## Water Rhythm Collection

Rimex are excited to announce the launch of a new product range under the **Water Rhythm Collection**.

These 'free form' designs are produced through large scale, 3-dimensional manipulation of stainless steel sheets. The final result leaves a distorted visual effect through a combination of broken reflections and its play on light.

Available as standard in the natural silver **SuperMirror** finish and with the option to combine this with the **T22 Mirror** range of coloured finishes, the designs are available in a diverse range of options.

From a few sheets for feature walls to columns, ceilings and larger scale cladding applications the **Water Rhythm** range allows designers and specifiers further movement away from the conventional.

- ✓ Available in 304 (1.4301) and 316 (1.4404) grades.
- ✓ One standard pattern option available; Oasis.
- ✓ Available in a variety of thicknesses from 0.8 – 1.5mm.
- ✓ Oasis SuperMirror; 2,500 x 1,250mm sheets at 0.8mm thickness always in stock.
