## Tugger Winches

Neumann Equipment tugger winches can be either hydraulically or electrically driven and are designed to assist the crew to manipulate heavy pieces of offshore towing equipment such as chain bridles, towing plates and large towing wire ropes used in ship handling work. They are manufactured from high quality components to suit extreme marine conditions and will provide many years of dependable service.

All of our tugger winch designs are verified using Finite Element Analysis (FEA), manufactured and tested to meet industry/marine industry standards. They are Built Tough and Designed to Last!

### Standard Inclusions:

- Reduction drive gearbox.
- Fail-safe multi-disc spring applied brake.
- Winch drums are supported with a fully sealed self-aligning bearing.
- Rope terminator to suit wire rope.
- Carbon steel construction.
- All components are of high quality for many years of service.
- All components are grit blasted and primed with two-pack epoxy primer and finished with heavy-duty two-pack epoxy polyamine marine coatings.

### Available Options:

- Line pull capacities – up to 50,000kg.
- Hauling line speeds – up to 50 metres per minute.
- Drum capacity to suit selected rope specifications.
- Band brakes.
- Rope terminator to suit fibre rope.
- Stainless steel construction.
- Drive motor types – electric or hydraulic.
- Parking pawl/drum lock.
- Electric/hydraulic control systems to suit.

Please contact us by phone or email to discuss your tugger winch requirements.
