# DO YOUR IDENTIFICATION ASSET SIGNS NEED UPDATING?

We are finding that mining and construction sites now require all vehicles to have an identification asset number. The requirements are simple, the sign must be clearly visible and in most cases, reflective.

We manufacture high UV-resistant, laminated stickers, metal, and magnetic signs printed on Class 1 and 2 material.

We can custom-make these signs to your size, lettering and colour specifications.

**For this month only we are running a 10% off all ID Asset Signs!** Make the most of this discount and book your ID Asset Sign job today.

## Are your Identification Asset stickers peeling off?

Mining vehicles are subject to being washed with high-pressure hoses almost every day! A lot of **lower-quality stickers** can't handle this kind of force and they peel off over time. This won't happen with our stickers, our manufacturing process includes laminating which increases the sticker's life span.
