## Jaden Dredge Cutters

Neumann Equipment manufactures the full range of Jaden dredge cutter units. These can be fitted to most cutter suction style dredgers.

Jaden dredge cutters have reliably and efficiently serviced the dredging industry dredges around the world for over 30 years. The range and versatility of the Jaden series 15, 30, 60 a 120 are designed to suit pump sizes up to 450mm.

Jaden style cutters work toward the face of the material pulling the dredge to the direction of cut and directing the material towards the suction chute. These cutters allow the dredge to be operated with or without spuds.

They are manufactured from high quality components and will provide many years of dependable service.

All of our dredge cutter designs are verified using Finite Element Analysis (FEA). They are Built Tough and Designed to Last!

### Standard Inclusions:

- Hydraulic drive motors.
- Heavy duty customised gearbox to suit cutter applications.
- Suction chute to suit pump intake.
- Ground engaging teeth (GET) and adapters to suit specific application.
- Carbon steel construction.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine marine coatings.

### Available Options:

- Customised ladder mounting system.
- Application specific wear packages, including hard facing, wear plates, GET, knife edges and chocky bars.

Please contact us by phone or email to discuss your dredge cutter requirements.
