

Gallery Systems

...hang your art as
the galleries do

Better ways to hang your art.

Why use a hanging system?

- No more nails in the wall or damaged walls to repair
- Align your pictures perfectly horizontally or vertically in minutes
- Install once and then dramatically reduce the time it takes to hang all your precious pictures on the wall
- Saves time and money

Simply HANG it, SWAP it, MOVE it & ENJOY it!

If you have art to hang, Gallery Systems has a solution for you. These include the Slimline System for a more unobtrusive look; the Traditional Picture Rail System to utilise your own picture rails; The original Gallery System for situations where you have heavier pieces; and our exclusive Gallery Lighting System, to bring your precious art to life!

Gallery Systems has been manufacturing hanging systems for over 30 years with 10's of 1000's of happy customers hanging millions of paintings across the globe using our systems.

The Slimline System

The Slimline System is designed for use in homes, offices, galleries or wherever there is a need to hang lighter artwork (up to 15kg).

It is an unobtrusive system based on a very slim track which is designed to butt up against the ceiling or cornice where it is less visible.

What do I need to make the Slimline system?

1. Slimline System Track & Wall Anchors

Wall anchors are used to fix the Slimline track to the wall. They butt up against the ceiling or cornice and once the track is clipped in place there are no unsightly screws visible. The Slimline track comes in 2m lengths and offered in powder coated white or satin anodised silver.

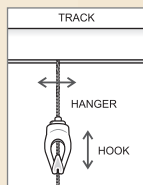

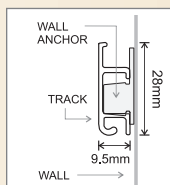

Note: a minimum of 5 wall anchors is required for every 2m length of Slimline track.

1. Slimline track clips onto Slimline wall anchors.

2. **Hangers** - These fit into the Slimline track and come in a choice of Stainless Steel Cable, Clear Tape and Clearline.

Clear Tape Hangers
(max 7kg per hanger)

Clearline Hangers
(max 8kg per hanger)

Stainless Cable Hangers
(max 15kg per hanger)

3. **Hooks** - These thread onto the hangers to hold up your picture. We offer a choice of push-button hooks (suit Slimline stainless cable only) or the mini hook (suit Slimline stainless cable and Slimline clear tape and Clearline). *NOTE: Do not exceed maximum weight of hangers.*

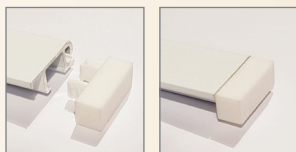

Slimline Mini Hook
(max 15kg per hook)

Slimline Push Button Hook
(max 14kg per hook)

Accessories

Slimline Endcaps are available to match the track colour and finish the ends of the track when exposed.

Slimline End Caps (pack of 2)

HangRight Clips (pack of 10)

NOTE: HangRight Clips can be used with all Gallery Systems products

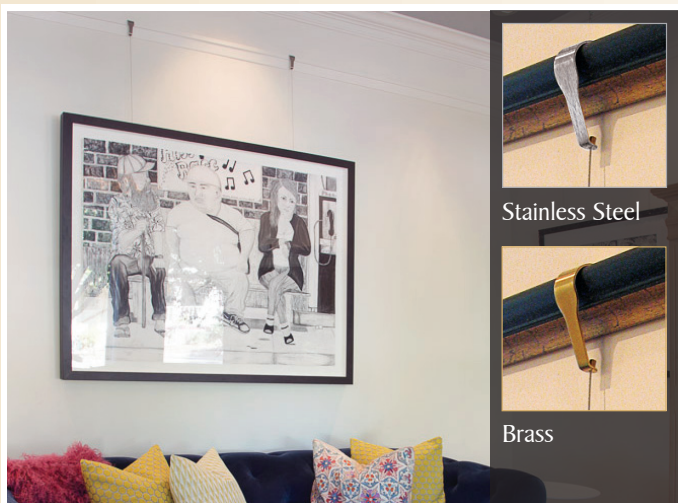

The Traditional Picture Rail System

This hanging system combines a traditional look and feel with the functionality of a modern hanging system. Utilise your own picture rails with our unique solid brass or solid stainless steel picture rail hooks. Then pair with our stainless steel cable hangers and adjustable hooks to create a classic display.

Our unique picture rail hooks are specially designed to help avoid forward lean of your pictures which is a common problem with other picture rail systems.

Each Picture Rail Hook pack comes with 5 x Picture rail hooks and 5 x 2m cables. Adjustable hooks thread onto the cable and hold up the picture (sold separately – see The Gallery System page for options).

The Gallery System

...hang your art as the galleries do

Painting courtesy of Steve Doyle • idealdesign.com.au

The Gallery System is our original hanging system. It is ideal for art galleries, museums and schools, or wherever there is a need to hang heavier art. It is a strong and flexible display system which lets you change your art quickly, and all without damaging your walls.

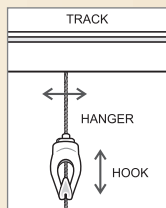

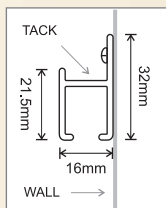

Hanging art can be a time consuming business, so one of the system's advantages is its speed of use, saving a lot of time and energy.

What do I need to make The Gallery System?

- Track** - The Gallery System uses an aluminium track which is screwed directly to the wall. The track comes in 2 & 3m lengths in powder coated white or satin anodised silver finishes.

The Gallery System Track

- Hangers** - These fit into The Gallery System track and come in a choice of Stainless Steel Cable, Clear Tape and Clearline. The clear tape hanger is inserted into the track at the ends, where as the stainless cable hangers and clearline hangers can be inserted anywhere along the track. Hangers are sold in packs of 10.

Stainless Cable Hangers
(max 30kg per hanger)

Clear Tape Hangers
(max 15kg per hanger)

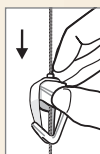

Clearline Hangers
(max 8kg per hanger)

- Hooks** - These thread onto the hangers to hold up your picture. We offer a push-button hook, push-button security hook (both suit stainless cable only) and an Allen key hook (suits Stainless Cable, Clear Tape and Clearline hangers). All hooks are sold in packs of 10.
NOTE: Do not exceed maximum weight of hangers.

The Gallery System
Push Button Hook
(max 20kg per hook)

Push Button Security Hook
(max 20kg per hook)

Allen Key Hook
(max 20kg per hook)

Accessories

The Gallery System Endcaps - available to match the track colour and finish the ends of the track when exposed.

Locking Capsules - 10 are included in the Clear Tape packs, however can be purchased loose if you have some Clear Tape left over.

HangRight Clips - Help stop art from leaning forward when suspended on the hanging system.

The Gallery Lighting System

Unobtrusive, flexible, economical and easy to install.

The Gallery Lighting System utilises the same Gallery System track that hangs your art. As this is a 12 volt system, anyone can install it, no electrician is required.

No matter what type of art you own, anyone can achieve an amazing art display with The Gallery Lighting System.
