

AMS DRILL PIPE

Australasian Mining Services

www.austms.com

AMS manufactures a complete line of quality drill pipe and associated products in Perth, Western Australia.

Drill pipe is constructed using 4140 alloy mid sections along with hard-faced tool joints to minimise wear and extend pipe life and performance.

AMS has the capability and capacity to manufacture drill pipe ranging in diameter from 88.9mm to 273mm to suit any configuration of drilling rig. In addition, all drill pipe is serial numbered for traceability.

AMS maintains minimum stock levels of the most common drill rig configurations to eliminate lead times and better support the drilling industry.

All industry standard threads, including BECO, IF, API Reg, DIBH and CUBEX are manufactured using certified gauges, ensuring conformance to ISO 9001 quality standards.

All drill pipes exceed API minimum standards for concentricity.

ADVANTAGES

- Local manufacturer
- Customisation available
 - Material
 - Hard facing
 - Thread
 - Size and dimensions
- Drill pipe care and services
 - Straightening
 - Refurbishing
