sanctum
Sustainable Organics

*Inspired by the elements of the sea
and hinterland surrounding Byron Bay
Australia, Sanctum is created from only
the finest organic and natural ingredients.*

Born out of a day spa in 1992, Sanctum was a pioneer in the natural, personal care industry. Inspired by the purity and tranquility of Byron Bay Australia, Sanctum was developed by a biochemist whose dream was to create a line of personal care products that were effective and natural.

In 2005, Sanctum realised the need to refresh their formulas. Natural was not enough anymore and the decision was made to become certified organic. It took over two years to improve the company's manufacturing facilities and formulations to meet the strict, world leading, Australian Government standard which is independently audited by the Organic Food Chain. Sanctum's vision was to create a range that was as pure as possible while retaining the effectiveness synonymous with the Sanctum brand. As a result, Sanctum is now a certified organic and 100% naturally derived range that has the highest level of purity and integrity without jeopardizing the emollient effects on the skin. Suitable for the whole family with a range including skin, body, hair, men and baby care products. Distributed around the world, you can now take home your own little piece of affordable *pure, natural therapy*.

Sanctum's strong belief is that all products should abide by
