Vigil Antislip Metal Deck

The highest quality, longest lasting antislip worldwide. Surfaces that appear level can be just as dangerous as stairways. Poor lighting, cracked or uneven paving or concrete, and the presence of water, oils or other liquids increase the risk of trips and falls that result in physical harm and lost time. Vigil Antislip Metal Deck provides highly effective long-term protection for all industrial surfaces, including grating, chequer plate and diamond plate. Metal Deck eliminates the dangers of slips caused by fluid spillage or exposure to other contaminants and increases the visibility.

Custom-sized panels for heavy machinery
