---

**Create** a stylish ambience inside or outside your home with Classic Aluminium Plantation Shutters. These clever shutters add instant panache to your space and versatility to your lifestyle. Beautiful filtered light or open to catch the sun, secure and stylish: you'll be amazed at how versatile these hard-wearing shutters can be.

## Beautiful and Versatile

Many people assume that Aluminium Plantation Shutters are just for exterior use. However these shutters work just as beautifully inside your home.

Their stylish good looks and excellent insulation properties not only make your interior look good, but also, save energy on heating and cooling.

Classic Aluminium Plantation Shutters provide a practical solution to any space or application.

## Energy efficient

Aluminium shutters work much like double glazing, keeping your home cooler in summer and warmer in winter. Combine panels with our optional eco frame for maximum thermal efficiency and light block out.

## Extra Security

Choose to add our double lock system and you will have that extra piece of mind regarding security. A much more attractive and practical alternative to grilles or bars and just as effective. Sleep easy and be worry free.

## No fuss maintenance

Once you have your Aluminium Plantation Shutters installed, you won't need to worry about a thing. They are extremely hard wearing, inside or out and above standard powder coat finish means they are not susceptible to water damage or mildew. They are great for families with young children and pets and a robust option for rental properties.
