

everescents[®]
organic hair care

pure. organic. australian.

As the leading Organic brand in Australian salons, EverEscents is much loved for our ethical, open and honest approach to manufacturing a range of hair care products that are beautiful, sustainable and effective.

With a sense of style, luxury, elegance and quality, EverEscents has consistently set the standard and led the way for others to follow. EverEscents is your ticket to Organic formulas that address all of your hair care needs.

EverEscents Borne By Nature

The EverEscents research and development team have discovered many new and innovative ways to develop modern product formulas that harness the power of Certified Organic ingredients. Our beautiful products have been hand crafted and refined in the laboratory of a Certified Organic factory in Australia. EverEscents products contain at least 76% and up to 96% Certified Organic ingredients, and most products contain 100% naturally derived ingredients.

EverEscents is committed to reducing our carbon footprint and having a positive impact on our climate and environment. We are proud to purchase one tree every business day of the year, helping to reduce the amount of carbon in the atmosphere. We also support Carbon Neutral's Plant-a-Tree program by planting a new native Australian tree for every new salon who stocks our products. That's over 500 trees planted every year!

To read more about Carbon Neutral's amazing work, go to www.carbonneutral.com.au

EverEscents is 100% Australian Made & Owned with all products being manufactured in a Certified Organic factory in Australia.

EverEscents is a Vegan Friendly Certified company and offers a range of products that comply to Vegan requirements. Look for our logo throughout this booklet. For more information visit www.safecosmeticsaustralia.com.au

The EverEscents head office is proud to have active recycling strategies in place to further reduce our carbon footprint.

We are so thrilled to announce that after much research, testing and trialling, we are transitioning most of our plastic, refillable, EverEscents bottles to 100% recycled land waste plastic.

Part of the EverEscents commitment to the environment is to be 100% self-powered. Our office and factory have enough solar power panels to generate more than our needs, with our excess power fed back to the grid.

The team at EverEscents have a passion for ethical and cruelty-free manufacturing. To show our commitment, EverEscents has obtained official accreditation from Safe Cosmetics Australia. To find out more go to www.safecosmeticsaustralia.com.au

Further to this, EverEscents is concerned with the devastation caused by the deforestation occurring due to the production of palm oil and therefore we choose not to use ingredients that may be derived from palm oil wherever possible. EverEscents is also a contributing member of The Australian Orangutan Project and have adopted an orphan Orangutan named Popi.

To find out more go to www.orangutan.org.au

For more than 17 years EverEscents has been supporting Camp Quality by donating 5c from every product sold. Camp Quality is an Australian charity giving kids facing cancer the chance to be kids again. Alongside Camp Quality, we believe kids impacted by cancer should have every opportunity to thrive.

Camp Quality's services and programs are made specifically to help kids aged 0 - 13 dealing with cancer (either their own diagnosis or someone they love). It's aim is to change the cancer story for kids and their families by creating positive memories.

As a corporate supporter of Camp Quality, EverEscents encourages everyone to help make a difference and check them out at www.campquality.org.au

EverEscent's Brings You Truth In Labelling

EverEscent's Organic Hair Care products feature labels that include clear information never before seen on any other hair care brand. Each label clearly states the Vegan status, amount of Certified Organic content and the purpose of each ingredient chosen.

'Buyer beware!' – Look out for other products that claim to have removed a toxic ingredient yet have simply replaced it with another less known toxic ingredient! If you see 'Paraben free' on a label look out for these replacements;

- * DMDM Hydantoin = Formaldehyde preservative
- * Diazolidinyl / Imidazolidinyl Urea = Formaldehyde preservative
- * Methylisothiazolinone / Methylchloroisothiazolinone = toxic preservative

LEMON & SANDALWOOD CLEANSER

***Gently cleanses & balances scalp
with virtually no lather***

A luxurious no-lather cleanser designed to remove product build up and clarify the hair and scalp with a lower pH level than traditional shampoos.

EverEscent's Cleanser gently opens the hair cuticle to allow for effective cleansing, whilst preserving the condition and structural integrity of the hair.

Featuring the aromatic and healing benefits of Lemon-Scented Tea Tree and Sandalwood essential oils with Certified Organic Avocado Oil and Shea Butter, EverEscent's Cleanser is skin care for the scalp.
