

Wonderfur works wonders

Our innovative, vet-endorsed, freeze-dried bites are the first of their kind in Australia. At Wonderfur, we merge the best of science and nature to craft treats that truly make a difference. Rich in natural probiotics and essential nutrients, our kefir-based bites support your pet's digestive health and boost their immune system.

Perfect Anytime, Anywhere

Great as meal toppers, training treats, rewards, or on-the-go snacks.

Trusted by Vets, Adored by Pets

Sara Ochoa, Doctor of Veterinary Medicine, Veterinarian

When looking for a supplement for your dog, look no further than Wonderfur Bites dog supplement. They contain green-lipped mussels that help with joint pain and inflammation, as well as lactose-free yogurt to support a healthy GI system. This is a supplement I love to recommend to my pet owners as it helps their dogs live a long, happy, and healthy life.

Linda Simon, Veterinarian, Member of the Royal College of Veterinary Surgeons

I love how these treats are freeze-dried; preserving the active compounds and ensuring the ingredients retain their natural potency. The colostrum, lactose-free kefir and inulin all work together to improve the body's immune system. This can lead to a smaller chance of getting sick and an improved ability to fight off any infection your dog may face. Taking these bites each day should help to strengthen the gut barrier, preventing both toxins and harmful microbes from entering your dog's bloodstream.
