Why Elanra for

This is the only medical device in the world of this type: Globally Patented and Trademark

More than an Air Cleaner, more than an Ioniser

An Australian Registered Medical Device

Restore the systems of your body

95% of patients since 1967 report reduced colds and flu - Medically Registered. That means we treat your body not just the air

Elanra is actively recommended by 93% of customers - extraordinary!

- To reduce the severity and frequency of colds & flu
- Support and assist immune system recovery
- Enhance your oxygen intake
- Helps your body fight and repair itself
- For improved health and wellbeing
- Better sleep
- Easier breathing
- For increased alertness when driving
- Assists in the recover from illness and chronic fatigue
- To reduce the severity and frequency of colds & flu
- Relieves the symptoms of seasonal conditions
- Help improve learning and concentration
- Assist allergy and eczema sufferers
- Normalises the body's natural hormonal levels
- Enhances the bodies absorption of oxygen, Vitamins B and C
- Reduce effects of low mood

Where do I use Elanra?

Model	Application
Elanra MkII	Bedside table, Home, Office, Nursing home, Hospital. Mains power only
Elanra MkIII	Motor vehicle, Campervan, Truck, Home, Library, School, University. Portable use with mains power or a 9 volt battery, comes with a car mounting kit and earthing strap for the wrist when on battery.
Elanra Air Pendant	Air travel, train, walking, shopping, driving. USB rechargeable battery, wear it around your neck.

Registered Medical Device

Treats Virus, Bacteria and Pathogens inside your body

Reduce symptoms of colds and influenza (or flu)

BREATHE BETTER | SLEEP BETTER | BE BETTER

Look at our environment

The air we breathe is full of pollutants that are carcinogenic of various kinds. Australia has the highest per capita number of hay fever sufferers in the world¹ Our air is a concoction of all these bad ingredients and we rarely see any of it, other than smoke or the haze as you fly in on a plane. If we could see it, we would take immediate action.

Air affects us all

Scientists today have found that our changing air quality of our environment, is the cause of declining health in global humanity, not just from what we breathe, but in what it is doing to our plants and animals and hence our entire food chain! 

PROBLEM 1

We are nutrient starved

- We are not consuming enough essential nutrients
- Our food is not as rich in vitamins as it once was
- Soil wealth has decreased
- Plant food for our animals is not as rich, if it exists at all.
- IQ scores decrease the more intensively a young child's diet is based on fats and sugars (mt)

PROBLEM 2

We are stressed

- Stress causes shallow breathing reducing our oxygen intake
- Oxidative stress causes free radicals
- Ion air changes prior to a weather front creates stress
- Emotional and physical stress
- Time poor as we manage work and home
- Food preservatives
- Breathing in more pollutants – you cannot see them.

PROBLEM 3

We are living in a toxic environment

- The variety and quantity of pollutants in our air have dramatically increased
- Artificial sweeteners, colouring and preservatives
- Household cleaners, pesticides and other chemicals
- Sick building syndrome – paints, glues, air conditioning, concrete, synthetics
- Chemtrail spraying to eradicate weeds and vermin
- Use of Wi-fi and electromagnetic radiation sources
- Since 1930 over 75,000 synthetic chemicals are introduced
- The damage to our air that we live with today, is causing ill-health to our bodies and our tissues, we are deteriorating as a result in part of what is in our air. To slow this process down, we need to get back into a healthy air environment.

BIONIC AIR

Enhancing life

Our industry solution

GENETICALLY
MODIFIED SEEDS

BIGGER LIVESTOCK

PESTICIDES

BIG PROFITS

The industry decided to work on improving 'food' as a result of the problems listed previously.

So from the mid-1900s, commercial farming found new ways to grow our food faster and bigger. Industry has radically changed our food over the last 50 years, because they know they cannot change the quality of our air and our environment, that is causing a lot of these problems in our food chain.

Have you noticed food doesn't taste the same as it used too?

Have you noticed your children have bigger feet than children used too?

Have you noticed your children develop earlier than they used too?

Industry decided to reinvent food to suit the challenges of our modern lifestyle. Flavourings, colourings, preservatives, sweeteners and highly processed ingredients were combined to have today what we now know as take-away food. So poor in nutritional value are these foods that one expert calls them 'Edible food-like substances'.

And we don't need to talk much about water but if you read what additives go into our water to make it drinkable you would never drink it again! Remember water has a memory so when it rains and the water falls to the dams it collects the pollutants on the way down that the air contains. And that's not to mention that the air inside our homes is 10 times more polluted that the air outside according to the American Lung Association.

You think your air is clean? Think again. 

Breathe
clear oxygen

BIONIC AIR

Our solution

You cannot change the air outside, but you can do something about the air you breathe right next to you.

