

Water solutions for a healthier environment

At **GALVIN ENGINEERING** everyone is passionate about water solutions for a healthier environment. Every day we focus on the design and supply of specialised taps, water management systems, and fixtures, for better health and safer communities.

Our family-owned Australian company incorporates an advanced ferrous and non-ferrous foundry, state-of-the-art machining facility, and an innovative technical & testing department. With **ISO 9001 and ISO 14001** accreditation, and Australian Standards and Watermark certification, we handle the process all the way from design, to manufacture, and finally testing & assembly.

We are totally focused on providing uncompromising customer service and responsive technical backup, through our offices in Perth, Sydney, Melbourne and Brisbane, and our distributors in New Zealand, the USA and the United Kingdom.

Our Vision is to be the market leader for the health, education and corrections markets.

OUR PURPOSE

Water Solutions for a Healthier Environment

OUR VALUES

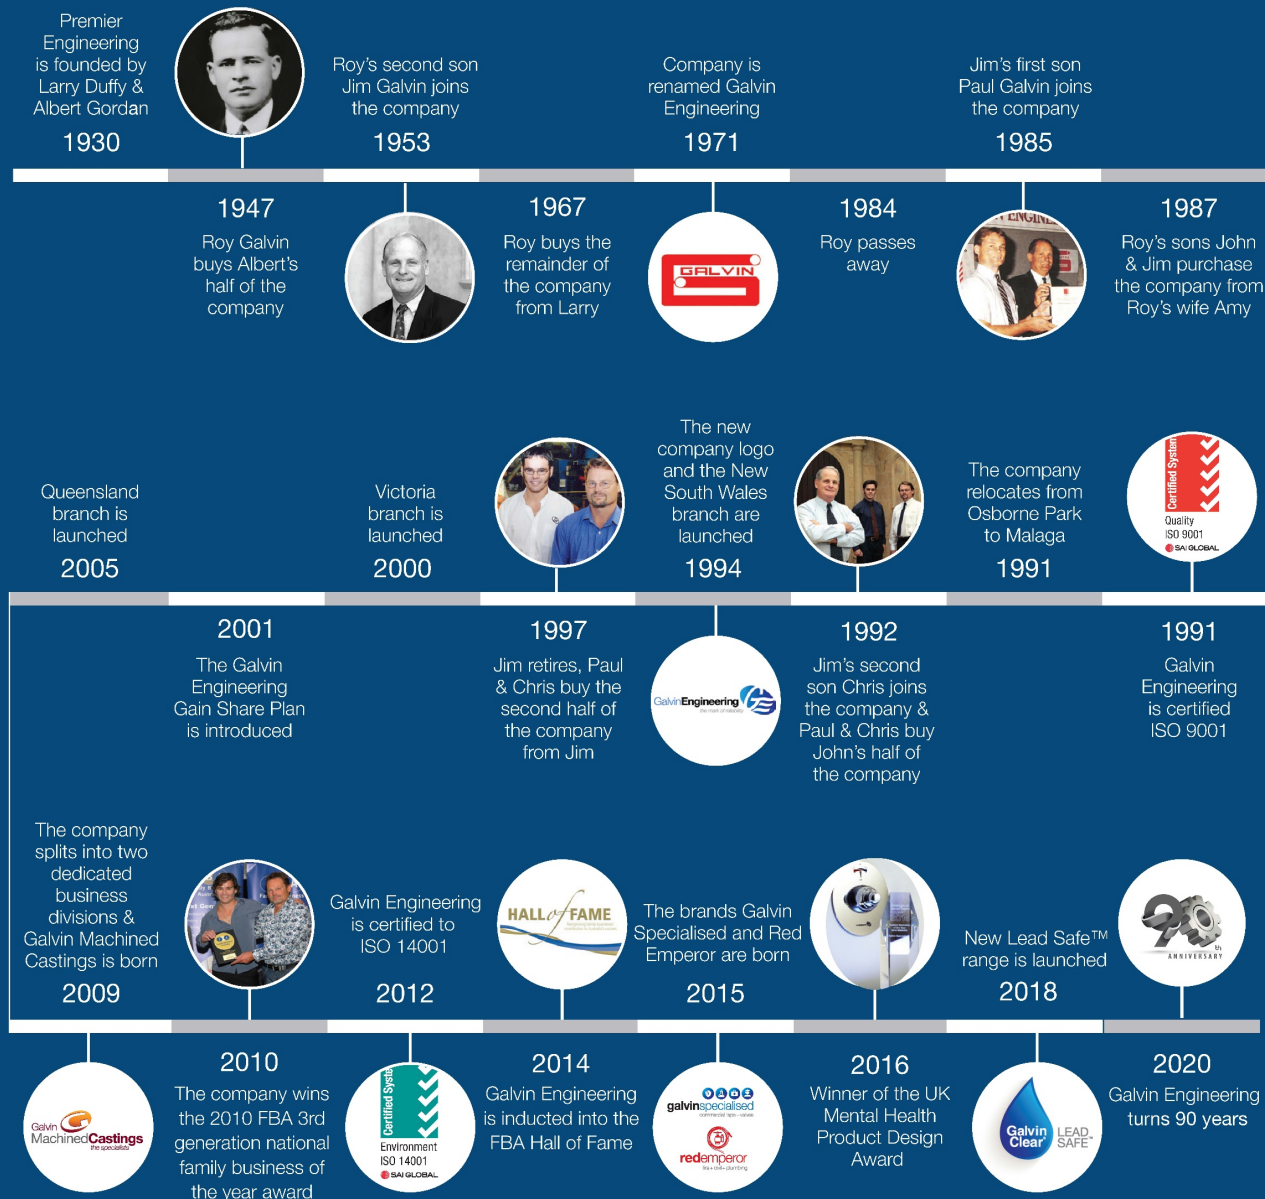

Pride, Accountability and a Will-Do Attitude

WHAT WE DO

We design and supply specialised taps, water management systems, and fixtures, for better health and safer communities

90 YEARS OF AUSTRALIAN DESIGN & MANUFACTURING

From humble roots as a small Perth foundry business to an internationally operating company, Galvin Engineering has continued to grow and adapt to meet the needs of our niche markets.

We are a proud 4th generation Australian family business built on hard work and integrity. We proudly stand behind our commitment to quality and innovation.

Industries

As market leaders in the health, custodial and education environments, we have a vast selection of taps, water management systems and fixtures that have been specifically designed to meet the complex requirements in these locations.

MENTAL HEALTH

Specialist products incorporate anti-ligature and safe assisted features. Our patented GalvinCare® Mental Health Anti-Ligature Safe-Connect Shower Head with Hand Held Shower is being used in facilities across Australia, NZ, USA and UK.

EDUCATION

