

UNI PACKERS

**The ultimate
solution
for levelling,
aligning and
packing.**

OUR MISSION

To have an uncompromising high standard in everything we do. Grounded on strong principles, we meet and exceed our customers' expectations. ”

OUR VISION

To be the preferred and selected supplier for quality products in the Plastic Building Supplies industry, through exceptional quality products and service.”

WELCOME

A NOTE FROM ALLMOULD PLASTICS

Allmould Plastics is an Australian owned **plastic injection moulding business** located in Orange NSW supplying **plastic hardware products** to some of the largest hardware stores and distributors throughout Australia, primarily our **Plastic Uni-Packers**.

Since 1995 we have developed and grown into a strong customer service orientated business focusing on fulfilling our customers' needs and desires beyond expectation.

Our fast and reliable service & exceptional quality product makes your experience with us seamless and positive every time.

We are continually improving our products and service, researching the most **effective packaging solutions, faster lead times & product design**. Be sure to contact our friendly team at Allmould Plastics; we look forward to working with you.

OUR VALUES

- Service
- Quality
- Reliability

“DESIGNED NOT
TO ROT, SHRINK
OR EXPAND.

UNI-PACKERS
WITHSTAND
BEING SAWN,
NAILED, DRILLED
AND SCREWED.

”

Hear what our happy customers have to say.

I have found that the Uni-packers are by far the easiest and strongest plastic packers to use, the accurate sizes and colour coding make them a 'must have'. A highly recommended product.

- Rohan, Victoria

Uni-packers are our second most invoiced product on the shelf.

- Steve, Sydney NSW

Uni-Packers are the best quality Packer on the market today.

- Andrew, NSW

ABOUT OUR UNI-PACKERS

These polypropylene horseshoe Uni-Packers are fully **manufactured in Australia** and 100% water and rust resistant. This product is specifically designed not to rot, shrink or expand and are also able to withstand being sawn, nailed, drilled and screwed proving them to be the most robust and durable plastic packer available and your ultimate construction solution for levelling, aligning and packing.

Professionally tested by NATA, our Uni-Packers **high-compression strength** means they can be used in many adverse applications.

HOW ARE THESE MADE?

The Uni-Packers are injection moulded. Injection Moulding is a process in which raw plastic material is fed into heated barrels, melted and forced under pressure into a mould cavity where it cools and hardens to the shape of the mould. The component is then ejected from the machine.

Find more information about our capabilities at www.allmouldplastics.com.au

PACK SIZES & PACKAGING OPTIONS

We manufacture over 20 different size packers. Our 75mm & 90mm length Packers being the most popular and ranging from 1mm through to 20mm thick. Please see below our extensive range of packing solutions and pack sizes.

OTHER PRODUCTS

UNI-HOOK — SAFETY LEAD HOOK

The Uni-Hook is a robust and convenient, multipurpose hook that is specifically designed to safely suspend electric leads, data cabling, air hose and much more in industrial, commercial and construction situations.

The greatest strength of the Uni-hook is the safety, versatility and function it provides for the safety conscious site or factory manager. Elevation of cables removes trip hazards from the work site floor.

The Uni-hook will assist in meeting the stringent WHS requirements as set out in AS/NZS 3012:2003 2.6.9 which requires the protection and suspension of leads and cables. It combines a versatile lightweight design, with high quality manufacturing to ensure durability through a long service life.

The Uni-hook can hold up to 8 cables. The unique design allows elevation from a variety of fixtures and fittings including over doors, walls, scaffold pipes, fences etc. Another feature is the keyhole fastening position; large 50mm hook capacity and non-conductive polymers. It is also UV stabilised and has a high visibility colour.

WHAT WE OFFER

CUSTOM MOULDING

In addition to our Plastic hardware Range, Allmould Plastics also specializes in Custom injection moulding. We have the expertise and the facility to take your project from initial idea right through to finished product and we are passionate about bringing a company or a person's dream into a reality.

QUALITY MANAGEMENT CERTIFICATION

Allmould Plastics has always assured our clients high quality products and has recently implied the world recognized quality management system ISO 9001 2015.

OUR RECYCLE CHOICE

Allmould Plastics is committed to the future and believes environmental issues are of vital importance. This has resulted in the establishment of our own recycling plant onsite in which all waste material is granulated and reused in products that do not require 100% virgin material. We believe in doing this, we are considering the environment and reducing landfill.

OUR DIVISIONS:

AMP Circular is not a typical business but rather a platform that sits under the Allmould Plastics Group to manage circular and recycling programs through the public and private sectors in Australia.

Allmould Plastics is heavily involved in the development of plastic construction parts within the **Construction** Industry. With innovation being our key priority, we have been involved in many product developments in the past including mechanical fastening, gas, electricity, plumbing, construction framing and windows componentry etc.