Air cleaners are good start for your home and there are many large varieties that have various filters to clean the air in the house.

But you cannot live in a house all day and all night. At some stage you will venture into the outside air or away from the air cleaner on the inside. In those cases the pollution is impacting your body and blood. This causes an imbalance in the body with many ailments that could be ignited or exacerbated. Elanra oxygen corrects this imbalance bringing your body back to repair itself from the day as you sleep during the night.

The type of environment which gives us healthy air naturally and for free, is found under a large waterfall, a rain forest or where the ocean water breaks over the rocks with force. If only we could live in those areas everyday, we would not need the Elanra!

So why is that environment so fresh and clean, why can you breathe deeper there than at home? The reason is because it abounds in trillions of a special type of oxygen called a 'Small Negative Ion of oxygen'. We call it a Species and/or Special oxygen, because we at Elanra have developed a very unique and special understanding of how this ion lives, moves and helps our bodies. This species is part of our team, our cultural DNA holding a relationship with every worker in our company, hence the DNA logo of Elanra.

Recreating this Special oxygen that is naturally available in our environment is extremely difficult, and to maintain it and ensure that it can reach the depths of your lungs and be ingested into your body is part of our Intellectual Property. This extremely sensitive and difficult process requires the worlds most advanced manufacturing and component care.

The Elanra unique composition of company trade secrets and patented technology, has meant we can deliver this unique solution to humanity, as a result of the tireless dedication of our inventor Mr Joshua Shaw. The Elanra re-balances the body and restores the body and more from the damage of the day all whilst you sleep, it's the easiest way to attain good health and wellbeing.

Elanra produces small negative ions of oxygen safely and without harmful ozone, a reason it is registered as a medical device. This standard is unique to Elanra and Australia. This negative ion is the important ingredient from the oxygen family that our body needs. The species helps improve our health and wellbeing and Mr Shaw has graciously given humanity the ability to bring that life-giving force from the waterfall, into our home, bedroom, car, hospital and everywhere we live in our modern world. 

Oxygen survival

Three things keep us alive:
water, food and air

What does water do for you?

But the air is something else, what can you do?
What do you really know?

Generally speaking, it is possible to survive up to 4 weeks without food. It is possible to survive up to 1 week without water (our bodies are 80% water). But you can only survive about 3 minutes without oxygen. And yet the oxygen we breathe is taken for granted, because it's always there. You breathe in about 11,000 litres of oxygen every day, so pay attention!

Every breath you take only has about 20% oxygen, 80% is other types of air particles and water. Then when you exhale you lose about 15% of that oxygen, so your body only retains about 5%. This means the quality of the oxygen you retain needs to be the best quality there is for good health.

Just the brain alone requires 20% of that 5%, and without it the cells start to die. The brain is important as the brain stem forces us to breathe involuntarily and constantly, without us even thinking about it. The brain gets this energy and its messages from your blood and electrical impulses, both of which need oxygen through the blood to function.

Our blood is the most important fluid in our body. That is because the blood transports our oxygen. We need this oxygen to release energy, because without oxygen, our cells cannot release the energy and therefore the goodness that is in the food, tablets, supplements we eat and consume, which means we get sicker and eventually would not survive.

Increasing oxygen concentration in the lungs helps to displace carbon monoxide from the heme group of haemoglobin^{2,3} oxygen is also poisonous to air borne bacteria.^{4,5}

Elanra restores the quality of the oxygen you breathe whilst you sleep, so that your body can function at its optimal level. Too easy! 

The ion of oxygen

You cannot change the air outside, but you can do something about the air you breathe right next to you. Air cleaners are good start for your home and there are many large varieties that have various filters to clean the air in the house.

But you cannot live in a house all day and all night. At some stage you will venture into the outside air or away from the air cleaner on the inside. In those cases the pollution is impacting your body and blood. This causes an imbalance in the body with many ailments that could be ignited or exacerbated. Elanra oxygen corrects this imbalance bringing your body back to repair itself from the day as you sleep during the night.

The type of environment which gives us healthy air naturally and for free, is found under a large waterfall, a rain forest or where the ocean water breaks over the rocks with force. If only we could live in those areas everyday, we would not need the Elanra!

So why is that environment so fresh and clean, why can you breathe deeper there than at home? The reason is because it abounds in trillions of a special type of oxygen called a 'Small Negative Ion of oxygen'. We call it a Species and/or Special oxygen, because we at Elanra have developed a very unique and special understanding of how this ion lives, moves and helps our bodies. This species is part of our team, our cultural DNA holding a relationship with every worker in our company, hence the DNA logo of Elanra.

