

# ***SAFE-GAUGE®***

SafeTest Pressure Transducers allow workers to safely and efficiently measure fluid or gas pressure up to 50m away. This is a 6 channel kit with pressure range options from 25-600bar.

A standard PT Series kit comes in a rugged charging case with suited foam moulding for the Pressure Transducers, Wireless MultiTool and charging system.

Accessory kits are also available with a MultiTool Mag-Base, couplings and adaptors for a safe, hands free pressure testing experience.