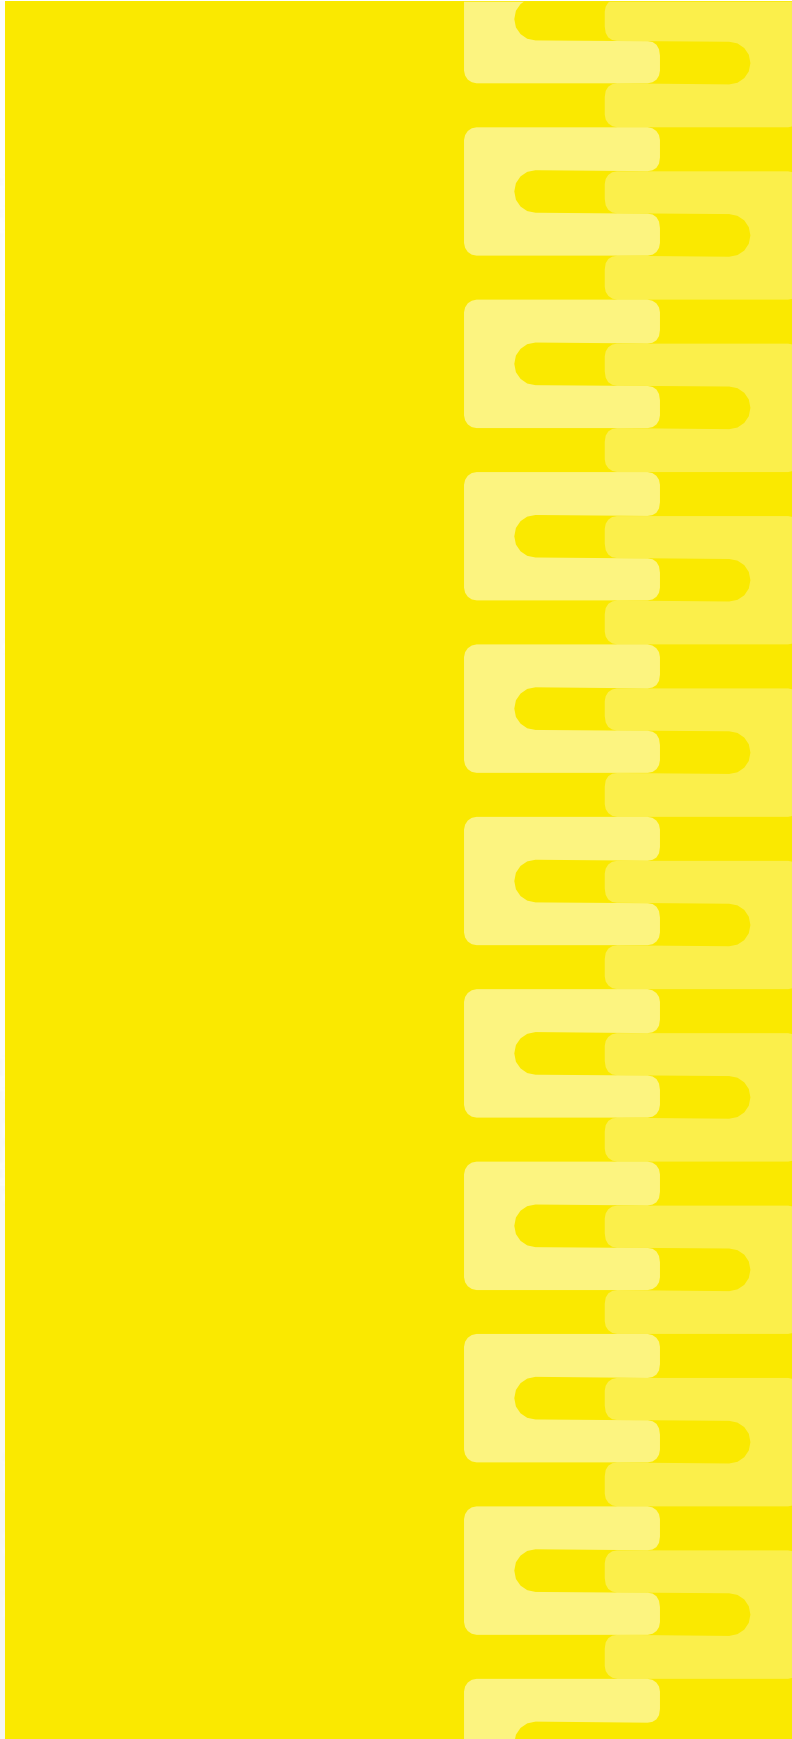

Allmould Plastics is extremely passionate in relation to **Medical** component development, not only for the human side of this industry but also Veterinary. We have been included in some of Australia's most innovative medical device programs such as the AusGov Defence Unit, First Aid, Orthopaedics etc.

We provide high end closures and **packaging** solutions to a various range of markets including food, dry goods, telecommunications, chemicals, beverages etc.

Our machine capacity dynamically adapts to various requirements. Our ability to process all plastics is further highlighted through a **specialised** focus on engineering plastics.

**Unipackers are manufactured in
Australia by Allmould Plastics
Group**