Recreating this Special oxygen that is naturally available in our environment is extremely difficult, and to maintain it and ensure that it can reach the depths of your lungs and be ingested into your body is part of our Intellectual Property. This extremely sensitive and difficult process requires the worlds most advanced manufacturing and component care.

The Elanra unique composition of company trade secrets and patented technology, has meant we can deliver this unique solution to humanity, as a result of the tireless dedication of our inventor Mr Joshua Shaw. The Elanra re-balances the body and restores the body and more from the damage of the day all whilst you sleep, it's the easiest way to attain good health and wellbeing.

Elanra produces small negative ions of oxygen safely and without harmful ozone, a reason it is registered as a medical device. This standard is unique to Elanra and Australia. This negative ion is the important ingredient from the oxygen family that our body needs. The species helps improve our health and wellbeing and Mr Shaw has graciously given humanity the ability to bring that life-giving force from the waterfall, into our home, bedroom, car, hospital and everywhere we live in our modern world. 🌈🌿

The Elanra difference

No other ioniser in the world can generate a constant reliable stream of small negative ions of oxygen up to two metres away, whose output can be programmed in dozens of different modes for individual health requirements. Other ionisers produce larger negative ions because they cluster to ambient molecules within 1-3 centimetres, and by the time they reach your respiratory system if they do, they will clean the air but cannot be breathed in to exert a biological effect. How do we know? Simple we have the secrets, the technology and the patents for our science and technology.

Many cheaper ionisers also generate ozone as a by-product, a gas which is actually harmful, to the human respiratory system. None offer the versatility of precise programming to facilitate restful sleep, improved breathing, meditation, learning, recovery from illness, or improve low mood and fatigue. None offer a two metre biological range.

The Elanra small negative ion of oxygen is ingestible and transdermal. This means it can be breathed into the deepest depths of your lungs, as long as you are inside the two metres of the Elanra MkII device. We call this two metre range the 'biologically active range.' Inside that range, your skin will absorb the species, as it actively improves your skin, hair and health over time and your lungs have enjoyed the air your body was intended to breathe.

Outside that range the species grows into clusters as it collides and sticks to other elements in the air. This process makes the air clusters larger and larger, the further they travel the larger they become as they cluster more and more and are then just cleaning the air. That is how an air cleaner works. But air cleaners cannot produce what Elanra produces. Use an air cleaner for your whole house. Use an Elanra for your body and your personal health.

1. Registered medical device so consumer protection and quality is of an extremely higher standard and cost to produce
2. Registered medical device means we will not make false claims about what we can do, we have independent science and research on our technology and provided that to the TGA Therapeutic Goods Administration of Australia in order to be registered.
3. You are safer and buying better when buying a registered medical device, instead of just an electrical product.
4. Elanra isolates the oxygen molecule in its biological range for your breathing
5. Elanra only specialises in the 'small negative ion' that means it can get through the alveoli of your lungs and into your bloodstream to help you. Larger clusters of ions and air cleaners only clean the air.
6. Elanra is 'biologically active' it's not just a normal ioniser nor an air cleaner, in fact they are just a side effect of its true function, Elanra is just Elanra. The Elanra helps the body and blood rest into its correct environment, so that the body can heal itself.
7. Elanra is globally patented and trademarked
8. Elanra Medical are the only ionisers in the world using pure gold and crystals in its manufacturing
9. Elanra Medical is the only company in the world in this industry that has been in business since 1967 and the first in the world to be medically registered.
10. 93% of Elanra customers actively recommend Elanra
11. Elanra is the only ioniser in the world with variable output settings and the only ioniser in the world that understands and implemented the power of combining frequencies so the oxygen can talk to the bodies organs through the water in the cells of your body. 

Our Australian inventor

Joshua Shaw is the inventor of the Elanra, he started researching the industry in the 1960's and invented the Elanra in 1967. Winning a silver medal at the International Inventors Convention held in Geneva in 2003, Joshua has provided a solution to humanity that deserves a Nobel prize.

His interest started after he had third degree burns down his left arm whilst living in Sydney. He had a small Israeli ioniser on his office desk back then in the 1950's. What astonished him was he had absolutely no scarring. It was this experience that ignited his passion into knowing more about our air and pushed his determination into global research.

Joshua flew all around the world back then to meet the greatest minds in science and research from various Universities and hospitals on every continent. They shared ideas and made a combined effort on capturing this unique natural species, which eventually Joshua succeeded at.

Around 2010, Joshua began his retirement plans and by 2013 he commenced his succession plans for the company. He acquired a new building and ensured the hand over of all the critical knowledge to his confidante and business partner to take over for him into the future. Today Elanra is expanding globally and has retained all the true and vital inventive essence from Joshua. Joshua was intimately involved with the improvements of the Elanra as technology has advanced.

