STEEL WINDOWS AND DOORS

RESIDENTIAL PORTFOLIO

ABOUT US

At STRUC, we know steel.

We offer a complete in-house steel solution – including design, Measuring, fabrication, steel processing, sand blasting, powder coating delivery installation and glazing of steel windows and doors.

STRUC steel is proudly handcrafted in Melbourne by our team of specialists. While some steel window and door companies outsource their fabrication to offshore manufacturers, we create everything in-house, including treatments and coatings. Nothing we do is mass produced. Each product is one-of-a-kind, crafted from the highest-grade steel to create a bespoke statement piece that lasts.

No two applications are the same, so neither are we. Our mild steel extrusions are custom made according to our STRUC design specifications, and specifically tailored to suit your individual project. We work closely with you from concept design through to installation, providing advice on budget, design, profile choices and methodologies, to guarantee an outcome as durable as the steel itself.

It's simple, we believe in doing things right to produce quality steel solutions.

SERVICES

STRUC offers an all-in-house approach acting as a single source provider for all your steel requirements, including:

- Design and concept consultation
- Steel selection and profile choices
- Prototyping
- Cad and drafting services
- Fabrication
- Folding and Guillotining of plate / sheet metal
- Sandblasting & powder coating in house
- Installation
- Glazing

BENEFITS

Flexibility - We cater for any required site penetrations, structural works, installation & glazing (all by STRUC).

Streamlined Delivery - Our ALL in-house approach means we can offer fast-tracked production and installation, achieving much shorter lead times than our competitors.

Lower costs - We don't have to outsource or sub-contract any part of the process resulting in a cost effective solution, we handle everything in house ourselves.

Less risk - We have complete control over steel selection and fabrication, sand blasting and powder coating meaning you always know what to expect.

One of a kind – STRUC is the only steel window and door manufacturer in Australia to have in house sand blasting and powder coating facilities, saving 2-3 weeks turn around just in this component.

Superior quality - STRUC steel products exceed all Australian standards, meaning a high-quality, long-lasting finish.
