

Precision Electronics Design and Manufacturing - Sydney

COMPANY OVERVIEW

BENBRO Electronics is an Australian Electronics Manufacturer, designing and manufacturing power and communications products.

Established in 1985, we provide BENBRO labelled and bespoke OEM products for organisations seeking local content and control over the supply chain. Our capability includes full PCB Surface Mount Technology, Through-Hole component insertion, Product Assembly, Testing, Reworking, Cable harnesses and Enclosures.

We pride ourselves on providing meaningful employment for people living with intellectual and/or physical disabilities, having also won numerous Prime Minister Awards for our employment practises & values. This still resides in our DNA to this day.

BENBRO offers a range of electronics' solutions under the BENBRO name. In 2026 we upgraded to new modern manufacturing technology, still coupled with our long-standing highly skilled, qualified, dedicated team of engineers and product assemblers.

PRODUCTS & SERVICES

BENBRO designs, manufactures and distributes electronic equipment including:

- DC to DC Converters
- Industrial Power Solutions
- UPS & Inverter Systems
- Static Transfer Switches
- Underground Communications
- Bespoke electronics Design & Manufacturing
- Reworking and Prototyping

DISCRIMINATORS

- ✓ A strong reputation for building products with longevity (*robust & reliable*)
- ✓ Exceptional product reliability with return rates below <0.1%
- ✓ Sourcing of genuine quality components that are robust, have long-term supply availability and available through multiple sources and countries.
- ✓ In-house design capability to ensure complete control & security over the source.
- ✓ BENBRO is Australian owned since commencing operations in 1985.

Our products are bespoke designed and manufactured in Australia to Certified ISO9001 Quality level, for numerous **Tier 1 Local and International clients** including:

CAPABILITY

- Design's, manufactures, sells power electronic equipment including: DC to DC converters, Industrial Power Supplies, UPS & Inverter Systems, Static Transfer Switches and more.
- Offers high quality local made Surface Mount & Through-Hole PCB assembly manufacturing, reliable component sourcing, product assembly, reworking, testing, packaging and shipping.
- Bespoke design and manufacture of DC power products, power regulator solutions, mining communications, digital water meter loggers, ultrasonic cleaners & other electronic equipment.
- Capability to reverse engineer and modernise products from an engineering design perspective
- We pride ourselves on being nimble and agile in our service offering, meaning we're fully customer focused & responsive.
