Install. Load. Tip.

Created for your ease of use,  
removing the hassle.

## THE INSTANT TIPPER

The Instant Tipper is designed to fit most well body utes. There is also a second design for flat top utes and trailers.

Can be installed in minutes for temporary use or bolted in for a more permanent fixture.

Don't waste time and effort unloading your rubbish.

Ideal for sand, rubble, mulch, garden waste or even grain for feeding your animals.

Unloads in 30 seconds.

## WHY TIP TUBS?

Save time

Avoid hassle

Easy to install

Easy to use

# TIP TUBS

After moving from rural Western Australia to the city 3 years ago we found it difficult to dispose of building materials in the city areas. We also didn't have the space for trailers and didn't want the expense of automated tipping trailers or trucks. It was becoming hard work to unload the rubbish at the end of the day. This was more so when you got to the Waste/Recycling Facility and you can't reverse your Ute past the bollards. You have to manually remove the waste and dump it over the edge. The only exception to this was if you had a tipper. With a Tipper you were allowed to drive right up to the rubbish and tip it off. Hence the idea of a Pivot Tipper that could fit on a ute or trailer was forming.