The EzyDrink® LeadSafe™ drinking bubbler range has been developed to meet the need for delivering safer water to school kids.

HEALTH

Our CliniMix® Thermostatic Progressive Mixers are ideal for hospitals as they reduce the risk of scalding and improve infection control.

AGED CARE

CliniLever® taps are ideally suited to the aged care sector combining a stylish look with modern style lever handles. Laminar flow outlets help reduce the risk of legionella.

Industries

As a trusted Australian Manufacturer we can develop products to specification, as well as supply top-quality brands from across the globe, enabling us to offer solutions for all commercial projects.

CORRECTIONS

Safe-Cell® crocodile roll resistant (CRR) floor drains are designed for prisons, mental health facilities, custodial facilities and holding cells. They reduce the risk of self-harm, suicide, and the hiding of contraband.

SPORT & LEISURE

The Conti range of chrome plated sensor tapware offers handsfree operation which results in a hygienic handwashing experience, whilst reducing water and energy consumption.

CATERING & RETAIL

Our Ezy-Wash® Pre-Rinse units are designed to remove excess food scraps from dishes before placing them in the dishwasher. The ergonomic trigger spray is water saving and energy efficient.

RED EMPEROR

Our Red Emperor® range caters for your fire, civil and commercial plumbing needs. We are able to source and supply these items in bulk at very competitive prices and uncompromising durability.

The Galvin Difference

With our clear focus on the health and safety of users and the community, we continue to lead the way with innovative taps, water management systems and fixtures, that are specifically designed to meet the complex requirements of our key markets.

WATER SAVING

Our Specialised Tapware has been designed to save water and reduce energy costs.

EASY CLEANING

The chrome and epoxy coatings we use ensure easy cleaning to support infection control, reduce maintenance costs, and prevent bacteria growth.

SAFE WATER DELIVERY

Our GalvinClear® LeadSafe™ products are ahead of industry standards with regards to reducing Lead in water. We also have temperature control tapware to ensure that water is delivered at the required temperature minimising the risk of scalding.