Joshua describes the registered medical device as a revolutionary breakthrough in a long global history of the use of negative ions for improved health. For the first time, users could safely breathe in 'small biologically active ions of oxygen,' exactly as nature intended. Joshua's research showed that too many negative ions could prove as ineffective as too few, so his Elanra was designed with advanced technology to control the exact output of ions and is capable of being programmed to the specific needs of the user, with up to 144 possible configurations. He also discovered that a high concentration of small negative ions lowered infection rates in patients at risk, reduced the severity and frequency of colds and flu. The effects on allergy sufferers, those with sleeping and breathing difficulties was particularly impressive, and even those without ailments claimed remarkable benefits in energy levels and wellbeing.

healing power**

Wisdom and experience

Elanra means: God breathed and God given.

- We can't change the air around us, but we can change the air we personally breathe with an Elanra.
- We can't change our modern living, even though we know it is doing harm everyday to our body. So accept what you can't change and help your body restore you sleep from that damage – use an Elanra.
- Not happy? Get the right things in your body make your body happy inside and then outside you will radiate. Eat well, drink well, sleep with an Elanra.
- Yes Elanra does what it says that's why we are still in business since 1967.
- Elanra gives emphatic results. If you breathe oxygen you will benefit from Elanra.
- Yes your animals will benefit too
- Yes your plants will grow faster and larger too
- Elanra has the experience, don't be fooled by the many imitators. Your family deserves the best, and only the best.

Dr R Jayaratne of the International Laboratory of Air Quality and Health at QUT in Australia confirmed in 2016:

"Larger particles like pollen are trapped in the upper respiratory tract while the small ultra-fine particles penetrate deep into the alveoli region of the lungs, and about 50% of them are retained in there. If they are negatively charged like they are with Elanra, the deposition rate is further enhanced by 10-20%. Studies have shown that these ultra-fine particles can then penetrate into the bloodstream."

Professor G. Singer Brain-behaviour research institute Victoria stated on 22-3-1985:

"There is strong evidence that the presence of the Elanra ionizer enhances the immune response. The only reason this is not clinical evidence is because the studies have not been done as yet", as technology needs to catch up and track a sub-atomic particle at speeds faster than the speed of light in a short distance! "It is likely that this enhancement will have an effect on upper respiratory tract infections and benefit allergy sufferers which would benefit millions of people."

Warren Buffet – Investor

"Trust is like the air we breathe – when its present, nobody really notices; when its absent, everybody notices." 

When you own your breath, nobody can steal your peace.

Proverb

Listen, are you breathing just a little and calling it a life?

Mary Oliver

The world is changed by your example, not by your opinion.

Paulo Coelho

We do not inherit the earth from our ancestors, we borrow it from our children.

Native American Proverb

Facts and research

Official statement: 'Elanra produces small biologically active negatively charged ions of oxygen, pulsed at various selective frequencies that are emitted into the ambient air to be inhaled and ingested via the lungs into the bloodstream of the patient to produce a positive therapeutic or biological effect.'

Kornblueh in 1962, provided a cautious and reasoned overview of the significance of ions in a paper entitled 'Artificial ionisation of the air and its biological significance'.⁶ The paper recognised the shortcomings of many of the ion generators that had appeared on the market at that time, and noted that positive results do occur in high output devices. His conclusion was that, 'In medicine, artificially negatively ionised air is gradually gaining recognition as a valuable adjunct to other established methods of treatment.'

American Biometeorologist Dr Albert Krueger, conducted extensive research and published many papers on small air ions. He found that high concentrations of positive ions and negative ion depletion, increased the cumulative mortality (death) rate in mouse influenza, whereas high concentrations of negative ions reduced the mortality rate.⁷ By 1976, he explored ion action on microorganisms, and discussed the serotonin hypotheses of ion action. He noted that positive ions increased serotonin production and negative ions reduced the amount of free serotonin present, concluding a negative ion environment will improve low mood and chemical imbalances in the blood.

In 1984 Charry, writing in Environmental Research⁸ concluded that where ion effects occur, positive ions are associated with adverse effects and negative ions with beneficial effects. Furthermore, effects differ due to other anomalies, but are likely to be important in influencing motivation, learning, and cognitive factors such as concentration and brain wave activity. Ion exposure appears to alter the course of particular disease states in animals and humans.

