GPS Communications Hub

The RVsecure GPS Communications Hub is an optional plug and play GPS and 4G system that will add tracking and communications to your RVsecure alarm system to provide you with a completely integrated security solution. There are no complex systems for you to set up or multiple providers for you to coordinate with, we have done all of the hard work for you to deliver peace of mind straight out of the box.

Alarm Integration

The RVsecure GPS Communications hub is fully integrated to the RVsecure alarm system and the online tracking and alert system

Alarm Activation's

Activation signals are sent via the GPS Communications hub to our servers and then to you. No need to mess around signing up to third party sites

4G / 3G

The GPS Communications hub has the best coverage with Telstra network 4G LTE and a 3G fallback should the 4G system not be available

Live Tracking

When towing is detected whilst the alarm is armed the GPS Communications hub changes to live tracking

Free Mobile App

Receive alarms, alerts and track via our free Android mobile app

Geo Fence

Set up Geo Fence on our system to alert you if your vehicle goes outside the designated area

Battery Fail / Cut

The GPS Communications hub sends an alarm signal if your battery fails or is disconnected

Battery Backup

The GPS Communications hub has an inbuilt battery backup so it continues to provide signals and tracking in the event that the main battery has been disabled

Push Notifications to App

Alarm activation's are sent to your Android mobile phone via push notifications

Email Notifications

Alarm activation's are sent to you via your email

Optional SMS Notifications

Alarm activation's are sent to you via SMS for a faster notification

Fixed Cost

All of our plans are fixed cost for you and include all tracking and data. There are no 'activity credits' or other fees