CONVENIENCE & SAFE USE

Anti-ligature products are specifically designed for end-users who may be at risk of self-harm. Features include vandal resistant and hidden wall fixing options. The products are also designed to be visually appealing to help create a homely environment.

DESIGN & DURABILITY

We stand behind the quality of all our products. Our tapware is designed with durability, reduced maintenance and faster installation time in mind.

INFECTION CONTROL

We have solutions dedicated to supporting infection control in crucial areas. This includes hands free options, and solutions which decrease stagnant water.

Manufacturing

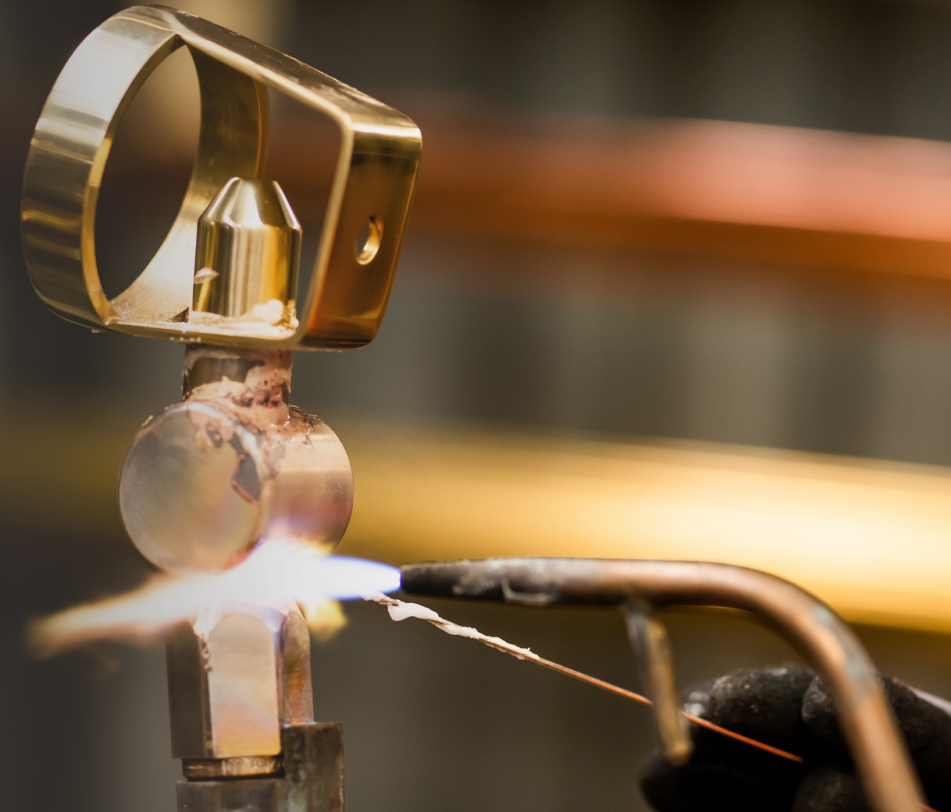

Our skilled R&D team is responsible for the design of our Galvin Specialised® range. We are able to guarantee the quality of all our products because we manufacture, assemble, and test many products here in WA. We have extensive casting and after cast services, state-of-the-art machining services, and an advanced testing laboratory on site. We pride ourselves on being the market leaders in innovative solutions for niche markets.

“Sanwell has a long-standing relationship with Galvin Engineering, and we have been installing its range of specialised products in multiple marque projects throughout Western Australia such as Optus Stadium. Optus Stadium provided Sanwell with the unique opportunity to work with the engineering team at Galvin Engineering by assisting in the development of water-efficient flushing systems throughout the venue. Galvin Engineering product lines are well designed, robust and stand the test of time. Their product knowledge, sales and aftermarket service are exceptional, and these are the reasons why Sanwell place our trust in Galvin Engineering for our projects.”

Brendan Long
General Manager
Sanwell Plumbing

“For over two decades, Hydraulic Design Australia has had a long-standing relationship with Galvin Engineering, and has been specifying their range of specialised products in multiple marquee projects throughout Western Australia. Galvin Specialised product lines are well designed, robust and stand the test of time. The entire team's product knowledge, sales and aftermarket service are exceptional, and these are the reasons why we will continue to place our trust in Galvin Engineering for our projects.”