Professor George Singer of La Trobe University wrote in 1988 to the Elanra inventor Mr Joshua Shaw: 'the increase in reactivity of the body's ability to fight is convincing with a probability level of 0.001 and a concomitant drop in serotonin levels which has a link with the body's ability to fight and respond. There is strong evidence that the presence of the ioniser (Elanra) enhances the body's ability to fight, reduces upper respiratory tract infection and has likely benefits to allergy sufferers'.⁹

Dr Rohan Jayaratne of the International laboratory of air quality at Queensland University wrote to Elanra in 2016 about the Elanra: 'Larger particles like pollen are trapped in the upper respiratory tract while the small ultra-fine particles (Elanra's small negative ions of oxygen) penetrate deep into the alveoli region of the lungs and about 50% of them are retained in there. If they are charged (like Elanra does), the deposition rate is further enhanced by 10-20%. Studies have shown that these ultra-fine particles beneficially get into the bloodstream'.¹⁰

Boulatov describes results recorded in 830 patients with respiratory conditions and concluded that 'dyspnoeic attacks disappeared in 55% within 6 months, the intensity and number of attacks was reduced in 35% of patients and treatment was ineffective in 10%.¹¹

Dr Stevens DB concluded that 'only an abnormally high concentration of negative ions (over 150,000/ml) has the effect of improving the morning and/or evening PEF of about half the patients in the study'.¹² Note: Elanra produces a minimum of 900,000/ml and that is at an extended distance of 1mtr. For comparison, the Elanra produces 29Million/ml at 100mm.

PennState University Department of Architectural Engineering website carries a report on Negative ion generation as a means of reducing airborne microbial levels.¹³

Much research has focused on 'sick building syndrome' where ambient air quality and other factors give rise to adverse effects on occupants. Hawkins in 1981 investigated Air ionisation and office health and incidence of headache, nausea and dizziness. He concluded that the use of a high output negative ion generators appears to bring about a significant reduction in the number of complaints of headache, nausea and dizziness.¹⁴

An article on www.newscientist.com news service in 2003, reported that repeated airborne infections of the bacteria acinetobacter in an intensive care ward at St James Hospital in Leeds had been eliminated by the installation of a powerful negative air ioniser.¹⁵

In 1995, Terman and Terman report conduct of a controlled trial of high density and low density negative ions in seasonal affective disorder (SAD) on 25 subjects. They concluded that exposure to a high density negative ion generator appears to be specifically improve the low mood in SAD patients. Showing this method as useful as an alternative or supplement to light therapy and medications.¹⁶

Morton and Kerschner demonstrated differential negative ion effects on 33 learning disabled and 40 normal-achieving children. Following negative ionisation the learning disabled showed enhanced left hemisphere procession concurrent with right hemisphere inhibition. These effects are neuropsychologically positive for the use of this device.¹⁷

Elanra products

Elanra Air Pendant
For everyday health

Elanra MkII Home /
Office Ioniser
5 star care at home

Elanra MKIII Portable Ioniser
For lifes little journeys

There are three devices all producing the same special oxygen in different strengths. The three are designed to suit all lifestyles, for those to use at home or in the office or in a car or whilst walking around the streets. Most Elanra customers eventually have one of each to suit all their modern ways of living.

Pure Gold is used in better quality advanced electronics and has been used for centuries as a conductor, we use gold in our products for those reasons. The species comes out of the needles in a vortex, or imagine a whirlwind surrounding an ice-cream cone. They come out excited and fast and spread out as they travel further away from the needles. Elanra can clean an area of 75sqm very fast, but its not just an air cleaner.

Outputs: The Elanra MkII has 144 settings, that's like 144 different machines. These settings include variable outputs. If you have a headache you don't take a whole box of tablets, you take one or two. With Elanra you select the correct output for you.

Frequencies: Elanra produces variable frequencies also. Your body is made up of about 60% water and electrical charges.

Water has a memory. When you breathe in our species we believe that the water in your cells retains the frequencies of ingestion of the species you have selected. That is why our customers get benefits in sleep and benefits in breathing.

Using Elanra

So it's simple. You take the Elanra home and it changes the environment that you live with. But one machine won't work for a whole home. The species only survives up to two metres and less than a millisecond. So the most important place to use the Elanra is on your bedside table, the reason being you are in one place for a few hours and you can then breathe in this oxygen whilst you sleep, no mask is required. This is also the time your body is repairing itself as you sleep, that is why our bodies need to sleep. You just turn it on when you go to bed and you don't have to think about it. Turn it off when you wake up – it's the easiest way to encourage good health. So why is it when you are sick all you want to do is go to sleep? That is because your body and brain wants you to rest as your body wants to repair. 

Australian quality

Elanra is Internationally recognised in its field as the global leader and retains that position today. Not only is Elanra globally patented and trademarked but also meets all regulatory standards for International distribution and carries the CE mark and EMC for electrical safety to protect you. As Elanra devices are registered medical devices they must meet a higher standard in all aspects. You can relax and know you are investing in your health with only the best.

