## Man Riding Winches

Neumann Equipment man riding winches are designed to meet the precise requirements of the application, providing years of dependable service.

These personnel lifting winches are specially designed to meet the strict design parameters in AS1418 (Cranes, Including Hoists and Winches) or set out in the Mining Design Guidelines (MDG33 – Design, Commissioning and Maintenance of Drum Winders), and any other applicable standards.

These winching systems are designed to carry personnel in an industrial or mining application

The following photos of custom designed man riding winches have been provided for reference of our capabilities and excellence.

All of our man riding winch designs are verified using Finite Element Analysis (FEA), manufactured and tested to meet the relevant standards. They are Built Tough and Designed to Last!

### Standard Inclusions:

- Compliance with AS1418.1 – Cranes, Hoists and Winches, or MDG33with MDG 33 – Design, Commissioning and Maintenance of Drum Winders.
- 3rd part design verification by RPEQ.
- Maximum line speed suited to each application.
- Independent fail-safe braking systems direct coupled to winch drum.
- Overspeed, overwind and overload protection as standard.
- Winch base and drum are fabricated from either carbon steel or stainless steel.
- Guarding to suit site requirements and relevant Australian Standards.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine coatings.
- Test undertaken in accordance with the relevant standard and verified by 3rd party witness.

### Available Options:

- Line lift capacities – up to 5,000kg.
- Hauling line speeds – up to 20 metres per minute.
- Drive motor types – electric, hydraulic, or pneumatic motors.

Please contact us by phone or email to discuss your man riding winch requirements.
