through the gaps. Instead, they use data powered by Education360 for a customised educational approach to help each student reach their full potential.

"Data is critical to understanding each student's learning journey," said Vera Treloar, Deputy Principal.

"Before Education360, educators struggled with scattered data, making it hard to gather meaningful insights and support at-risk students promptly", said Anthony Austin, IT Manager.

To leverage data effectively, Penola Catholic College worked with 9X5 Consulting to integrate Education360, powered by Domo. "We needed a platform that handles data from various sources and is easy for staff to use," said Matthew Willie, CEO at 9X5 Consulting.

Thanks to Education360, Penola Catholic College now has a unified dashboard for instant, real-time access to all student data. "Teachers can see class summaries

or drill down to individual students," Austin said. This platform collects and visualises data from multiple sources, helping instructors quickly identify areas for action.

"The biggest benefit is making better decisions for the school overall," said Principal Chris Caldow. Teachers can differentiate instruction based on student data, ensuring no gaps in achievement. The platform also helps identify potential issues early by tracking academic and attendance patterns. "Effective data use allows us to make better-informed decisions," Caldow said.

Thank you

We would love to demonstrate how Education360 delivers meaningful improvements to student performance and well-being. Contact us today!
