# HOW TO USE: AQUATIC BARLEY STRAW PELLETS

For best results, replace pellets once a month.

Ensure filtration bags are not packed too tightly.

It is important the water be able to flow freely in and around the pellets.

## HOW MUCH TO USE:

For best results, use immediately after an aquarium or small pond clean or re-fill.

Container Size	Water Volume
100g	750L
475g	3,560L

## APPLICATION RATES:

*The Algae Treatment Experts*

### Aquatic Barley Straw Pellets

### Application Rates:

Where to Use	How Much to Use	How to Apply	How Often to Apply
Fish Tanks, Aquariums and Small Ponds	10g per filtration bag can treat up to 75L of water.	Simply weigh out the pellets and place them into the bags supplied. Submerge them directly into the water to be treated.	Replace monthly, as needed.

#### For Best Results:

Apply near well oxygenated areas - preferably close to your filtration system or where there is moving water.

Do not pack filtration bags too tightly. It is important that water be able to flow freely in and around the pellets.

*\*Always read the product label for directions.*
