FIRE CLAY

WE ARE PROUD OF OUR **HISTORY**

The Littlehampton Brick Company was originally a manufacturer of fire bricks. Fire bricks were an indispensable commodity in the early days of Australia used in industry and ovens. Our operations have transitioned over the years as we discovered and crafted exceptional clays into high quality house bricks and pavers – though we still make fire bricks too!

In the beginning, before the company was formed, exploration teams were sent from the cities to Littlehampton.

There they discovered that there were exceptional clay seams and shales, ideally suited for the manufacturing of refractory fire bricks and top quality house bricks.

A workman's hut was erected on the actual site where the company now stands, and hand-moulded bricks were first made to be tested for use in industry application.

The bricks proved to be of superior quality, and the Littlehampton Brick Company was formed.

In the beginning, the company primarily produced firebricks for the smelter works and foundries at Port Adelaide, and by the early 1900s the refractory bricks were used in all the new "T" class locomotives for the Royal South Australian Railways.

Throughout our history, the company has withstood the Great Depression, two world wars and has seen many other changes, especially in the manufacturing procedures.

The first original kilns, two of which still stand today, were wood fired for two full weeks, allowing 15,000 bricks to be made a fortnight.

Currently the modern kiln can fire 90,000 bricks in just two days burning time, allowing more than 6 million bricks and pavers to be produced per year for the local and overseas markets.

Today, Littlehampton Bricks use the same skills and traditional techniques to produce a premium range of hand crafted clay bricks and clay pavers. Our unique bricks and pavers will ensure your building, new home or renovation becomes a classic of tomorrow.

FIRECLAY MIX - RECOMMENDATION: 4 PARTS FOUNDRY SAND / 1 PART LIME / 1 PART FIRECLAY

Littlehampton Bricks, have been making and selling fire bricks, and fire clay for over 100 years and our products have been used in hundreds of pizza ovens, fire places and forges across Australia.

OPTIMAL QUALITY HAND-GRADED PRODUCT

WHY CHOOSE CLAY BRICKS?

LOW MAINTENANCE

Once clay bricks are laid, they basically take care of themselves! They look as good the day they get put down until many, many years into the future! Other building products like render or paint will need to be replaced over the years multiple times but clay bricks never fade and always look timelessly outstanding.

A BUILDING MATERIAL PROVIDED BY NATURE

Clay bricks are among the oldest building materials in the world. The first sun-baked brick was made about 4000 BC. Clay Bricks are Beautiful, natural, durable and of stable value. Selecting the right building materials is a decision for life. A modern building must comply with numerous ecological and economic demands.

Our products contain the experience and know-how of over 100 years.

NATURAL AND ECO FRIENDLY

Clay bricks and pavers are particularly sustainable and natural building materials because they consist of the natural raw materials clay and water. Bricks and Pavers are absolutely free of pollutants and allergens and thus especially compatible with humans and nature and have an incredibly long shelf life of well over 100 years and are also often recycled from demolished projects, thus adding even more to their sustainability and eco-friendly properties.

PEACE AND QUIET

Clay bricks are a dense, heavy and robust product. This means they have great noise reduction qualities as well as providing great insulation. If you like a quiet, peaceful home then using clay brick is a great way to guarantee a good nights sleep and minimise any disturbance from those dreaded 'noisy neighbours!' For extra noise reduction and structural integrity of the home, clay bricks are often used for internal walls which mitigates the transfer of noise within the home and insulates even

VERSATILE

Clay Bricks and Pavers can be used for a variety of applications. They can be used for walls, façades as well as Paving, terraces Driveways and open spaces. Clay Bricks and Pavers can be used almost anywhere and for all architectural styles.

BUILT TO LAST

Clay bricks are strong, safe and permanent. They aren't affected by time, or weather, nor do they lose their shape or colour over time. Just take a look at some of the railway bridges and buildings in places like the UK which have stood perfectly for 100's of years in very adverse weather conditions. Clay Bricks are also fire resistant and difficult to break through for any would-be intruders.

