

## Formwork Release Agent

[www.nova-tec.com.au](http://www.nova-tec.com.au)

1

### LOCAL

Developed and manufactured in Australia.

2

### ETHICAL

Eco friendly and 100% biodegradable, good for the planet.

8

### SAFE

Water based non hazardous formula. Safe for the environment and water ways.

3

### EFFICIENT

Recommended dilution up to 1:4, ER to water, coverage of 20-50m<sup>2</sup>/L.

7

### VERSATILITY

Suitable for metals, PVC, plastic, fibreglass, rubber, plywood, timber & polystyrene.

4

### PRODUCTIVITY

Saves hours on clean-up with just a thin application via spray bottle.

6

### AVAILABILITY

Available in 20L, 200L & 1000L (IBC).

5

### SMART

Protects & prevents concrete from attaching to surfaces, shields against the elements.

## EASY | ETHICAL | ECO

The Easy, Ethical, Eco Choice for you and the environment. Made in Australia.

### The Easy, Ethical, Eco Choice

Eco Release is an industrial grade, water-based universal agent designed as a protective shield against the elements. Developed and manufactured in Australia, it is 100% biodegradable and an eco-friendly solution for preventing concrete from attaching to surfaces. Eco Release makes it easier to clean-up after concrete placement. It also minimises the need for the use of harsh chemicals to remove 'severe' concrete. The concentrated formula can be diluted up to 1:4 ratio with water and is best applied to a clean dry surface with a spray applicator for even coverage.

### Advantages:

- Protects and prevents concrete from attaching to surfaces including metals, PVC, plastic, fibreglass, rubber, plywood, timber and polystyrene.
- Shields against the elements, providing a waterproof protection and extending the life of products.
- Concentrated mix, extended with water dilution.
- Thin even coat with quality sprayer.
- Non-hazardous & non-flammable.
- No greasy film residue.
- Water based and water clean-up.
- No harsh fumes or unpleasant odour.
- 100% Biodegradable - Degrades in the concrete curing process leaving surfaces clean - Safe for the environment and waterways.
- Quick, easy & economical.
- Visible on application, transparent when dry.
- Non-staining formula.
- Attaches to both painted and unpainted surfaces.
- Indefinite shelf life if kept under recommended conditions.

### Key Features

Coverage	20 - 50m <sup>2</sup> per L (depending on rate of dilution & surface porosity)
Available Sizes	20L, 200L and 1000L IBC
Dilution	1:2 on porous surfaces / 1:4 on non-porous surfaces
Storage	Store in a cool, dry, well ventilated area, undercover and out of reach of children.
Appearance	Free flowing creamy liquid, coffee colour.
Application	Spray application recommended for even coverage. Brush, cloth or dipping optional.

See label for instructions. MSDS available at [nova-tec.com.au/formworksystems/accessories](http://nova-tec.com.au/formworksystems/accessories).
