Hauling Winches

Neumann Equipment hauling winches are designed and manufactured from high quality components for extreme environmental conditions, providing years of dependable service. Our hauling winches are designed for commercial, industrial, and marine applications including:

- Conveyer belt replacements.
- Cable hauling.
- Low loader recovery winch.
- Dredge recovery.
- Slipway winch.

All of our hauling winch designs are verified using Finite Element Analysis (FEA), manufactured and tested to meet the relevant marine/industry standards. They are Built Tough and Designed to Last!

Standard Inclusions:

- Spring applied hydraulic/electric release fail-safe brakes brake.
- Haul winch drums are supported with a fully sealed self-aligning bearings.
- The haul winch bases and drums are fabricated from various grades of carbon steel.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine coatings.

Available Options:

- Line pull capacities – up to 200 tonne.
- Hauling line speeds – up to 50 metres per minute.
- Drive motor types – electric or hydraulic.
- Reduction style gearboxes to suit requirements.
- Diesel/electric hydraulic powerpack.
- Electrical/hydraulic control systems to suit specific application.
- Wire feeders to suit application.
- Distance and tension monitoring.
- Guarding to suit specific requirements.
- Grooved or un-grooved drum shell.
- High power multiple drive systems.

Please contact us by phone or email to discuss your hauling winch requirements.
