

EPICOAT RANGE HOOD COATING

EFFECTIVE CLEANING OF COMMERCIAL KITCHENS RANGE HOODS

OUTCOME BENEFITS ADVANTAGE

Significant labour reduction versus caustic and toxic cleaning products. OH&S Safe – existing cleaners can be dangerous and toxic.

Epicoat is non toxic, safe to use indoors with no odours.

Long lasting – 6 months before retreat required. Simple re-application, peel off and respray only saving time and money.

PRODUCT OVERVIEW

AerisGuard™ Epicoat is a world's first coating specially designed for the management of commercial kitchen range hoods.

Epicoat is quickly and simply sprayed onto the cleaned surfaces using airless spray equipment.

Epicoat is formulated to ensure easy, clean coating. Upon the completion of application, cooking can commence, there is no need to wait for drying.

At the next scheduled clean **Epicoat** is simply peeled from the coated surfaces in large, easily removed sheets, taking with it all deposited fats, oils and other debris.

The contamination coating is put into garbage bags for disposal as general waste. **Epicoat** is then reapplied to the clean surface.

- ✓ **Water base coating**
- ✓ **Flexible and Odorless**
- ✓ **Easy to apply**
- ✓ **Non toxic**
