**COMPLETE HEALTH
OPTIMIZER**
for Livestock

A NATURAL MULTIFUNCTIONAL PREBIOTIC FEED SUPPLEMENT
HOLISTICALLY DESIGNED TO IMPROVE THE HEALTH AND WELLBEING OF YOUR LIVESTOCK

CATTLE • DAIRY • PIGS • BIRDS & POULTRY • SHEEP • GOATS • AQUACULTURE

ANUERA® ANIMAL NUTRITION | Complete Health Optimizer for Livestock is a multi-functional feed supplement holistically designed synergistically for all animals.

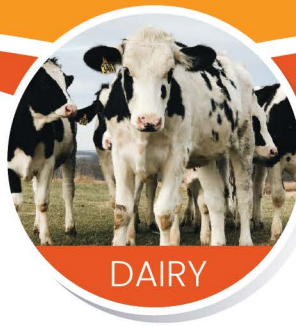

Our 100% Natural Product was created in collaboration with the world's leading Veterinarians and animal health scientists in both Australia and the USA to assist in the health and wellbeing of the livestock industry over 20 years ago and is still the superior product in the marketplace today.

ANUERA® Complete Health Optimizer for Livestock is a unique natural synergistic blend of 100% pure high-grade heat treated probiotic and yeast cells, feed enzymes, nutrient rich blended and balanced edible microorganisms, biological active peptides, protein, complete B vitamins, minerals, 18 amino acids, high quality fibre, immune polysaccharides, short-chain oligosaccharides and mycotoxin binders. This multifunctional probiotic feed supplement may assist in digestion and optional health and wellbeing of all animals.

Using the highest quality ingredients is a characteristic of ANUERA® Animal Nutrition animal supplements and helps this product work as effectively as it does. **ANUERA® Complete Health Optimizer for Livestock** is the complete ration balancer.

TESTS AND TRIALS WERE CONDUCTED ALL OVER THE WORLD ON THE BENEFITS OF THIS PRODUCT, ACROSS AN ARRAY OF INDUSTRIES INCLUDING DAIRY, BEEF, CATTLE, SHEEP, AQUICULTURE, BIRDS AND POULTRY, BREEDING AND THE RACING INDUSTRIES. THESE RESULTS WERE CONSTANT WITH EVERY BREED OF ANIMAL AND IT WAS DISCOVERED THAT THE LONGER AN ANIMAL IS ON THE PRODUCT THE BETTER THE RESULTS.

100% NATURAL • NO RESIDUE • NON DRUG RESISTANT

Dairy cattle are like a factory not a mine. They need the correct inputs to produce the desired output.

- » Increased milk yields
- » Reduction in Somatic Cell Counts
- » Increase conception rates
- » Improvement in health and wellbeing

All are achievable with the correct nutrition.

ANUERA® Complete Health Optimizer for Livestock is the completes ration balancer.

- » Better feed conversion
- » Quicker weight gains
- » Higher quality meat

These are three desires of farmers worldwide. Numerous research indicates that substances such as those contained in **ANUERA® Complete Health Optimizer for Livestock** show positive effects on total health and digestive sanction.

Pig farmers, like beef and dairy combined require not only good feed conversion, high quality meat and increased immunity but also high milk yields of a good quality from lactating sows to ensure large healthy piglets. **ANUERA® Complete Health Optimizer for Livestock** is beneficial to: Lactating sows, Dry sows, Gilts, Creep, Weaner, Porker and Fishisher.

Immunity digestive efficiency, meat quality, morality rates and growth rates are controversial topics especially in the poultry industry. With the high risk of disease and the desire for quick growth rates the application of antibiotics is considered common and readily practiced. By enhancing the proliferation of beneficial bacteria, the birds immune function can combat more illness and disease naturally, increasing the antibiotic effectiveness when required for more serious circumstances, while still enhancing growth rates.

OTHER BENEFITS OF USING OUR PRODUCT

- » Stops pathogens from forming and stops most disease and gives overall better wellbeing to animals.
- » Minimizes anti-inflammatory reactions.
- » Provide anti-oxidant properties to reduce cell damage.
- » Anti-stress reaction (calming effect).
- » Optimal functioning of the liver.
- » Enhance immune system.
- » Reduce the incidence of digestive problems (diarrhoea).
- » Enhance immune function and improve resistance against disease.
- » As immunity adjuvant agent, it could enhance successful rate of immunization.
- » Protect the liver and reduces the occurrence of liver ascites.
- » Improve the sanitary level of corral and fowling, consequently effectively reduce occurrence of digestive system disease and respiratory system diseases.
- » Reduce the occurrence of various diseases such as bacterial diarrhoea, viral diarrhoea, new castle disease, egg drop syndrome, and postpartum syndrome of dairy cows.
- » Enhance health levels of young animals, optimal growth speed during later growth stage, improved animal growth performance indexes.
- » Selectively stimulate the reproduction of beneficial bacteria in the gut as the same time restrain the breeding of harmful bacteria, consequently maintain an optimum bacterial community environment in animal gastrointestinal tract.