To retain the specialised nature of the Elanra we keep all manufacturing in Australia. We also control all our components that are specially made and unique to our products and we manage that supply and provide them into our manufacturing through a separate company. 

logos to be placed in this area

Elanra MKII

Your health is far too precious to risk using anything but the very best, and that is why medical practitioners and natural health therapists recommend the Elanra therapeutic ioniser - the only ioniser in the world available today capable of generating the small negative ions of oxygen across variable frequencies that can be inhaled to enter the bloodstream and produce biologically beneficial effects (a process which is globally patented).

These small negative ions are identical to the ions found in the invigorating natural environments such as the seashore, alpine regions, forests and waterfalls.

Other ion generators can claim to produce negative ions, but they are NOT small or ingestible, and cannot enter your body. These types of ionisers are useful but only as air cleaners.

The Elanra MKII Therapeutic Ioniser was especially designed for you in mind, incorporating 144 programmable configurations to suit your individual needs. The MKII is the most technically advanced ioniser in the world. The MKII utilises the world's finest specially made components. Even the case is made from special imported fibres that do NOT outgas or produce toxins, which is especially important for those who suffer from chemical sensitivity or are highly allergic.

These are just some of the many factors that make the Elanra unique!

Programs

Total 144 individual settings.

Ozone Emission

According to controlled scientific tests by the CSIRO and United States Environmental Protection Agency (EPA), with the initial ozone concentration levels at 0.01. The Elanra produced less than 0.01 part per million ozone at 50mm from the needles. This is considered insignificant hence Elanra does not produce any harmful ozone.

ELF Fields

Extremely low frequency (ELF) fields affect the human biological system. Again scientific tests have proven the Elanra is extremely safe to use (less than 1 Milli Gauss) at 40cm from the machine.

Dimensions

135mm Wide x 108mm High x 73mm Base Width
5.4" Wide x 4.32" High x 2.92" Base Width

Therapeutic Range

2 Meters (6.6 ft) Typical 4 Needle Configuration

Air Cleaning Capability

75 sq.m (815 sq. ft) Typical 4 Needle Configuration

Casing

Extreme care has been taken to use materials that do not add to the discomfort of chemically sensitive or allergy sufferers - the external white casing is made from special imported fibres which do not outgas.

Needles

Replaceable alloy needles designed specifically for the output of small inhalable negative ions.

Electronic Circuitry

Crystal controlled advanced microprocessor circuit.

Warranty

3 years on the device labour, 2 years on the parts and 1 year on batteries from original date of purchase.

Electrical & EMC Safety Standards

C-Tick: N3656; CE Medical and Safety Performance: MDD 93/42/EEC, A2007/47/EC, EN60601-1: 2006 + ALL: 2011; EMC: IEC 6060 1-1-2: 2007

Elanra MKIII

Designed for personal use: in the car, truck, bus, train or in aircraft, hotels, motels, restaurants, theaters etc. The Elanra MKIII produces biologically active small negative ions of oxygen. After the therapeutic range, the Elanra Portable will continue to clean an additional 25 square metres. 32 programmes are available to suit the individuals therapeutic requirements, and a programming manual is included with the unit.

Reports from the USA, Hungary, Japan, and Britain support findings that show the build-up of positive ions inside moving vehicles leads to loss of driver co-ordination and a resulting increase in traffic accidents.

These studies led to the recent development of the Elanra Portable Ioniser, a fully programmable, multi-use portable unit, which enables motorists to enjoy the benefits of a refreshing, negatively-charged atmosphere in their vehicle, while helping to safeguard the driver, passengers and other road users.

During travel, the Elanra Portable is powered by the vehicles battery and sits on a specially-designed car mounting kit which is fixed to the dashboard or rear shelf. Easily removed from this stand, the Portable will also run on its own internal 9V battery where power is not available. In addition, it can be plugged into any electrical outlet in the world with its specially designed "switch-mode" power supply. This enables you to use this very versatile product whilst driving, flying in an aeroplane, or travelling by bus or train. The portables specially-designed power supply converts any mains voltage to the low voltage required for safe and easy use anywhere in the world, and carries all international electrical safety approvals and marks.

Programs

32 individual user friendly settings.

Ozone Emission

According to controlled scientific tests by the CSIRO and United states Environmental Protection Agency (EPA), with the initial ozone concentration levels at 0.01. The Elanra produced less than 0.01 part per million ozone at 50mm from the needles. This is considered insignificant hence Elanra does not produce any harmful ozone.

ELF Fields

Undetectable.

