A **NEKTA-VITE GARDEN BIRD FEEDER** makes a great gift for any age group and we can dispatch it to the address nominated with an appropriate card or message.

## BIRDS IN YOUR GARDEN

In establishing your own garden bird sanctuary the benefits are manifold:

- the pleasure and joy of our varied gregarious bird life in your own open air aviary;
- active participation in the preservation and conservation of our wildlife;
- a positive contribution to maintaining the balance of birds, plants, insects and other wildlife;
- helping in the creation of extended protected areas across the country.

With the national tree planting program gathering strength every garden sanctuary helps forge "corridors" of havens across the continent.

## THE AVIAN WAY

# NEKTA-VITE GARDEN BIRD FEEDERS

NEKTA-VITE presents a comprehensive range of safe, accessible, practical and predator discouraging free-hanging and free-standing feeding stations for all species of passerines (perching birds).

There are some 9,000 species of birds in our world, of which over 5,000 species are passerines. Australia has over 500 species of land birds, including 66 species of honeyeaters, and our unique flora (more than any other area in the world – approximately 15,000 species) provide the source directly or indirectly of all the foods from which native birds instinctively feed. Insects (some 200,000 species) are a percentage of nearly all passerines daily intake and provide a high protein, low fat meal.

Birds not only share our environment but are very important contributors and indicators of maintaining a balanced environment.

## YOUR GARDEN BIRD SANCTUARY

The “AVIAN WAY” by Nekta-Vite is produced as a guide to supplementary and natural foods for birds, the selection of safe insecticides and fungicides, insects – good and bad, charts and native plants and trees with their flowering periods, size and bird life attracted, plus many other funds of information. After many years of trial and error Nekta-Vite offers a wide range of hanging garden bird feeders for both nectar and seed eating birds.

## NEKTA-VITE VITAMIN SUPPLEMENT FOR BIRDS

A nationally approved and proven formulation, in powder form, which is the basis of three formulae of easy to prepare and nutritious supplementary foods for birds:

1. a stable and non-fermenting nectar for nectar eating birds;
2. vitamin/protein/fat solid food (cake mix) for all insect eating birds;
3. vitamin seed cone for seed eating birds.

NEKTA-VITE Bird Feeders are constructed from a combination of plastics, Australian Ash (perches and bowl assembly) and are weatherproofed.

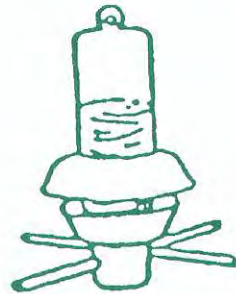

Colours: Nectar Feeder cylinders are tinted green with yellow canopy and yellow bowl.

Seed Feeding cylinder is light brown with terracotta coloured canopy and bowl.

Feeding Tray is terracotta in colour.

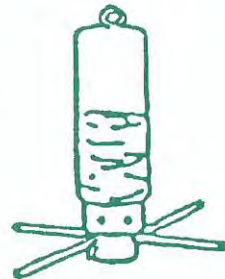

## GARDEN BIRD FEEDERS

(Hanging – all supplied with hooks)

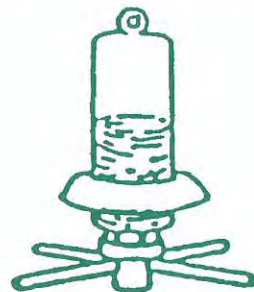

### Nectar – Large Bowl

Suitable for nectar eating birds to approx. 350 mm – honey eaters, lorikeets, some parrots, small insect eaters. Perches staggered for smaller and larger birds.

### Nectar – Enclosed Bowl

Suitable for nectar/honey eaters with long probing beaks – little wattlebirds, etc. Bee and wasp proof (holes in bowl for beaks). Perches on one level.

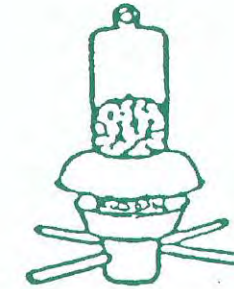

### Nectar – Shallow Bowl

Suitable for small honey eaters and insect eaters to approx. 120 mm. Small bowl with low level nectar and perches on one level.

### Feeding Tray

300mm diameter with central water bowl and a spike for solid food (cake mix). Drainage holes in tray – suitable for seed, food scraps, fruit, meat, solid food (cake mix recipe supplied) – suitable for all species of birds.

### Seed Feeder

Suitable for all seed eaters up to approx. 350mm. Seed only eg. Wild Bird Mix, sunflower seeds, grain etc. seed releasing holes in feeder, 19mm perches staggered.

## NEKTA-VITE VITAMIN SUPPLEMENT FOR BIRDS

100g	makes 50 litres of nectar, 50kg of solid food (cake mix) or 25 kg of seed cones;
200g	makes 100 litres of nectar, 100kg of solid food or 50kg of seed cones;
400g	makes 200 litres of nectar, 200kg of solid food or 100kg of seed cones;
1kg	makes 500 litres of nectar, 500 kg of solid food or 250 kg of seed cones.

NB The Bee Act 1972 precludes the addition of honey to supplementary foods.

Dependency on supplementary foods – many thousands of Nekta-Vite users can vouch that natural foods take priority, according to climatic availability.
