MY PREFERRED CHOICE

**WHEN IT COMES TO DRY MIX
THERE'S ONLY ONE**

A CONVENIENT AND USER-FRIENDLY SOLUTION FOR
PROFESSIONALS AND EVERYDAY DIY HANDY-WORK

CONCRETE

Approx. 102 x 20kg bags = 1m³

OUR INNOVATIVE Weatherproof Packaging

- ✓ Can be stored outdoors (unopened) in all seasons
- ✓ Prevents leakage of product and excess dust
- ✓ Improved shock and tear resistance, reducing wasted product

25MPa

SMALL PATHS

SMALL SLABS

GARDEN EDGING

HIGH PERFORMANCE | SUPERIOR QUALITY

OneMix Concrete is a mix of high quality cement, aggregate and sand formulated to achieve a compressive strength suitable for general concrete applications. This product is a convenient solution for many small concrete projects.

Available in: **20kg or 30kg bags**

WHY YOU NEED THIS PRODUCT

- Long-lasting durability for wear and tear
- Ready-made blend of high quality cement, aggregate and sand – simply mix with water
- Compressive Strength of 25MPa* when fully cured

* MPa is the metric unit for pressure or stress called megapascal (MPa). The term is used in concrete as the common unit for compressive strength.

ONEMIX - A ONE-STOP SOLUTION: The product you need in **ONE BAG**

Simple to prepare in **ONE STEP** – add water, ready to use with just **ONE MIX**

MORTAR

Approx. 96 x 20kg bags = 1m³

OUR INNOVATIVE Weatherproof Packaging

- ✓ Can be stored outdoors (unopened) in all seasons
- ✓ Prevents leakage of product and excess dust
- ✓ Improved shock and tear resistance, reducing wasted product

RETAINING WALLS

GARDEN BEDS

BARBEQUES

BRICK & BLOCKWORK

HIGH PERFORMANCE | SUPERIOR QUALITY

OneMix Mortar provides the best consistency for all block and brick projects, with a smooth, workable formula that is easy to apply and shape. When laying bricks or blocks, simply add water to our OneMix Mortar and you have a ready-to-use mix that glides onto brick edges and shapes to your design, whilst excess mix can be easily removed with a trowel and re-used to avoid wastage.

Available in: **20kg or 30kg bags**

20kg will lay approximately 25 common house bricks with a 10mm joint.

WHY YOU NEED THIS PRODUCT

- Provides a smooth, workable consistency for easy application
- Moldable formula that shapes to your design
- Less mess and wastage of product
- Made from a consistent blend of high quality cement and sand

ONEMIX - A ONE-STOP SOLUTION: The product you need in **ONE BAG**

Simple to prepare in **ONE STEP** – add water, ready to use with just **ONE MIX**

POST MIX

Approx. 102 x 20kg bags = 1m³

OUR INNOVATIVE Weatherproof Packaging

- ✓ Can be stored outdoors (unopened) in all seasons
- ✓ Prevents leakage of product and excess dust
- ✓ Improved shock and tear resistance, reducing wasted product

15MPa

LETTER BOXES

POST HOLES

FENCE POSTS

HIGH PERFORMANCE | SUPERIOR QUALITY

OneMix Post Mix is a well-proportioned blend of cement, aggregate and sand specifically designed for setting fence posts, logs and letterboxes into the ground. Post Mix develops a sturdy yet pliable consistency suitable for post hole applications. When used with appropriate bracing, OneMix Post Mix is ideal for non-structural post installations.

Available in: **20kg or 30kg bags**

WHY YOU NEED THIS PRODUCT

- Optimal consistency for the installation of posts and logs
- Economical alternative to using concrete
- Compressive strength of 15MPa* when fully cured

* MPa is the metric unit for pressure or stress called megapascal (MPa). The term is used in concrete as the common unit for compressive strength.

ONEMIX - A ONE-STOP SOLUTION: The product you need in **ONE BAG**

Simple to prepare in **ONE STEP** – add water, ready to use with just **ONE MIX**

RAPID SET

Approx. 100 x 20kg bags = 1m³

OUR INNOVATIVE Weatherproof Packaging

- ✓ Can be stored outdoors (unopened) in all seasons
- ✓ Prevents leakage of product and excess dust
- ✓ Improved shock and tear resistance, reducing wasted product

25MPa

LETTER BOXES

FENCE POSTS

HIGH PERFORMANCE | SUPERIOR QUALITY

OneMix Rapid Set is a fast setting formula made from a special blend of cement, aggregate, sand and additives designed to rapidly harden. This quick-setting product is best suited to small jobs such as fixing fence and pergola posts.

Available in: **20kg or 30kg bags**

WHY YOU NEED THIS PRODUCT

- Fast-setting formula perfect for quick jobs
- No mixing required
- Add clean water and the product will harden in approximately 15 minutes
- Compressive strength of 25MPa* when fully cured

* MPa is the metric unit for pressure or stress called megapascal (MPa). The term is used in concrete as the common unit for compressive strength.

ONEMIX - A ONE-STOP SOLUTION: The product you need in **ONE BAG**

Simple to prepare in **ONE STEP** – add water, ready to use with just **ONE MIX**

PAVER SAND

Approx. 102 x 20kg bags = 1m³

OUR INNOVATIVE Weatherproof Packaging

- ✓ Can be stored outdoors (unopened) in all seasons
- ✓ Prevents leakage of product and excess dust
- ✓ Improved shock and tear resistance, reducing wasted product

ONEMIX - A ONE-STOP SOLUTION: The product you need in **ONE BAG**

PAVER GAPS

HIGH PERFORMANCE | SUPERIOR QUALITY

OneMix Paver Sand is made from a fine graded sand, and is combined with our high quality bonding agent to ensure a balanced connection between pavers.

With a flexible yet sturdy finish, the OneMix Paver Sand is the perfect solution for high-traffic areas, providing enough give to reduce excessive wear and tear, and ensure a comfortable tread.

Available in: **20kg or 30kg bags**

WHY YOU NEED THIS PRODUCT

- Reduces risk of movement in paving structures
- Perfect for high-traffic areas
- Resistant to excessive wear and tear

Simple to prepare in **ONE STEP** – finish with water, ready to use with just **ONE MIX**