Dimensions

168mm Wide x 37mm High x 120mm Depth
6.6" Wide x 1.45" High x 4.72" Depth

Therapeutic Range

1 Meter (3 ft)

Air Cleaning Capability

25 sq.m. (272 sq.ft)

Casing

Extreme care has been taken to use materials that are non-allergic.

Needles

Replaceable alloy needles designed specifically for the output of small inhalable negative ions.

Power Sources

90V - 250V AC Mains Power - 50/60hz
12V DC External Power Source
9V Internal Battery

Power Consumption

<10 Watt

Warranty

3 years on the device labour, 2 years on the parts and 1 year on batteries from original date of purchase.

Electrical and EMC Safety Standards

CE Medical and Safety Performance: IEC60601-1:2005+*AM1(2012); CE Electromagnetic Compatibility: EN60601-1-2:2007

Patents and Registrations

L 12832: Listing as a Therapeutic Device by the TGA (Therapeutic Goods Association) Global utility and Design Patents and Trademarks.

Elanra AIR Pendant

After 4 years in research and development, the revolutionary Elanra AIR has been released as the world's most advanced personal ioniser. Fully portable, this compact 'hands free' medical device is worn comfortably around the neck providing you with unrestricted freedom and therapeutic benefits at work, school or home, while travelling, shopping or driving.

Designed specifically for aircraft use and in-flight travel, for use in intensive care and general hospital wards, and for study and concentration, the Elanra AIR features nine easily programmed individual settings including 3 output levels and 3 different frequencies - from improving health and wellbeing and assisting recovery from illness (4Hz), to improved sleep and concentration (10Hz), to increased energy and vitality (25Hz).

A choice of black or white, and the option to personalise the Elanra AIR for staff or clients, family or friends with your company logo or personal photograph, Elanra AIR is fully rechargeable; an international charger kit with universal adaptors is included with your purchase.

Programs

3 Output levels
3 Frequency settings - 4Hz, 10Hz
(Alpha), 25Hz
Total 9 individual settings

Ozone Emission

According to controlled scientific tests by the CSIRO and United States Environmental Protection Agency (EPA), with the initial ozone concentration levels at 0.01. The Elanra produced less than 0.01 part per million ozone at 50mm from the needles. This is considered insignificant hence Elanra does not produce any harmful ozone.

Dimensions

Height: 59.18mm
Base: 64.35mm
Thickness: 24.73mm

Weight

Elanra AIR including lanyard - 68.2g
Power supply including adaptors -133g AC Recharger
Switch mode power supply (electronic) certified for use in all countries.

Lithium Battery

3.7V, 750mAh rechargeable battery capable of 1000 charges or approximately six years based on an average daily use of 12 hours across the three output levels.

Needle

1 x special alloy needle replaceable after 1200 hours.

Electronic Circuitry

Crystal controlled advanced programmable microprocessor circuit.

Warranty

3 years on the device labour, 2 years on the parts and 1 year on batteries from original date of purchase.

Electrical and EMC Safety Standards

Elanra is the only ioniser tested and compliant with all international standards in EMC and electrical safety.

C-Tick: N3656; CE Medical Safety and Performance: EN60601-1:2006; CE Mark Tested Compliance with; EN60601-1-2:2007; EN55011:2007 + A2:2007

Testimonials

"If I had been asked a few weeks ago what I thought of the benefits of negative ion generators, I would have said I was like many people – open minded, but somewhat sceptical. Then, at the beginning of the month, I came down with the severe influenza that was sweeping through my City. I needn't describe the awful symptoms, everyone knows how drained and miserable a flu sufferer feels. One of the worst aspects was lack of sleep due to constant coughing and nose-blowing. Work became impossible as I was exhausted. A friend suggested I borrow her Elanra loniser and in desperation, I agreed. I set it up on my bedside table a metre from my face. For the first time in almost a week, I slept like a baby – no coughing, no stuffy nose and no sweating. After a couple of nights, the flu symptoms had abated and I felt well and relaxed. All around me, family and work associates were complaining of relapses from this highly contagious flu. "I just can't shake it off", they kept saying, "How did you recover so quickly? When I told them, most were disbelieving, but it didn't matter. I was experiencing that happy glow. It was then that I began to research the subject."

Dr. D. Johnston, UNSW, Sydney, Australia

My 6 year old daughter has chronic tonsillitis and allergies. She has snored since she was a baby. Our day starts with her sneezing and coughing constantly until the antihistamines kick in. Within in a week of using Elanra she no longer snores and wakes up breathing well. I cannot get over the change in my little girl's health. To see her so well and full of energy is just amazing! Thank you.

Annette Cosgrove, NSW, Australia

Thank you I received my MkII and MkIII Portable Elanra just in time for my wife being struck with high fever and heavy congestion. The portable was placed at her bedside. She was back on her feet in less than a week as opposed to the 2-3 weeks her co-workers took to regain the health. We also usually get sick "together" and that didn't happen this time.

