

Water-repellent Shoe Upper

High-quality suede is treated with a water-repellent surface coating during the tanning process. Small water droplets automatically gather into large droplets and slide off, preventing penetration by common stains. It is easy for you to clean and maintain the boots.

Water-repellent Surface

Prevent stains

Genuine Sheepskin Wool

Crafted with the finest Australian sheepskin wool, which offers sweat absorption, breathability, and versatile functionality to meet fashion demands across different seasons and occasions.

Lightweight Rubber Outsole

The outsole is made with wear-resistant rubber material and specially designed with textured anti-slip patterns for excellent traction. Its lightweight and comfortable properties offer an effortless walking experience.

The Texture and Warmth of Natural Sheepskin

Australian sheepskin is highly breathable. It has unique moisture-wicking property that keeps your feet cool in summer and warm in winter. It is so comfy as if walking on a soft wool rug.
