

Engineered for Impact. Trusted Across Australia.

RF – Reflective Fabrications Pty Ltd

34 Murdock Street
Clayton South VIC 3169
Australia

About RF

Australian Made. Industry Backed. Zero Compromise.

Reflective Fabrications is a specialist manufacturer of high-visibility safety clothing, reflective materials, and signage solutions — designed and made in Melbourne since 1988.

We supply critical frontline teams across:

- Emergency services
- Infrastructure and civil projects
- Logistics and heavy transport
- Healthcare and local government

Our products are **built for serious worksites** — not promo giveaways or offshore generic gear. Every item is made in-house at our Clayton South facility using compliant materials, tested processes, and over 35 years of manufacturing experience.

From Founder to Future

Originally founded by **Chris Brennan**, RF was acquired in 2025 by Thomas Holdings and is now led by **Managing Director, Aaron Gray**.

We've modernised the systems, streamlined the operations, and re-committed to the principles that made RF trusted by thousands of frontline teams:

"Make it properly. Back it with service. Never compromise safety."

What Sets RF Apart

- **100% Australian made** — no imported shortcuts
- **AS/NZS compliant** — built to standard, not just appearance
- **Custom-ready** — from ID vests to signage kits
- **Servicing the sectors that can't afford to fail**

What We Make

Complete Visibility Solutions — Built for Australia

RF offers five core product lines — all manufactured under one roof in Melbourne for full quality control, fast turnaround, and total compliance with Australian safety standards.

Safety Clothing

High-visibility workwear made for serious environments — not promotional handouts. Designed for day, night, or dual use, with options for healthcare, emergency services, and site teams.

Reflective Materials

We're one of the few manufacturers producing and applying advanced reflective technologies locally. Our breathable tape is patented and field-proven in Australia's toughest conditions.

Traffic Control & Signage

From roll-up traffic signs to full signage kits, our systems are trusted on civil worksites, roadside emergencies and infrastructure builds across the country.

Automotive & Transport Safety

Fleet visibility, dump bin compliance, and tautliner strap upgrades. All built with 3M materials and configured to VicRoads and national guidelines.

Custom Identification & Printing

You bring the uniform or the use case — we add visibility. Reflective lettering, screen printing, armbands, helmet IDs, and role titles — all produced in-house with fast turnaround.

What We Make

High-Visibility Workwear That Means Business

Our garments are built for field performance — not giveaways. Whether your team is managing traffic, delivering patient care, or coordinating emergency response, RF safety clothing is made for full compliance, comfort and customisation.

Designed for the Demands of Real Work

- **Hi-Vis Vests**
For day, night or day/night conditions — all compliant with AS/NZS 4602.1 and AS/NZS 1906.4.
- **Incident & Emergency Response Vests**
Fast-deploy vests with clear role ID panels. Used by SES, Fire Rescue, VicPolice, and more.
- **Healthcare & Medication Round Vests**
Designed to reduce interruptions and error rates during patient rounds and medication delivery.
- **HeRole-Specific & Colour-Coded Tabards**
Warden, Security, First Aid, OH&S — fully customisable with company logos and department colours.
- **Custom Sizing & Branding**
Fit-for-purpose vests tailored to your organisation, not one-size-fits-none imports.

Built in Melbourne. Backed by Service.

Every garment is made in-house at our Clayton South facility, allowing:

- Fast sample turnaround
- On-the-fly adjustments for team rollouts
- Local support from people who understand compliance, not just clothing

Optional Add-On Services

- Custom screen printing
- Reflective lettering
- Mixed-fabric builds (cotton drill, Proban, poly)
- Garment retrofitting (your supply or ours)

Reflective Materials

Serious Visibility. Field-Tested Reflectivity

RF is more than a garment maker — we are Australia's local experts in reflective technology, developing and applying high-performance materials across garments, signage, and vehicles. From our patented breathable tape to heavy-duty Class 1W film, every strip is designed to perform where safety matters.

Designed for the Demands of Real Work

Patent: PCT/AU2006/000740 - Designed to solve the #1 problem in high-vis clothing: heat and discomfort. Our perforated reflective tape improves airflow without compromising compliance. **"If it's not breathable, it's not wearable."**

- Allows sweat to evaporate
- Industrial wash-capable
- Lightweight and comfortable
- AS/NZS 1906.4 compliant
- Exclusive to RF — not available to competitors

Reflective Tape Options

We stock and cut a wide range of compliant reflective materials for various use cases:

- **Class 1 Prismatic** — high-reflectivity, day/night performance
- **Class 2 Engineer Grade** — general hazard and vehicle striping
- **Class 1W Diamond Grade** — ultra-premium visibility (e.g. emergency services, critical sites)
- **Heat Laminate & Industrial Wash Reflective Tapes** — for garments exposed to intense wear
- **Photoluminescent & Fluoro Options** — for low-light or blackout scenarios