David Wayzata, MN, USA

I just wanted to tell you what a difference the Elanra ioniser has made in my life. I have PTSD (Post Traumatic Stress Disorder) from Vietnam. One of the things I have been plagued with for years is poor sleep patterns, usually sleeping 2-3 hours a time. The FIRST night I slept with the Elanra next to my bed, I got a full night's sleep and work feeling refreshed for the first time in as long as I can remember. I will recommend it to my other Veterans cause I know they have the same problems sleeping that I do. It's wonderful to find an alternative to increasing medication constantly.

Richard Lunbery, Montana, USA

I am writing to express my personal gratitude resulting from the use of my Elanra Therapeutic Ioniser, which I have used consistently for the last 12 months or so. I do not suffer from anything major but I have had long term various allergies and sinus problems. I am very happy to relate that I now do not have any signs of these previous very vexing problems. Once again my sincerest thank you.

Don Weir, Kilcoy, Qld, Australia

In Germany the negative ioniser is in every hospital room and is very well known to improve your health. But following my chemotherapy treatment, I had to urgently travel to Australia for a funeral and was completely exhausted from lack of sleep and my treatment to the point I was delirious. Upon arriving I was introduced to the Elanra from a friend and was so excited, as I had heard about Elanra in Germany but forgot the name. I bought one that day which your office expressed to my hotel. I am just so grateful I am crying whilst I write. I slept so much better and I feel a lot better, and I have been able to sleep every night this week. It's been the first week of sleeping through the night I have had in years, this machine feels like magic to me. I can't wait to get back to Germany. I bought another travel bag and another 8 machines, that's all my bag would fit for my friends!.

Prue Kelly, NSW & Germany

Just a few lines to let you know how I went. I firmly believe I have been helped by the use of the Elanra. Being a sufferer of depression most of my life I have been on multiple drugs for a lot of years. And although my drugs continue, it now seems they are working better inside me. I was complaining to my doctor that my last drug wasn't working anymore, and then a few days after persevering with the Elanra every time I was in bed I was starting to feel better. My mood is more under control now and I can relax better at night time now, so I told my doctor I would stay on this last drug now. Thank goodness I don't need to change again now I have Elanra.

J. Williams, Cornwall, England

Funny my Corgi Cross called "Burnie" keeps sneezing around me and doesn't breathe properly. I thought it was my aftershave so I just ignored it. But last week I put my Elanra on the coffee table next to me as I fell asleep on my lounge. When I woke up I noticed that Burnie was sitting right in front of it enjoying breathing the air, I guess animals know what's good for them. So I left it there for a couple of days, since she enjoyed it. She doesn't sneeze anymore, I don't know why or how, but it's worked. I cannot believe the difference it's made to my Burnie.

J. Chustou, Singapore

Eczema and allergies of my skin has been a part of my life for as long as I can remember. I've tried many creams without success. I've tried tablets from my allergist which have calmed down the inflammation but the side effects make my muscles sore. My pharmacist told me about the Elanra helping his daughter. I was so glad you could send me one from Australia and your staff encouraged me to keep using it. It has taken almost 12 months of using it every night, but now I am happy to say I don't get inflamed anymore on my skin, and the itch is not as bad and I have noticed that my creams are starting to work if I keep the Elanra on me at the same time. Thank you for the peace that is back in my life.

T. Chou, Hong Kong

Thanks for the Elanra Pendant. I can now fly as far as the UK without pain, I can even watch a movie now! Being a frequent flyer as I've aged my eyes have got dry, being inside the plane cabin is so painful and eye drops don't work anymore. The Pendant's easy to wear and I cannot even tell it's on but my eyes sure feel better. Kudos to the inventor!

J. Sommerville, Portugal

My auto-immune disease has left me with an unattractive ability to get sick quite easily. My incubation period is only a matter of hours, so I can tell exactly who made me sick each time. It only takes one trip to the shops and someone to cough near me, that will land me in bed for 3-4 days on average. This has been a constant interruption to my life for over 15 years. My doctor says there is no cure for me and he can only treat the symptoms, but those treatments have side effects. I decided not use them. Eventually it was recommended to me to start using the Elanra. I bought the MkII for next to my bed every night and then I put it on my desk in the daytime and I have the Pendant too if I go shopping, my condition has changed immensely. It's strange I still get sick that day if someone coughs on me. But I go to bed with my usual headache, sore muscles and sore throat, I turn on my Elanra and by the morning, I'm 100% fine again! I am so excited I have my life back because it's been working like this now for over 6 months.

L. Brown, Qld, Australia
