

Slanted Design

The slanted low ankle design makes it easier for you to slip on and off.

Water-repellent Technology

High-quality sheepskin is treated with a water-repellent surface coating during the tanning process. Small water droplets automatically gather into large droplets and slide off, preventing penetration by common stains. It is easy for you to clean and maintain the boots.

Prevent
Stains

Note: While water splashes will slide off the shoe surface, it is not recommended to wear them in rainy weather to avoid soaking.

Australian Merino Sheepskin Wool

Crafted with the finest Australian Merino sheepskin, which offers sweat absorption, breathability, and versatile functionality to meet fashion demands across different seasons and occasions.

Lightweight EVA Outsole

The outsole is made with wear-resistant EVA material and specially designed with textured anti-slip patterns for excellent traction. Its lightweight and comfortable property, offering effortless walking experience.