Custom Rolls & Application

We stock and cut a wide range of compliant reflective materials for various use cases:

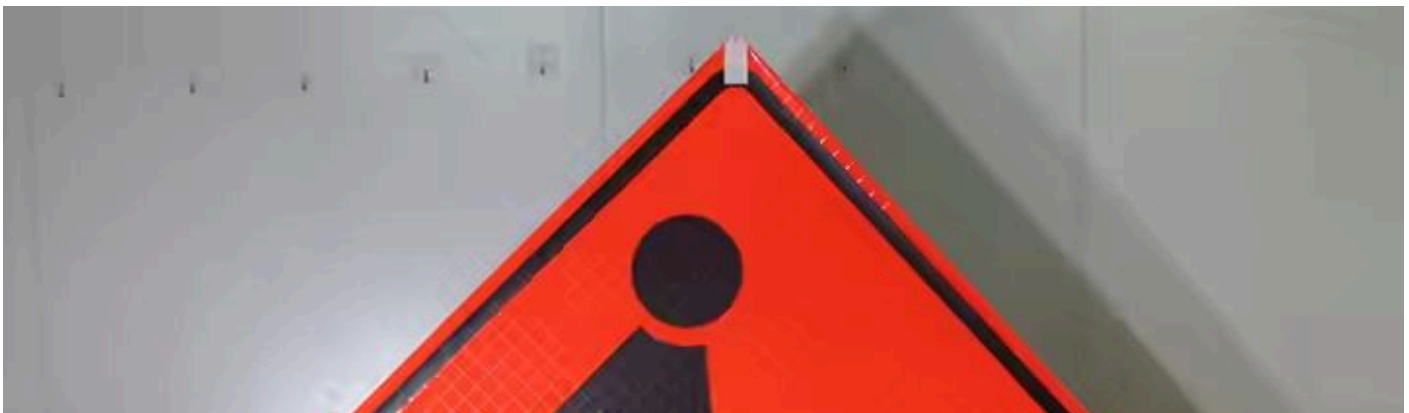

- Custom cut widths and roll lengths
- Branding, logos, and lettering available
- Tape application to uniforms, PPE, banners, signs and vehicles
- In-house slitting, heat pressing and screen printing

Traffic Control & Signage

Fast to Deploy. Built to Last. Compliant on Every Front

Whether it's a planned works zone or an emergency roadside response, RF signage systems are trusted across Australia for rapid setup, visibility, and compliance.

Our in-house manufacturing ensures that every component — from reflective face to structural frame — meets Australian durability and safety standards.

Flexi Sign Stand II — The One-Person Setup Solution

RF's signature roadside sign kit is trusted by utility crews, traffic teams, and emergency services.

"No tools. No tape. Just unfold and deploy."

- **One-piece, fold-out base** — set up in seconds
- **Roll-up signface with genuine 3M reflective film**
- **Standard sizes:** 900x600mm & 1200x900mm
- **Built-in anchor points** and flare bracket options
- **Packs into a heavy-duty carry bag** for easy transport
- **Custom messages & logos** available on request

Reflective Roll-Up Signs & Accessories

- Available in Class 1W Diamond Grade and Engineer Grade
- Compatible with most national roadside standards
- Multiple colours, titles, and panel formats available
- Suitable for night work, civil construction, roadside utilities, and event safety

In-House Design & Printing

- Custom warning messages, directional arrows, or logos
- Clear, legible fonts for long-distance visibility
- Rush production available for urgent deployment

Automotive & Transport Safety

Be Seen. Stay Compliant. Protect Your Fleet.

When your equipment is on the road or in a live work zone, visibility isn't optional — it's critical. RF manufactures and applies reflective solutions tailored for vehicles, trailers, and transport assets operating in high-risk, high-regulation environments.

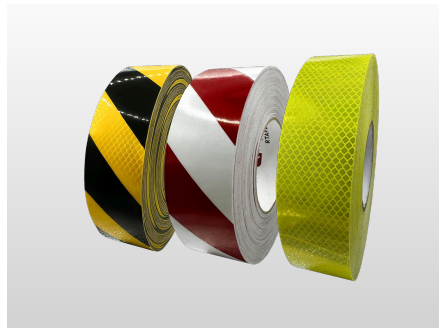

Every product is made in-house with genuine 3M materials and configured to Australian road safety standards.

Fleet & Trailer Marking

Reflective Striping for Trucks, Vans & Utes

Ensure vehicle visibility in all lighting conditions with custom-fitted, AS/NZS-compliant tape layouts.

Tautliner Reflective Sleeves

A simple safety upgrade for curtain-sided trailers. Easy to install, highly visible, and a favourite of safety auditors.

