Network Workstations

Network Workstation is our vision for systems furniture in the contemporary office. It is perfect for matching workstation design with meeting table and even executive desk design for the totally integrated look.

The system is versatile, giving enormous scope for the widest range of height-adjustable workstation or table configurations, with the range of colours and materials that you demand in the modern workplace.

It is also the environmentally responsible choice, being designed for minimal impact using entirely recyclable materials and for simple disassembly for re-use or eventual recycling.

Network Meeting Tables

With a Network Boardroom Table, every office is able to have its architectural appeal enhanced by including the smart, coordinated style and function of this series of tables.

By adding Network desks and workstations which use the same leg program with its inbuilt height adjustment, you have the opportunity to provide a cohesive aesthetic solution to a whole project.

It is also the environmentally responsible choice, being rigorously engineered and design for minimal impact - using entirely recyclable materials and for simple disassembly for re-use or eventual recycling.

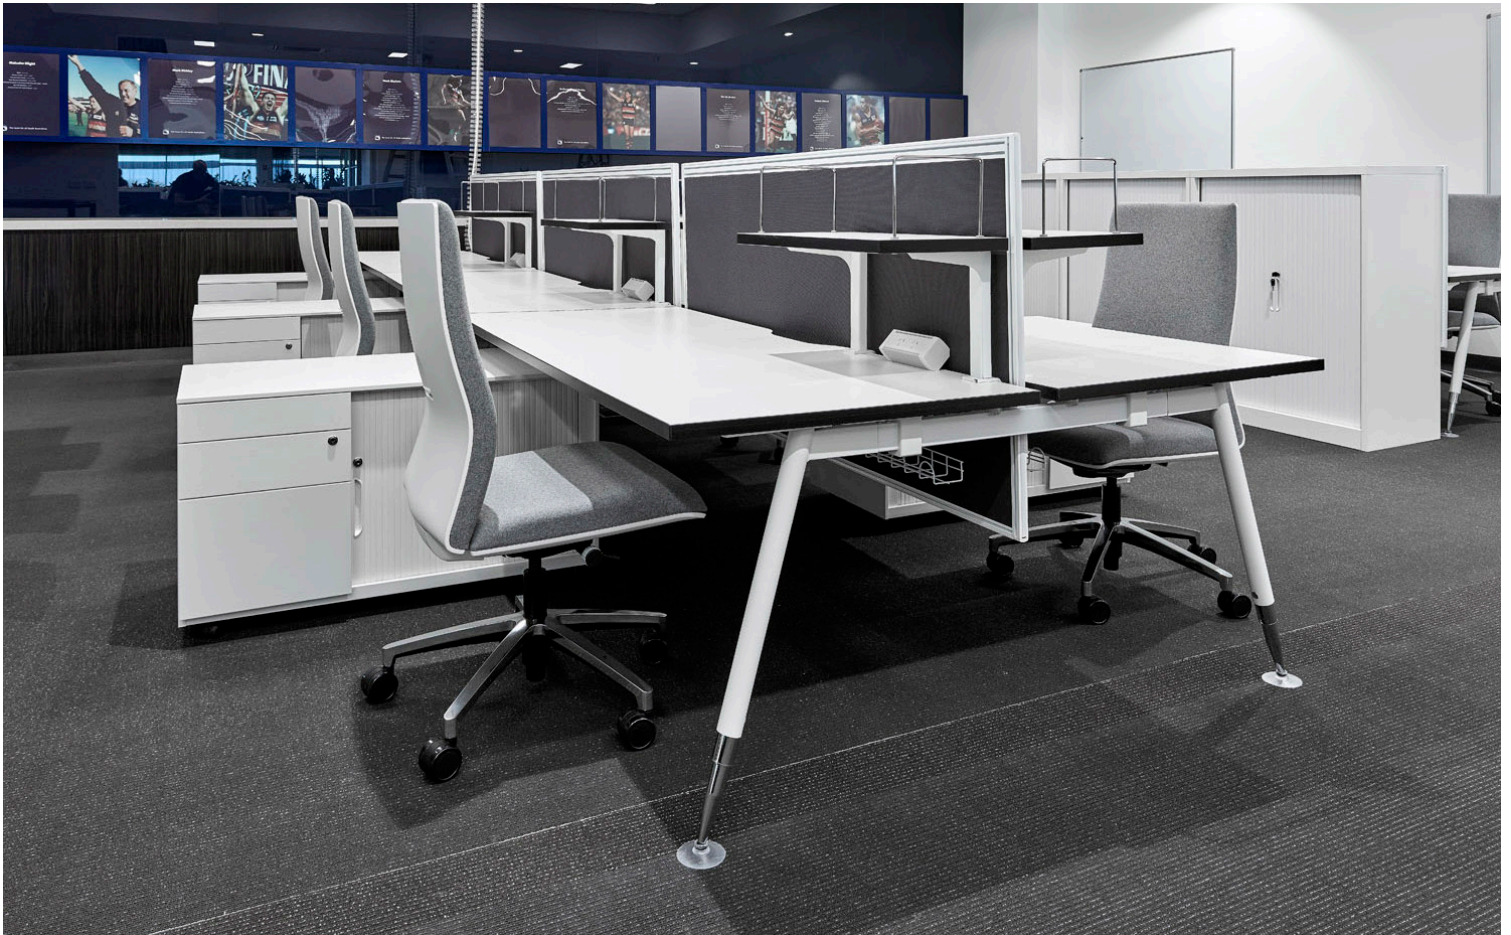

Network Desk

Architecturally designed desk system: The Network Desk takes on the complexity of office furnishings using simple, multi-purpose elements that provide efficient and functional solutions for complex configuration needs.

The flexibility of the system makes it possible to modify even the simplest configurations, integrating them with straight or shaped desktops using an efficient system involving shared structural components. Minimal components - Maximised potential.

By adding Network tables, workstations, meeting and even boardroom tables which use the same leg program, you have the opportunity to provide a cohesive aesthetic solution to a whole project.
