

# An effective all-purpose organic\* fertiliser in pelletised form.

It's a unique formulation of chicken manure and our special blend of powerful microbes enrich the soil and give your plants a boost.

- ▶ A slow-release fertiliser, ideal for agricultural applications to build organic carbon
- ▶ Includes humic fulvic acid - a proven way to improve nutrient availability of phosphorous to plants - essential for healthy growth
- ▶ Supports soil health and plant growth for veggie and floral gardens, lawns and for all landscape applications
- ▶ Year-round use - apply Autumn and Winter for extra Nitrogen
- ▶ Safe, easy-to-use and worm-friendly

Reduces the need for pesticides and chemicals

Helps soil retain moisture and increases drought resistance

Increases soil health and a dynamic ecosystem via beneficial microbials

Boosts nutrient uptake to re-energise your plants

NOTE: Biolink does not guarantee yield or performance.

\* allowed for use in organic farming

## Active Ingredients: How They Work

### Composted Chicken Manure:

Chicken manure adds organic matter and increases the water holding capacity and beneficial biota in soil. It's rich in Nitrogen, Phosphorus and Potassium.

**Humic Fulvic:** Used to enhance plant productivity by improving nutrient availability for carbon bonding; a fungal stimulant for the soil. Humic fulvic buffers excess salt and toxins in the soil. Humic and Fulvic are concentrated carbon sources.

**Fish Meal:** High in Phosphorus and Nitrogen Soil bacteria thrives on fish oil for growth and wellbeing; encourages early-season microbial life.

**Microbes:** A selection of microbes to stimulate plant growth and increase microbial activity in the soil. The ingredients in Biolink Bullet activate the native microbes present in the soil.

**Blood Meal:** promotes leaf growth and greening due to the high levels of Nitrogen. Nitrogen is a crucial compound of plant cells and is the basic component of chlorophyll. Blood meal also helps to establish healthy root systems and produces green foliage more rapidly, making the plant more pest and disease resistant.

**Bone Meal:** is a rich source of Phosphorus and Calcium. Promotes healthy root development and seed formation.

**Guaranteed Minimum Analysis:** Nitrogen 3.34%, Phosphorus 1.20%, Potassium 2.57%, Sulphur 0.70%, Calcium 2.10%

**Active Ingredients:** Composted chicken manure, blood & bone meal, fish meal, humic fulvic acid & microbial inoculants

**Trialled and tested on Australian farms, Biolink Bullet is safe to use - perfect for your crops, home garden, or lawn.**

#### Directions for Use & Application Rates

**Home Garden:** 150g–350g per square metre in the vegetable garden and around established shrubs. Suitable for use on natives at lower rates.

**Lawns:** When sowing and maintaining lawn, use 350g to 500g per square metre.

#### Commercial Vegetables & Vine Fruit

**Production:** 500–2500kg/Ha as a pre-plant application depending on the type and quantity of other soil inputs.

**Tree Crops:** 250–500kg/Ha depending on the age of trees or 500g per tree for each year of the tree's age, up to 4kg. Apply under trees with more around the drip line. Apply in Spring and Autumn.

**Broad Acre Crops:** 100kg–300kg/Ha in the furrow with the seed as a biological activator in combination with 5–10kg of Biolink Germinator.

**Pasture:** 250 – 1000kg/Ha after grazing in Winter. Over Winter the pellets will incorporate into the topsoil and help initiate greater biological activity and increasing growth in Spring.

Seek advice about how to use **BIOLINK BULLET** from our friendly staff or your agronomic adviser.

**Available in 4kg, 15kg & 1 tonne bulk bags.**

## Nurture yourself. Grow your own food.

Biolink4Plants was created by two farming families with years of hands-on experience in agriculture.

Whether you're growing a few veggies in your backyard or in small pots on your apartment verandah, making the effort to be self-sustaining is a satisfying one.

We produce a range of 100% organic products to promote plant growth and help support your veggie patch or floral garden.

**Biolink Bullet** is an effective all-purpose organic\* fertiliser made with chicken manure, infused with our special blend of microbes.

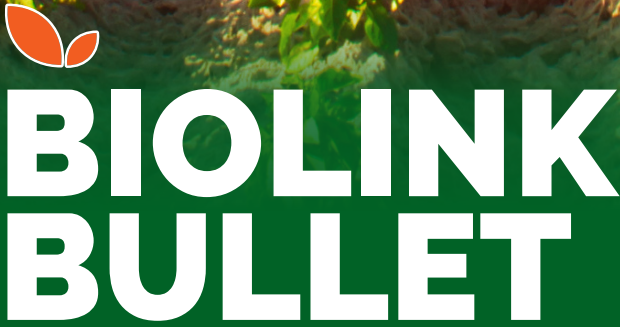

Our product range for Home Gardeners like you is available at our brand **new online shop**.