Rear Marker Tape for Dump Bins & Equipment

Built to meet VicRoads requirements. Day/night visibility for bins, trailers, machinery and site assets.

Key Features

- Genuine 3M Scotchlite Reflective Film
- Class 1 & Class 1W available
- Long-life adhesive or rivet-mount options
- Cut to fit — no DIY trimming required
- In-house custom application available for bulk installs

Specialty Vehicle Applications

"If it moves or gets moved, it should be marked."

- Civil and infrastructure contractor vehicles
- Emergency and utility services
- Waste & recycling fleets
- Council, mine, and rail equipment

Custom Identification & Printing

Customisation That Makes Safety Clearer

In high-risk environments, knowing who's who isn't a luxury — it's a safety requirement. RF provides a complete range of identification tools and in-house printing services to help teams stand out, stay organised, and remain compliant under pressure.

From printed role titles to armbands and helmet badges, every product is made for fast recognition in complex environments.

On-Garment Customisation

We apply branding and identification directly to garments — new or supplied. **"If your vest says who you are — you're safer, and so is your crew."**

- **Reflective Lettering** – Ideal for night visibility, compliant with AS/NZS 1906.4
- **Screen Printing** – Crisp logos, team names, department titles
- **Heat Transfer Graphics** – Long-wearing and washable
- **Back Patches & ID Panels** – For fast-swappable roles (e.g. WARDEN, FIRST AID)

ID Accessories & Visibility Aids

Custom solutions built for rapid deployment and clear role separation.

- **Armbands & Tabards** – Colour-coded, reflective or printed
- **Helmet Stickers & Badging** – For emergency services, traffic crews, and contractors
- **Visitor ID Sets** – Disposable or reusable, with high-vis features
- **Sleevelets, Gauntlets & Caps** – Ideal for complex sites and layered roles

Service Flexibility

- Bring your own garments or use ours
- Low minimums for one-off teams
- Rush orders and trial samples available
- All work completed on-site in Melbourne

Compliance & Warranty

Certified for the Field. Backed for Peace of Mind.

At RF, compliance isn't a feature — it's the foundation. Every garment, material, and reflective component we produce is aligned to the relevant Australian Standards. Our in-house production process allows us to maintain full traceability and quality control from start to finish.

Certified Standards

Our products are built to meet or exceed:

- **AS/NZS 4602.1:2011**
High visibility safety garments – Garment design and use
- **AS/NZS 1906.4:2010**
Retroreflective materials for safety garments
- **VicRoads & state-specific compliance**
For vehicle, bin, and trailer markings (e.g. dump bin reflector kits, tautliner sleeves)
- **Internal QA protocols**
Every batch is tested for reflectivity, adhesion, durability and wash-resistance

Warranty & Product Support

We stand behind every product with clear care instructions and a warranty built for real use.

- **30-Day Unconditional Warranty**
Covers all manufacturing defects on garments, tape, and signage
- **Reflective Material Lifespan**
Materials have a finite reflective life — we provide guidelines to extend it safely
- **Garment Care Instructions Included**
Each order includes handling and wash instructions tailored to the materials used

Compliance Documents Available On Request

- Product data sheets
- MSDS and compliance references
- Material certifications
- Site audit support (for high-risk industry clients)

Who We Work With

Trusted by the Teams Who Keep Australia Moving

For over 35 years, RF has supplied safety gear, reflective systems, and visibility solutions to the industries where downtime isn't an option and compliance is non-negotiable.

Our products are used every day by field crews, emergency responders, and operators across the country — because when visibility matters, they come to us.

Sectors We Serve

Emergency Services

Police, Fire & Rescue, SES, Ambulance

Civil & Infrastructure

Road contractors, utility providers, tunnel and rail projects

Healthcare

Hospitals, aged care facilities, frontline medication delivery teams

Transport & Logistics

Waste fleets, distribution centres, port and freight operators

Local Government

Councils, asset managers, community safety teams

Construction & Mining

Tier 1 and subcontractor teams on regulated sites

Selected Clients & Agencies

Logos or client names may be included here depending on legal approvals or recognisability.

- Victoria Police
- Fire Rescue NSW
- State Emergency Services
- Fremantle Ports
- Cleanaway
- John Holland
- Fulton Hogan
- Australian Defence Contractors
- Multiple public health networks

Proven Under Pressure

RF gear is on the ground at rail shutdowns, storm responses, COVID wards, roadside emergencies, and construction audits. We don't just make safety products — we keep essential teams safe, compliant, and ready to work.

Contact RF

Let's Get Your Team What It Needs

Whether you need compliant workwear for your entire crew, a custom reflective setup for your transport fleet, or a rapid signage rollout for an upcoming project — RF is ready.

We build every order in-house. No overseas wait times. No safety shortcuts.