ONE OF AUSTRALIA'S
**OLDEST AND
MOST AWARDED
BRICKMAKERS**

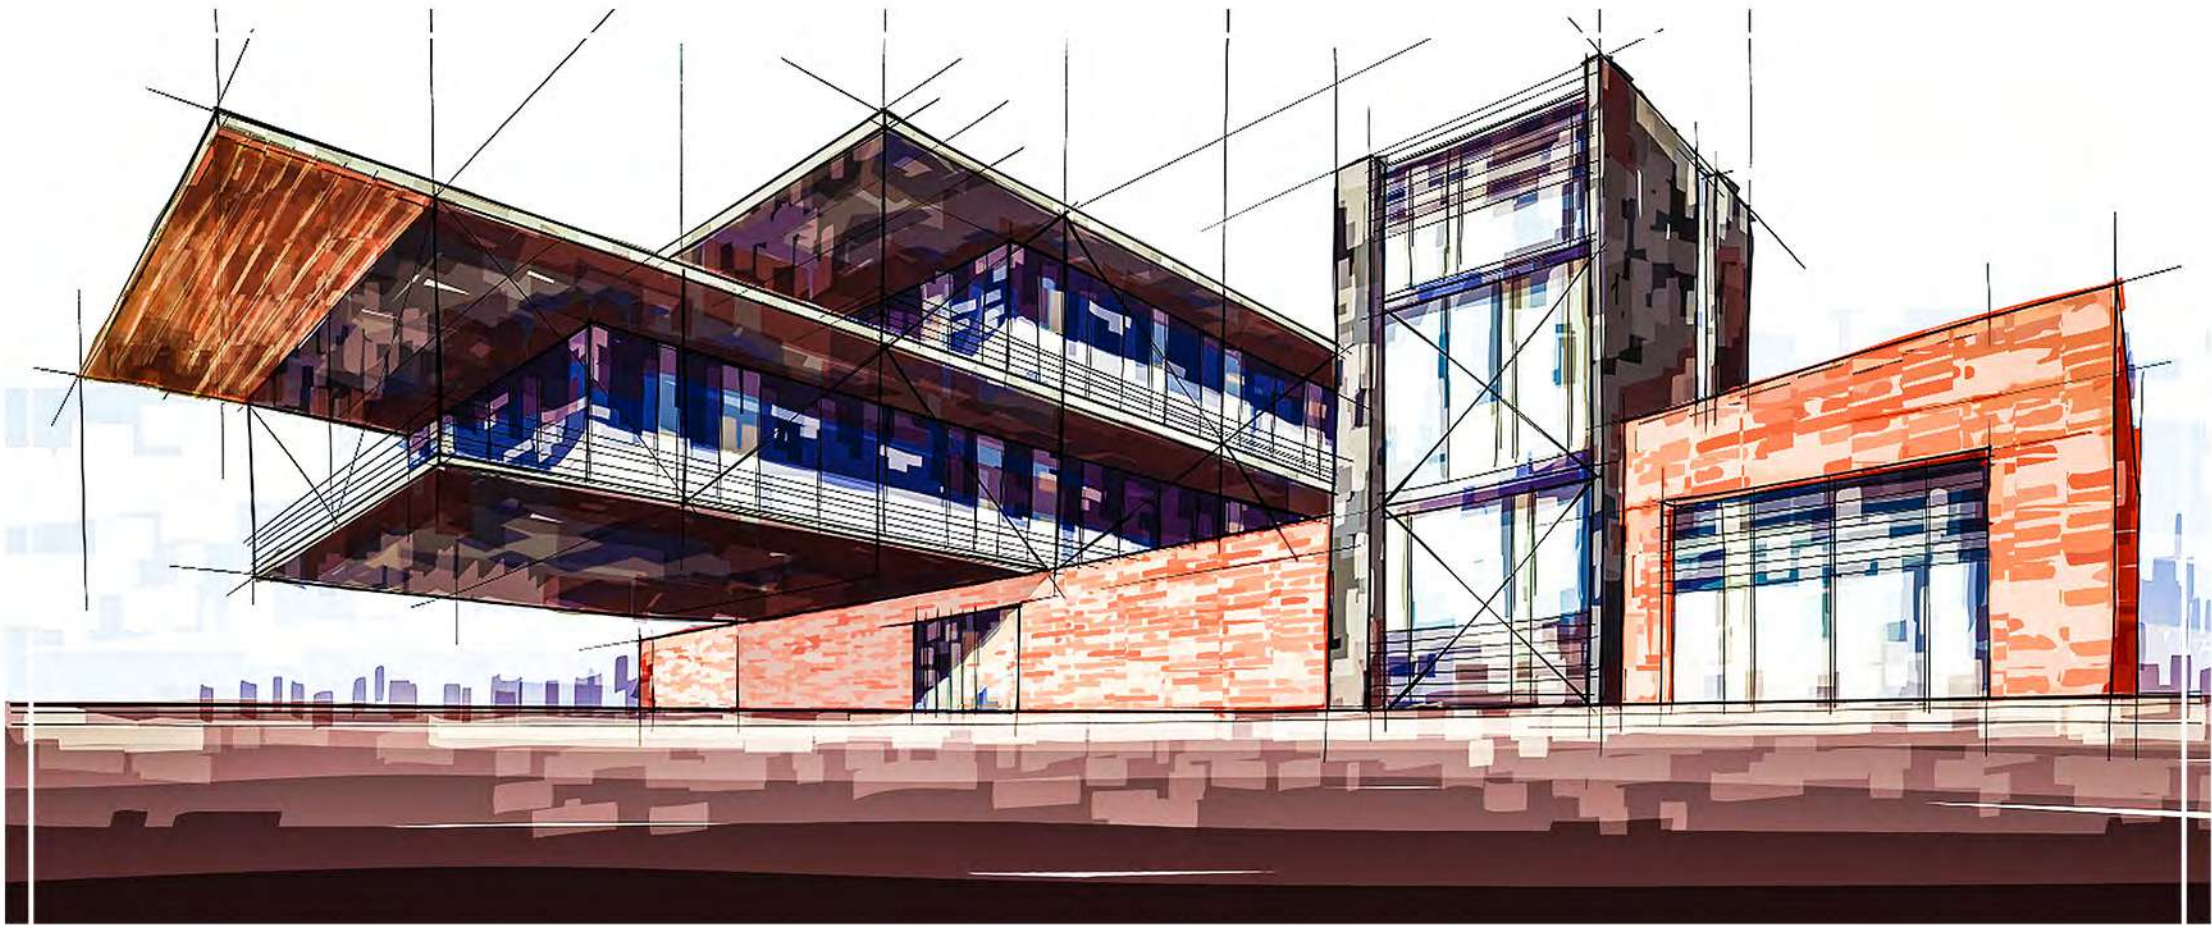

For well over 100 years Littlehampton has established a name as Australia's boutique brick manufacturer. Famous for bespoke textures, colours and finishes on the range of bricks and pavers. All products are totally unique and many made using custom production methods – exclusive to Littlehampton Brick.

Littlehampton supplies bricks and pavers to projects all over Australia and exports internationally. Some notable projects include Pavers in Taronga Park Zoo, Sydney and Disneyland Shanghai, China.

With over 100 years and over 3 generations of family ownership the entire team at Littlehampton take great pride in the products they produce.
